1 EXECUTIVE SUMMARY

1.1 FINDINGS

The Phase I Environmental Site Assessment (ESA) was performed for City of Clinton (the "Client") to assess Subject Property conditions, both past and present, for indications of recognized environmental conditions (RECs). The definition of a REC is provided in Section 2.1. This report was prepared in general accordance with the ASTM International (ASTM) Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process E1527-21, and All Appropriate Inquiries in general accordance with 40 Code of Federal Regulations (CFR) Part 312.

The Subject Property is a portion of the property addressed as 413 10th Avenue South (former 1000 South 4th Street), identified as City of Clinton Assessor Parcel Number (APN) 8059700000 located in Clinton, Clinton County, Iowa (Subject Property). The parcel totals approximately 0.374-acre in area and is developed with two buildings. The owner of the parcel originally owned the building addressed as 413 10th Avenue South. The owner purchased the property formerly addressed as 1000 South 4th Street in approximately 2009. At that time, the addresses of the two buildings were combined, and the address for both buildings is currently 413 10th Avenue South. The building located at 413 10th Avenue South is not included in this Phase I ESA. The 0.05-acre portion of the parcel formerly addressed as 1000 South 4th Street is considered the Subject Property. It was constructed prior to 1885 and is approximately 4,400 square feet in area, two-stories, and was formerly used for retail purposes on the first floor and apartments on the second floor. This building is currently used by Central Siding Supply for storage of home improvement products and personal storage.

North of the Subject Property is 10th Avenue South followed by an apartment building. To the west are an alley and Central Siding Supply. South of the Subject Property are attached vacant commercial/residential buildings. To the east of the Subject Property is South 4th Street followed by vacant, grassed land.

Based on a review of the historical sources, the Subject Property was developed by at least 1885 with the current building that was occupied by a grocery store from the 1920s through the 1950s and in the 1980s, and a laundromat from the 1960s through the 2000s. From approximately 2009 to the present, the Subject Property building has been used for storage for Central Siding Supply and personal storage of the property owner.

Historical city directories indicate the surrounding areas were developed with residential properties and retail businesses beginning in at least 1885 through 2020. Businesses have included a beer distributor, bookstore, video store, ministry, restaurants, taverns, employment services, upholstering, custom furniture, used clothes store, barber, warehouse, pharmacies, offices, hardware store, beauty shop, grocery, laundromat, and gasoline stations. Two gasoline stations were located adjacent and east of the Subject Property from at least 1937 through the

© 2023 Blackstone Environmental, Inc.

1970s. Based on their regulatory status and the downgradient direction from the Subject Property, the gasoline stations are not considered RECs.

The interior of the Subject Property building could not be accessed due to the unstable condition of the building creating a safety hazard.

A Phase I ESA and Phase II ESA, dated 2018, were provided by the City of Clinton for the properties located at 1000 – 1006 South 4th Street in Clinton, Iowa. The reports include the suspected underground storage tank (UST) and cistern were identified as RECs. The report identified the building at 413 10th Avenue South as a REC as it was identified as a former auto repair/auto sales shop from 1987 through 1992. The Phase II ESA was conducted to assess the RECs identified in the Phase I ESA. According to the report, due to site constraints, soil samples were not collected from the area of the suspected UST and cistern. The two closest borings to the suspected UST and cistern were approximately 40 and 65 feet away. Two borings were advanced near 1000 South 4th Street to the east and west of the building. The constituents of concern were not identified in soil samples above the Iowa Statewide Standards. Further action was not recommended at the time. However, based on the distance of the borings from the suspected UST and cistern (40 and 65 feet away) and that soil and groundwater samples were not obtained, the suspected areas of concern that may have impacted soil and groundwater do not appear to have been adequately assessed by the previous report. A Phase I ESA for the Subject Property and the property located at 413 10th Avenue South, dated June 2022, was provided by the City of Clinton. The Phase I ESA identified several RECs that included a suspected UST located in the basement of the Subject Property, the former use of the adjacent 413 10th Avenue South property as auto repair, and a possible vapor encroachment condition at the Subject Property.

Based on the age of the Subject Property building (over 100 years), it is possible that asbestos containing materials (ACM) and lead-based paint (LBP) are present.

The Subject Property was identified on the environmental database report as a Federal Brownfields facility in 2019. The database indicated a vent pipe and fill port were identified in the basement of the building and the adjacent property was used historically for auto repair. The possible presence of an UST at the Subject Property is considered a REC. Other facilities identified on the environmental database are not considered concerns due to their regulatory status, and/or distance and direction from the Subject Property.

1.2 CONCLUSIONS

We have performed a Phase I ESA in conformance with the scope and limitations of ASTM Practice E1527-21 of a portion of the property addressed as 413 10th Avenue South (former 1000 South 4th Street), identified as City of Clinton Assessor Parcel Number (APN) 8059700000 located in Clinton, Clinton County, Iowa, the Subject Property. Any exceptions to, or deletions from, this practice are described in Section 2 of this report. This assessment has revealed the following RECs in connection with the subject property:

- The presence of a suspected UST in the former 1000 South 4th Street building.
- The former use of the building located at 413 10th Avenue South as auto repair.
- The possible presence of a vapor encroachment condition at the Subject Property.

CRECs, historic recognized environmental conditions (HRECs), and de minimus conditions were not identified.

1.3 RECOMMENDATIONS

In order to evaluate the potential environmental impacts related to the identified RECs, additional investigation is recommended.

Additional information leading to these conclusions is contained throughout this report and summarized in Section 10.

© 2023 Blackstone Environmental, Inc.

2 INTRODUCTION

The following report presents a summary of work performed in general accordance with guidelines of the ASTM Standard Practice for Environmental Assessments: Phase I Environmental Assessment Process (ASTM Standard Practice E 1527-21, hereinafter referred to as the "Standard Practice"). The work has also been performed in general accordance with the All Appropriate Inquiry (AAI) section of the Small Business Liability Relief and Brownfields Revitalization Act (AAI – 40 CFR Part 312).

2.1 PURPOSE

The purpose of this Phase I ESA is to identify RECs related to the Subject Property, to the extent feasible pursuant to the scope of services defined in our proposal dated August 18, 2023, and limitations discussed in this report. As defined in the Standard Practice, a REC is:

(1) The presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum product in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment.

ASTM defines the term historic recognized environmental condition (HREC) to mean a previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the subject property to any controls. A HREC is not a REC.

ASTM defines the term controlled recognized environmental condition (CREC) to mean a REC affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to reamin inplace subject to implementation of required controls (for example, activity and use limitations or other property use limitations).

ASTM defines a significat data gap as a data gap that affects the ability of the environmental professional to identify a REC.

ASTM defines *de minimis* conditions as a condition related to a release that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforemnt action if brought to the attention of appropriate governmental agencies. A condition determined to be a de minimus condition is not a REC nor a CREC.

2.2 DETAILED SCOPE OF SERVICES

This Phase I ESA was performed in general accordance with our proposal dated August 18, 2023, the Standard Practice, and AAI as reflected in the scope of this report. The scope of services included identification of the level of services desired by the Client based on the purpose for performing the Phase I ESA, and developing information to identify RECs in connection with the Subject Property by gathering user-provided information, obtaining and reviewing regulatory databases, reviewing historical and physical records, conducting interviews, initiating local governmental inquiries, and conducting a visual, noninvasive reconnaissance of the Subject Property and adjoining properties. Limitations, deviations from the ASTM Standard Practice, and data gaps, if evident, are discussed herein.

This Phase I ESA report does not incorporate additional services that are non-scope considerations relative to the Standard Practice. Non-scope considerations as defined by the Standard Practice include asbestos-containing building materials, biological agents, cultural and historic resources, ecological resources, endangered species, health and safety, indoor air quality, industrial hygiene, lead-based paint, mold or microbial growth conditions, PCB-containing building materials, naturally occurring radon, regulatory compliance, substances not defined as hazardous substances, wetlands, business environmental risks, lead in drinking water, vapor intrusion assessment, high voltage power lines, emerging contaminants, etc.

2.3 SIGNIFICANT ASSUMPTIONS

This Phase I ESA has been performed in general accordance with the Standard Practice. As indicated in the Standard Practice, no environmental site assessment can wholly eliminate uncertainty regarding the potential for RECs in connection with a property. This assessment is intended to reduce, but not eliminate uncertainty regarding the potential for RECs in connection with a property and recognized reasonable limits of time and cost.

It should be noted that portions of this Phase I ESA report are based on unverified information supplied to Blackstone by third-party sources. Efforts have been made to substantiate third-party information; however, Blackstone cannot guarantee its completeness or accuracy.

2.4 LIMITATIONS, EXCEPTIONS, AND DATA FAILURE

The work described herein was performed in accordance with the proposed scope of services approved by Blackstone's Client. Environmental issues not specifically addressed in this report, such as services for subsurface or other invasive assessments, or evaluation of business environmental risk, were beyond the scope of our services and not included in our evaluation. Blackstone has performed the services in a manner consistent with that level of care and skill ordinarily exercised by other members of our profession currently practicing in the same locality and under similar conditions, within the limitations of the Standard Practice and the AAI Rule established by the U.S. Environmental Protection Agency (40 CFR Part 312). We have endeavored to meet this standard of care but may have been limited by conditions encountered

during performance, or inability to review information not received by the report date. When appropriate, such limitations are discussed in the report relative to their significance with respect to our findings. No warranties, express or implied, are intended or made.

Limitations identified herein must be considered when the user of this report formulates opinions regarding risks associated with the Subject Property. Additional research and assessment may be performed to further evaluate risks, if requested by the Client. We will, upon request, advise the Client of additional research or assessment options that may be available at an additional cost.

Although Blackstone attempted to obtain reasonably ascertainable information regarding the Subject Property, some information was either not received or not readily available at the time of this report, or a data failure leading to certain information being considered not reasonably ascertainable occurred. Therefore, consistent with ASTM Standard Practice E 1527-21, the following data failure was identified:

- The interior of the Subject Property building could not be accessed due to the unstable condition of the building.

Based on a review of the data failures/data gaps presented above, it is Blackstone's opinion that the lack of access to the interior of the building is not likely to have affected the evaluation of RECs at the Subject Property or to have materially affected the conclusions of the Phase I ESA based on the previous reports available and that the Subject Property use has not changed since the 2022 Phase I ESA.

2.5 VIABILITY OF PHASE I ESA

A Phase I ESA is presumed to be viable when it is conducted within 180 days prior to the date of acquisition of the subject property (or, for transactions not involving an acquisition such as a lease or refinance, the date of the intended transaction). The dates the components were conducted are presented below.

Components	Date
Interview	August 22, 2023
Review of Government Records	August 22, 2023
Visual Inspection	August 22, 2023
Declaration by Environmental Professional	August 24, 2023
Environmental liens (provided by user)	Not provided by User

Based on the dates the components were conducted, this Phase I ESA is viable until February 18, 2024.

2.6 USER RELIANCE

This Phase I ESA report has been prepared for the exclusive use of the City of Clinton. No entities other than City of Clinton may rely on this report without the express written consent by Blackstone and City of Clinton. Unless specifically agreed to in advance by Blackstone, non-compliance with this requirement will release Blackstone from any liability resulting from the use of this report by any unauthorized party. Because Subject Property activities and regulations beyond our control could change at any time after the completion of this report, our observations, findings, and opinions can be considered reliable as of the date of the Subject Property visit but may be limited by material changes in Subject Property circumstances.

2.7 SUBJECT PROPERTY DESCRIPTION

The Subject Property description is presented in this section and describes the condition of the Subject Property at the time of the Phase I ESA. The Subject Property location is shown on Figure 1.

2.7.1 LOCATION DESCRIPTION

TABLE 2-1 SUBJECT PROPERTY DESCRIPTION INFORMATION

Attribute	Information
SUBJECT PROPERTY NAME	Keis Property
ADDRESS/LOCATION	1000 South 4th Street, Clinton, Clinton County, Iowa
City of Clinton Assessor Information (https://clinton.iowaassessors.com/parcel.php?gid=27724)	APN: 80-5970-0000 — Address: 413 10th Avenue South — Total Acres: 0.374
TOTAL AREA	Approximately 0.05 acres
LAND USE	Storage

2.7.2 SUBJECT PROPERTY AND VICINITY GENERAL CHARACTERISTICS

The Subject Property is approximately 0.05-acre in area and developed between 1864 and 1900 with a building. The building is approximately 4,400 square feet in area, two-stories, and was formerly used for retail purposes on the first floor and apartments on the second floor. It is currently used by Central Siding Supply for storage of home improvement building materials and personal items.

2.7.3 CURRENT/PROPOSED USE OF THE PROPERTY

TABLE 2-2 CURRENT/PROPOSED USES

Use	General Observations
CURRENT USE	Storage
PROPOSED USE	New commercial and/or mixed commercial/residential use

2.7.4 CURRENT USES OF ADJOINING PROPERTIES

Blackstone performed a brief drive-by survey of the properties immediately adjoining the Subject Property on August 22, 2023. Table 2-3 summarizes the observed current uses of the adjoining properties.

TABLE 2-3 ADJOINING PROPERTIES

Direction	Land Use Description
NORTH	10th Avenue South and an apartment complex (924 – 926 South 4th Street)
SOUTH	Vacant buildings and collapsed building (1002, 1004, and 1006 – 1008 South 4th Street)
EAST	Central Siding (413 10th Avenue South)
WEST	South 4th Street and vacant land

Obvious indications of RECs associated with hazardous substances or petroleum products were not observed on adjoining properties at the time of the survey.

3 USER PROVIDED INFORMATION

3.1 PHASE I ESA ENVIRONMENTAL QUESTIONNAIRE

A Phase I ESA Environmental Questionnaire was completed by Ms. Lisa Frederick, City Clerk/Deputy City Administrator for the City of Clinton, representing the "User" of this Phase I ESA. Copies of the completed questionnaires are included in Appendix D. Responses to User questions relative to AAI are summarized in the following sections.

3.1.1 REASON FOR PHASE I ESA

The User indicated the City of Clinton owned buildings located at 1006 – 1008 South 4th Street collapsed. The City of Clinton is taking title to the Subject Property in order to complete emergency demolition of the buildings located at 1000, 1002, and 1004 South 4th Street as they have been determined to be dangerous buildings and subject to potential collapse.

3.1.2 CURRENT AND FUTURE USE OF THE PROPERTY

Ms. Frederick indicated the Subject Property is currently used by Central Siding Supply to display a sign. The proposed future use is commercial and/or mixed commercial/residential use as part of redevelopment of the block.

3.1.3 TITLE RECORDS

The City of Clinton Provided a Report of Title by Abstract & Title Guaranty Company dated August 16, 2023. The report was for 413 10th Avenue South, which includes the Subject Property. The report indicates Daniel Keis and Margaret Keis are the last grantee of the parcel by Warranty Deed-Joint Tenancy. Court proceedings, judgements, and liens were not identified.

3.1.4 ENVIRONMENTAL LIENS OR ACTIVITY USE LIMITATIONS

The User was not aware of Environmental Liens or Activity Use Limitations on the Subject Property.

3.1.5 SPECIALIZED KNOWLEDGE

The User indicated they did not have specialized knowledge of the Subject Property.

3.1.6 VALUATION REDUCTION FOR ENVIRONMENTAL ISSUES

Ms. Frederick stated the Subject Property is not being purchased but is free due to costs incurred of having the building demolished.

3.1.7 REASONABLY ASCERTAINABLE INFORMATION

The User did not have reasonably ascertainable information regarding the Subject Property.

3.1.8 OBVIOUS INDICATORS OF CONTAMINATION AT THE SUBJECT PROPERTY

Ms. Frederick did not have knowledge of obvious indicators of contamination at the Subject Property.

3.2 PROVIDED DOCUMENTS

Blackstone was provided previous reports for the Subject Property and a review of the reports provided is below.

Report: Warranty Deed – Joint Tenancy
Date: April 7, 2008
By: None
For: None

The document indicated Jeff Huntley and Donna Huntley conveyed the 413 10th Avenue South Property to Daniel Keis.

Report: Phase I ESA
Date: February 28, 2018
By: Impact 7G
For: City of Clinton

A Phase I ESA was conducted for the properties located at 1000 – 1006 South 4th Street. The report stated that the building addressed as 1000 South 4th Street was constructed in approximately 1864. A vent pipe and fill port typically associated with suspected USTs was observed in the basement of the building. Information regarding the date of installation or use was not identified, but it was assumed to be a heating oil UST. A brick-lined well or cistern was also identified in the basement that was filled with historic debris. The suspected UST and cistern were identified as RECs. The report also identified 413 10th Avenue South as a REC as it was identified as a former auto repair/auto sales shop from 1987 through 1992. An additional investigation was recommended to assess the identified RECs.

Report: Phase II ESA Work Plan
Date: October 1, 2018
By: Impact 7G
For: East Central Intergovernmental Association (ECIA)

The Work Plan detailed the proposed Phase II ESA activities including soil and groundwater sampling and asbestos and lead-based paint sample collection.

Report: Phase II ESA
Date: December 12, 2018
By: Impact 7G
For: ECIA

The Phase II ESA was conducted for the properties located at 1000 – 1006 South 4th Street. The Phase II ESA was conducted by Impact 7G for ECIA to assess the RECs in the Phase I ESA and was dated December 12, 2018. According to the report, due to site constraints, soil samples were not collected from the area of the suspect UST and cistern. The two closest borings to the suspected UST and cistern were approximately 40 and 65 feet away. Two borings were advanced near 1000 South 4th Street to the east and west of the building. The borings were advanced to 11 feet below ground surface (bgs) when refusal was encountered. Groundwater was not encountered in the borings. Soil samples were collected from the borings at depths of between 0 and 2 feet bgs for the analysis of Resource Conservation and Recovery Act (RCRA) 8 metals and 7 to 9 feet bgs for the analysis of volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs), and total extractable hydrocarbons (TEH). VOCs, SVOCs, and TEH were not detected at concentrations above the laboratory detection limit. RCRA 8 metals were detected in the samples at concentrations below the Iowa Statewide Standards. Further action was not recommended.

Report: Phase I ESA
Date: June 20, 2022
By: Blackstone
For: ECIA and the City of Clinton

The Phase I ESA was conducted on the parcel located at 413 10th Avenue South and former 1000 South 4th Street. Based on a review of the historical sources, the 413 10th Avenue South address was developed by at least 1885 with multiple residences. From 1890 through 1909, residences were demolished, and sheds and an icehouse were added. By 1950, it was developed with a residence and a shed. The current building was constructed in 1976 and was occupied by a beer distributor from development through the mid-1980s; insulating materials sales in the mid-1980s; auto sales and repair shop in the early 1990s; trucking company in the mid-1990s; a residence in the early 2000s; and by Central Siding Supply and Illowa Storage from at least 2008 through 2022. The former use of this building as an auto repair shop was considered a REC.

Historical resources indicate the 1000 South 4th Street building was developed by at least 1885 with the current building that was occupied by a grocery store from the 1920s through the 1950s and in the 1980s, and a laundromat from the 1960s through the 2000s. From approximately 2009 to 2022, the building was used for storage for Central Siding Supply and personal storage of the property owner.

During the site reconnaissance, the Subject Property was observed to be two stories with a basement. Storage of building materials and personal belongings were observed on the first and

© 2023 Blackstone Environmental, Inc.

second floor. A brick lined cistern and evidence of a vent pipe potentially associated with USTs were observed in the basement of the building. The presence of the suspected UST was considered a REC to the Subject Property.

RECs were identified in the Phase I ESA and included the presence of a suspected UST in the former 1000 South 4th Street building, the possible presence of a vapor encroachment condition, and the former use of the building located at 413 10th Avenue South as auto repair. Additional investigation was recommended.

Report:	Structural Report
Date:	August 15, 2023
By:	Willett Hofmann & Associates, Inc.
For:	City of Clinton

The letter indicated the building located at 1006 – 1008 South 4th Street (located south of the Subject Property) and that shares a wall with the building located at 1004 South 4th Street, collapsed on August 11, 2023. The shared wall between the structures remains. The report indicated a large portion of the roofing of the 1002 and 1004 South 4th Street building (that also share a wall) are missing. This may cause a rapid decline in the structure located at 1004 South 4th Street. The wall between 1000 and 1002 South 4th Street is also shared and the engineer indicated they could not determine if the shared wall could act as an exposed exterior wall but believed it was constructed as an interior wall. The Subject Property building, as well as the buildings located at 1002 and 1004 South 4th Street, were recommended to be knocked down to a level where a collapse would not allow debris to land on the roadway.

© 2023 Blackstone Environmental, Inc.

4 SUBJECT PROPERTY RECONNAISSANCE

Blackstone's assessment activities included a site reconnaissance. This section summarizes the findings from the site reconnaissance.

4.1 METHODOLOGY AND LIMITING CONDITIONS

Ms. Krista Brodersen of Blackstone performed the site reconnaissance on August 22, 2023. The temperature was approximately 90 degrees Fahrenheit with sunny conditions. The site reconnaissance included a visual inspection of the Subject Property to assist in identifying the presence or likely presence of hazardous substances or petroleum products under conditions that indicate an existing release, a past release, or threat of release into structures, soil, groundwater, or surface water at the Subject Property (RECs). Observations of readily apparent existing conditions are summarized in Table 4-1, and color photographs of the Subject Property are presented in Appendix A. The Subject Property location is shown on Figures 1 and 2.

Blackstone was unaccompanied on the site reconnaissance.

4.2 GENERAL SUBJECT PROPERTY SETTING

The Subject Property totals approximately 0.05-acre in area and is developed with a two-story building with a basement. The building was constructed between 1864 and 1900 and is approximately 4,400 square feet in area and was formerly used for retail purposes on the first floor and apartments on the second floor. This building is currently used by Central Siding Supply for storage of home improvement products and personal storage.

4.3 SUBJECT PROPERTY OBSERVATIONS

Subject Property observations are shown in Table 4-1 and described below.

TABLE 4-1 SUBJECT PROPERTY OBSERVATIONS

Feature	Observed
Aboveground storage tank(s) (ASTs)	
Below grade vaults	
Burned or buried debris	
Chemical storage	
Chemical mixing areas	
Controlled substances	
Discolored soil or water	
Ditches or streams	
Drains and sumps (e.g., floor drains/ trenches, sand / grease traps)	
Drums, totes, and intermediate bulk containers	
Farm waste (e.g., feedlot spoils or manure stockpile)	
Fill dirt from an unknown source	

Feature	Observed
Hazardous substance and petroleum products in connection with identified uses	
Hazardous substance and petroleum products not in connection with identified uses	
Hazardous waste storage	
Heating and cooling system and fuel source	
Industrial waste treatment equipment	
Polychlorinated biphenyl (PCB) containing items	
Pits, ponds, or lagoons	
Pools or sumps of liquid	
Process wastewater	
Septic system (e.g., tank and leach fields)	
Soil piles	
Solid waste/evidence of unauthorized dumping	
Stained pavement, soil, or concrete	
Stains or corrosion (interior, non-water)	
Standing surface water	
Storm drains/catch basins	
Stressed vegetation	
Strong, Pungent, or Noxious Odors	
Sumps and clarifiers	
Surface water	
Underground storage tank(s) (USTs, including heating oil tanks)	
Unidentified substance containers	
Wastewater discharge	
Water supplies (potable and process)	X
Wells (irrigation, monitoring, or domestic)	
Wells (oil and gas)	
Other	

As the Subject Property building was deemed structurally unsound, an interior inspection of the building was not conducted. The owner indicated that the Subject Property interior has remained relatively unchanged since the 2022 site reconnaissance.

The building exterior was observed to be made of brick. Several windows of the building appeared missing.

During the site reconnaissance conducted in 2022, storage of building materials and personal belongings were observed on the first and second floor. Evidence of a former fire was observed on the second floor. The basement was mostly empty. A brick lined cistern and evidence of a vent pipe typically associated with USTs were observed.

The Subject Property is serviced by the City of Clinton water and sewer. Electricity and natural gas are supplied by Alliant Energy. The Subject Property building is not heated or cooled.

Based on the age of the buildings (over 100 years), it is possible that ACM and lead-based paint (LBP) are present.

© 2023 Blackstone Environmental, Inc.

4.4 ADJOINING PROPERTY RECONNAISSANCE

North of the Subject Property is 10th Avenue South followed by an apartment building. To the west are an alley and Central Siding Supply. South are attached vacant commercial/residential buildings. To the east of the Subject Property is South 4th Street followed by vacant, grassed land.

5 RECORDS REVIEW – PHYSICAL SETTING

5.1 PHYSICAL SETTING SOURCE(S)

Table 5-1 presents information about the physical setting of the Subject Property and surrounding area. This information was obtained from published maps and other resources.

TABLE 5-1 PHYSICAL SETTING FOR SUBJECT PROPERTY AND SURROUNDING AREA

PHYSICAL SETTING INFORMATION		SOURCE
Topography		
Subject Property Elevation	600 feet above mean sea level	Environmental Risk Information Services (ERIS) Physical Setting Report dated August 21, 2023
Topographic Gradient	The general topographic gradient in the area of the Subject Property is to the southeast.	
Closest Surface Water	Mississippi river located approximately 2,200 feet to the east of the Subject Property.	
Soil Characteristics		
Soil Types	Downs silt loam	ERIS Physical Setting Report dated August 21, 2023
Description	Soils in this group have moderately high runoff potential when thoroughly wet. Water transmission through the soil is somewhat restricted.	
Hydrogeology		
Geology	Unit Name: Alexandrian Series Unit Age: Phanerozoic, Paleozoic, Silurian Primary Rock Type: dolostone Secondary Rock Type: chert	ERIS Physical Setting Report dated August 21, 2023
Estimated Depth to groundwater	Over 11 feet below ground surface (bgs).	Phase II ESA by Impact 7G dated December 12, 2018
*Hydrogeology**	Not known – expected to be parallel to topographic gradient (towards the southeast)	United States Geological Survey Topographic Map, Clinton, Iowa, dated 2015

**The groundwater flow direction may be expected to follow topography with respect to shallow unconfined groundwater: however, in the absence of site-specific monitoring well information, groundwater flow direction cannot be definitively determined.*

6 RECORDS REVIEW - HISTORICAL USE INFORMATION

Blackstone reviewed historical sources for indications of RECs. Our review was focused on researching historical documents to identify obvious uses. Historical land use was researched to the first developed use of the Subject Property, or back to 1940, whichever is earlier or readily available. The historical use information for the Subject Property and the adjoining properties is presented collectively in this section.

6.1 Historical Topo Maps, Aerial Photographs, and Sanborn Fire Insurance Maps

The ERIS data package included a request for historical topographic maps, historic aerial photographs, and Sanborn Fire Insurance Map for the Subject Property and surrounding areas. The information provided is listed below and copies are included in Appendix B:

- Topographic map: Clinton, Iowa, published in **1976, 1991, 2015,** and **2018** (1:24,000)
- Topographic map: Clinton, Iowa, published in **1891, 1894,** and **1952** (1:62,500)
- Aerial Photographs: ERIS, **1937**, **1951, 1956, 1966, 1976, 1986, 1994, 2004, 2005, 2006, 2007, 2008, 2009, 2010, 2011, 2013, 2014, 2015, 2017, 2019, and 2021** (1"=500')
- Sanborn Fire Insurance Maps: **1885, 1890, 1897, 1902, 1909, 1917, 1925, 1950,** and **1967.**

TABLE 6-1 HISTORICAL INFORMATION REVIEW

Direction	Description
Subject Property	According to a review of Sanborn Fire Insurance maps dated 1885 through 1902, the Subject Property was developed with the current building that was occupied by a grocery. In the 1909 map, it was used as a saloon and as a grocery in the 1917 map. From at least 1925 through 1967, the Subject Property was used as a retail store and warehouse. The aerial photographs show the Subject Property appearing relatively unchanged through 2021.
North	The 1885 Sanborn Fire Insurance map depicts 10th Avenue north of the Subject Property, beyond are several connected buildings. From 1885 through 1967, the buildings were occupied by grocery stores, residences, barber, a dancing hall, drug store, cigar store, cigar factory, paint and wallpaper store, meat shop, cabinet maker, bank, and bakery. The building closest to the Subject Property appeared to be developed with the current apartment building by 1983.
East	From at least 1885 through 1925, the area east of the Subject Property was developed with South 4th Street followed by residences. By 1950, a gasoline station with three USTs was east of the Subject Property (1001 South 4th Street). The 2004 through 2019 aerial photographs show the area east of the Subject Property beyond 4th Street South as vacant land.
South	By 1885, the area south of the Subject Property was developed with several connected buildings. From 1885 through 1967, the buildings were occupied by a grocery, hardware store, residences, a shed, a vacant building, tin shops, harness and

TABLE 6-1 HISTORICAL INFORMATION REVIEW

Direction	Description
	leather business, restaurant. warehouse, residences, and a clothing factory. The aerial photographs through 2021 show the area as relatively unchanged.
West	The Sanborn Fire Insurance map dated 1885 depicted the area as developed with seven residences. By 1890, five residences were present as well as an icehouse. Three houses, an icehouse, and two sheds were located in the area in the 1897 Sanborn Fire Insurance map. By 1902, a warehouse for the Subject Property grocery store had been constructed. One residence, an icehouse, several sheds, and a hardware warehouse were located to the east by 1909. In the 1950 and 1967 maps, the area was developed with a residence and a shed. By 1983, the aerial shows the area developed with the current building. The area appears relatively unchanged through 2021.

Note: USGS topographic maps may not show individual structures present within an area designated as, and shaded as, "Urban Area." While observations may suggest no structures are shown, that does not necessarily indicate there were no structures on the property.

6.2 Historical City Street Directories

Historical city directories can provide an indication of the type of use of the Subject Property and adjoining areas by street address. ERIS' report package included a search of historical city directories from 1925 to 2022 in the general vicinity of the Subject Property. Table 6.2 below summarizes listings provided by ERIS for the Subject Property (if applicable) and nearby identified facilities. Information for all listed facilities is included in Appendix B.

6.3 Historical Use Summary

Based on a review of the historical sources, the Subject Property was developed by at least 1885 with the current building that was occupied by a grocery store from the 1920s through the 1950s and in the 1980s, and a laundromat from the 1960s through the 2000s. From approximately 2009 to the present, the Subject Property building has been used for storage for Central Siding Supply and personal storage of the owner.

The surrounding areas were developed with residential properties and retail businesses beginning in at least 1885 through 2020. Businesses have included a beer distributor, bookstore, video store, ministry, restaurants, taverns, employment services, upholstering, custom furniture, used clothes store, barber, warehouse, pharmacies, offices, hardware store, beauty shop, grocery, laundromat, and gasoline stations. Two gasoline stations were adjacent east of the Subject Property from at least 1937 through the 1970s. The gasoline stations are discussed in Section 7.3.

7.0 STANDARD ENVIRONMENTAL RECORD SOURCES

Federal, state, and local regulatory agencies publish databases or lists of businesses and properties that handle hazardous substances or petroleum products or are the known location of a release of hazardous substances to soil and/or groundwater. Blackstone contracted a commercial database service, ERIS, of Ontario, Canada to perform the government database search.

A description of the types of information contained in each of the databases reviewed, the agency responsible for compiling the data, and date each database was last updated is included in the radius map report located in Appendix C. Table 7.1 below lists the databases within the ASTM minimum search distances from the Subject Property.

TABLE 7-1 RECORDS REVIEW, SEARCH DISTANCE, AND FINDINGS

Database	Description	Radius (Miles)	Listings Reported
Federal			
NPL	EPA National Priority List (NPL) – EPA's list of uncontrolled or abandoned hazardous waste facilities listed for priority services under the Superfund Program.	1.0	0
NPL (Delisted)	The NPL Delisted refers to facilities that have been removed from the NPL.	0.5	0
CERCLIS	The Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS) database includes facilities that EPA has or is currently investigating for a release or threatened release of hazardous substances.	0.5	0
CERCLIS/ NFRAP	CERCLIS-No Further Remedial Action Planned (NFRAP). No further remedial action planned after EPA investigation.	0.5	0
RCRA CORRACTS/ TSD	EPA list of Resource Conservation Recovery Act (RCRA) facilities associated with treatment, storage or disposal of hazardous waste that are undergoing corrective action. Corrective Action is required when there has been a "release" of hazardous waste constituents into the environment.	1.0	0
RCRA Non-CORRACTS/ TSD	EPA list of facilities that report treatment, storage, or disposal of hazardous waste, that are not subject to Corrective Action under RCRA.	0.5	0
RCRA Generators	EPA database of facilities that generate hazardous waste as part of their normal business practice; generators of hazardous waste are regulated under RCRA. Generators are either small quantity generators (SQG), large quantity generators (LQG), or conditionally exempt small quantity generators (CESQG).	Subject Property and adjoining properties	0

TABLE 7-1 RECORDS REVIEW, SEARCH DISTANCE, AND FINDINGS

Database	Description	Radius (Miles)	Listings Reported
US ENG/INST CONTROLS (IC/EC)	EPA listings of sites with institutional controls (deed restrictions, use restrictions, etc.), or engineering controls (caps, liners, etc.), which include administrative or physical controls for waste/contamination and/or to restrict potential exposure to contamination.	Subject Property	0
ERNS	The Emergency Response Notification System (ERNS) is an EPA list of reported releases of oil and hazardous substances.	Subject Property	0
State			
SHWS	State and tribal equivalent CERCLIS sites.	1.0	0
SWF/LF	State/tribal database of solid waste facilities.	0.5	2
LUST/LAST	State/tribal database of leaking underground and above-ground storage tanks.	0.5	12
UST/AST	State/tribal database of registered storage tanks.	Subject Property and adjoining properties	0
INST CONTROL	Sites having institutional controls in the state of Iowa.	Subject Property	0
CONT	State/tribal facilities included in the Iowa Land Recycling Program.	0.5	10
Brownfields	State/tribal listing of Brownfield properties.	0.5	30

7.1 ADDITIONAL ENVIRONMENTAL RECORD SOURCES

In addition to the above ASTM-required databases, Blackstone reviewed other federal, local, and proprietary databases that are included by ERIS in their report. The additional records/databases searched are included in ERIS' report in Appendix C. The additional environmental record sources were used by Blackstone in our assessment of potential RECs.

7.2 RESULTS OF DATABASE SEARCH

The findings provided in the ERIS report within the ASTM-specified search distances were reviewed and pertinent findings are discussed below. The following table summarizes the site-specific information provided by the database for the Subject Property (if applicable) and nearby identified facilities. Information for all listed facilities is included in Appendix C.

© 2023 Blackstone Environmental, Inc.

TABLE 7-2 DATABASE SEARCH RESULTS

DATABASE LISTINGS	FACILITY NAME/ADDRESS	REC (Y/N)
Facility Registry Service/Facility Index (FINDS/FRS) and Federal Brownfields	1000 South 4th Street	Yes
The Subject Property was identified on the FINDS/FRS and Federal Brownfields database in 2019. The database indicated a vent pipe and fill port were identified in the basement of the building and the adjacent property was used historically for auto repair. The possible presence of an UST at the Subject Property is considered a REC.		
FINDS/FRS and Federal Brownfields	1002 South 4th Street	No
This property is located adjacent south of the Subject Property and was identified on the FINDS/FRS and Federal Brownfields database in 2018. The database indicated the building was constructed in 1868 and was most recently used as a rental property. It was listed as vacant and in foreclosure. The City of Clinton plans to demolish the buildings and redevelop the property for commercial use. Environmental concerns were not identified in the databases and therefore, the property is not considered a REC to the Subject Property.		
FINDS/FRS and Federal Brownfields	1004 South 4th Street	No
This property is located adjacent south of the Subject Property and was identified on the FINDS/FRS and Federal Brownfields database in 2018. The database indicated the building is vacant and has been abandoned. The City of Clinton plans to demolish the buildings and redevelop the property for commercial use. Environmental concerns were not identified in the databases and therefore, the property is not considered a REC to the Subject Property.		
FINDS/FRS and Federal Brownfields	1006-1008 South 4th Street	No
This property is located adjacent south of the Subject Property and was identified on the FINDS/FRS and Federal Brownfields database in 2018. The database indicated the building was constructed in 1900. Environmental concerns were not identified in the databases and therefore, the property is not considered a REC to the Subject Property.		
UST and FINDS/FRS	Dillions One Stop 1001 South 4th Street	No
The listing is for a former gasoline station located less than 100 feet east and cross to downgradient from the Subject Property. According to information reviewed on the Iowa Department of Natural Resources (IDNR) website, the former facility operated four 6,000-gallon USTs that contained gasoline and diesel that were installed in 1969 and removed in 1996. Two 500-gallon USTs were also present with unknown contents. These USTs were installed on an unknown date and were removed in 1996. The USTs received a No Further Action letter from the IDNR on November 27, 1996. The facility was not identified as having a leak. Based on the regulatory status and the cross to downgradient location from the Subject Property, the property is not considered a REC.		
FINDS/FRS and UST	James Rasmussen 410 11th Avenue South	No
This property is located approximately 140 feet south of and crossgradient to the Subject Property. It was identified on the FINDS/FRS and UST databases. The database indicated a 500-gallon UST was installed on the property in 1949 and ceased operations in 1977. The UST was filled in place in 1989. The IDNR online database indicates the UST contained gasoline and was issued a No Further Action letter on December 1, 1989. The property was not identified as having a leak. Based on the regulatory status and the crossgradient location from the Subject Property, the property is not considered a REC to the Subject Property.		

FED Brownfields	Delbert and Colleen Temple Properties 421 and 423 11th Avenue South	No
This property is located approximately 150 feet south of and downgradient to the Subject Property and was identified on the Federal Brownfields database in 2004. The database indicated a Phase I ESA was conducted. The property was originally residential but then was commercially developed. Environmental concerns were not identified in the database and therefore, the property is not considered a REC to the Subject Property.		
Fed Brownfields	411 and 415 11th Avenue South	No
This property is located approximately 150 feet south of and downgradient to the Subject Property and was identified on the Federal Brownfields database in 2004. The database indicated a Phase I ESA was conducted. The property was originally residential but then was commercially developed. Environmental concerns were not identified in the database and therefore, the property is not considered a REC to the Subject Property.		
Fed Brownfields	Family Dollar Store 429-435 11th Avenue South	No
This property is located approximately 150 feet south of and downgradient to the Subject Property and was identified on the Federal Brownfields database in 2004. The database indicated a Phase I ESA was conducted. The property was originally an auto repair shop and a marble company. Based on the distance and direction from the Subject Property and that this property is not identified on a database indicating that a leak has occurred, the property is not considered a REC to the Subject Property.		
Fed Brownfields	Bossen Properties 425-433 11th Avenue South	No
This property is located approximately 150 feet south of and downgradient to the Subject Property and was identified on the Federal Brownfields database in 2004. The database indicates a Phase I ESA was conducted. The property was originally residential but then was commercially developed. Environmental concerns were not identified in the database and therefore, the property is not considered a REC to the Subject Property.		
Fed Brownfields	Dairy Queen Property 411 11th Avenue South	No
This property is located approximately 150 feet south of and downgradient to the Subject Property and was identified on the Federal Brownfields database in 2004. The database indicated a Phase I ESA was conducted. The property was historically developed with commercial businesses and residences. Environmental concerns were not identified in the database and therefore, the property is not considered a REC to the Subject Property.		
Fed Brownfields	Charles and Barbara Westbrook Property 1110 South 4th Street	No
This property is located approximately 200 feet south of and downgradient to the Subject Property and was identified on the Federal Brownfields database in 2004. The database indicated a Phase I ESA was conducted. Historically, the property was developed with a two-story structure that was a machine shop and miscellaneous retail. Based on the distance and direction from the Subject Property and that this property is not identified on a database indicating that a leak has occurred, the property is not considered a REC to the Subject Property.		
UST and Leaking UST (LUST)	Clinton Car Company 1100 South 4th Street	No
This facility is located approximately 200 feet south of and downgradient to the Subject Property and was identified as operating an UST and having a LUST. The database indicated the facility operated two 5,000-gallon gasoline USTs and one 500-gallon waste oil UST. The date of installation was listed as December 1, 1900, which generally indicates the date is unknown. The USTs ceased operations in 1982 and were removed in 1990. The IDNR online database indicated that the USTs received a No Further Action (NFA) letter on November 9,		

1990. Based on the regulatory status and the downgradient location, the property is not considered a REC to the Subject Property.		
UST and LUST	City of Clinton Property #2 1101-1105 South 4th Street	No
This facility is located approximately 200 feet south of and downgradient to the Subject Property and was identified as operating an UST and having a LUST. The database indicated the facility operated an UST that was identified as a "pre-1974" tank. Further information on the details of the tank were not provided in the database or the IDNR database. The IDNR database indicated a leak of waste oil and diesel was reported in 2004. The IDNR issued a NFA letter for the facility on August 9, 2006. Based on the regulatory status and the downgradient location, the property is not considered a REC to the Subject Property.		
FED Brownfields and Contaminated Sites	Liphardt Property Former Railroad Depot 325 11th Avenue South	No
This property is located approximately 350 feet southeast of and downgradient to the Subject Property and was identified on the Federal Brownfields database in 2006. The database indicated a Phase I ESA was conducted. Historically, the property was developed with residences before being occupied by a water tower. Petroleum contamination was identified and reportedly cleaned up. A Phase I ESA was conducted at the Former Railroad Depot in 2010 that indicated the property contained industrial and residential properties in the late 1800s to early 1900s. A passenger railroad depot was constructed in 1915 and used until 1970. A Phase II Assessment was reportedly conducted in 2011. According to information identified on the IDNR contaminated Sites Online database, soil and groundwater samples were collected at the property and the only exceedance of the Iowa Statewide Standards was motor oil in groundwater. Because receptors were not identified, the EPA issued a No Further Action Letter for the property on July 21, 2017. Based on the regulatory status and the distance and direction from the Subject Property, it is not considered a REC.		

The remaining facilities listed in the database report (Appendix C) are not considered RECs to the Subject Property at this time based upon regulatory status, apparent topographic gradient, and/or distance from the Subject Property.

7.2.1 Orphan Sites

Orphan sites are unmapped facilities that do not contain sufficient address or location information to be mapped relative to the Subject property. Two orphan sites were identified in the environmental database report. Based on the available information, the listings are related to ADM which is over 700 feet south from the Subject property and therefore are not of concern.

7.2.2 Subject Property and Vicinity Observation Wells

A search for various types of wells was included in ERIS's Physical Setting Report (Appendix D). Wells were not identified on the Subject Property.

7.3 OTHER RECORDS REVIEWED/AGENCIES CONTACTED

Additional sources of environmental records were evaluated as part of this Phase I ESA for reasonably ascertainable and/or practically reviewable documentation regarding RECs present

at the Subject Property and adjoining properties. The additional sources contacted are discussed in the following sections.

7.3.1 City of Clinton Assessor

The City of Clinton's Assessor's website was reviewed for information regarding the Subject Property. According to the website, the Subject Property is owned by Daniel H and Margaret A Keis and is doing business as Central Site Supply. The Subject Property is developed with a two-story building plus basement that was constructed by 1885 and is approximately 4,400 square feet in area. The building was used as a retail business.

7.3.2 City of Clinton

The City of Clinton was contacted by Blackstone for building and fire department records associated with the Subject Property. The Fire Department indicated they did not have records for the Subject Property. The building department provided a log of permits for the Subject Property that included the following:

- April 22, 1965 – a permit for a commercial addition by Western Oil and Fuel Company.
- August 9, 1989 – a permit for a sign by Quality Auto Body and Sales.
- September 9, 2009 – a permit to reroof the building by Dan Keis.

A log of permits for the address of 413 10th Avenue South was also provided that included the following:

- August 23, 1976 – a permit for a warehouse by James Rasmussen.
- August 4, 1981 – a permit for a commercial addition by James Rasmussen.
- October 4, 1988 – a permit for a sign by Ronal Hinz.
- December 17, 1991 – a permit for a sign by Ronald Metz.
- September 12, 2008 – a permit for a sign by Dan Keis.
- December 2, 2009 – a permit for 200 amp service by Dan Keis.
- December 3, 2009 – a permit for a sign by Dan Keis.

The City also indicated in an email dated August 22, 2023 that the 1000 South 4th Street and 413 10th Avenue South addresses were combined in 2009.

7.3.3 IDNR

Blackstone accessed the IDNR online Contaminated Sites and Underground Storage Tank Databases for records of the Subject Property. Records for the Subject Property were not identified. Records reviewed for surrounding properties are summarized in Section 7.2.

8 VAPOR ENCROACHMENT SCREEN

8.1 VAPOR ENCROACHMENT SCREEN

Vapor intrusion occurs when there is a migration of volatile chemicals from contaminated groundwater or soil into an overlying building. A Vapor Encroachment Screen identifies releases on and near the Subject Property and evaluates the likelihood of vapors migrating to the subsurface of the Subject Property. Based on the information reviewed for this report, an UST is potentially present in the basement of the Subject Property and the property located at 413 South 10th Avenue was formerly used for auto repair. Based on the presence of the suspected UST and the former use of the adjacent property as auto repair, it is possible a vapor encroachment condition exists at the Subject Property.

9.0 INTERVIEWS

Interviews with key Subject Property representatives were conducted as available.

9.1 INTERVIEWS WITH CURRENT OWNER / SITE MANAGER / OCCUPANT

Blackstone interviewed the owner of the Subject Property, Mr. Dan Keis. He stated he purchased the Subject Property in approximately 2009. He has a business that is adjacent to the west of the Subject Property and wanted to put signage for this business on South 4th Street. In order to place signage on the street, he had to purchase the Subject Property building and conduct business in that building. Since the Subject Property was purchased, he has used the building for storage for his business Central Siding Supply and for personal storage. When he purchased the Subject Property, he indicated the building did not have floors due to age and a past fire. He rebuilt all the floors in the building. He was not aware of the presence of the cistern and suspect UST and did not have information about either. He indicated the Subject Property was formerly used as a laundromat. Mr. Keis was unaware of environmental concerns at the Subject Property.

9.2 INTERVIEWS WITH PAST OWNERS AND OCCUPANTS

Previous owners or occupants of the Subject Property were not available for interview.

9.3 INTERVIEWS WITH STATE AND LOCAL GOVERNMENT OFFICIALS

Interviews with State and local government officials are described in Section 4.5.

10.5 FINDINGS

Blackstone has completed a Phase I ESA for a portion the property located at located at 413 10th Avenue South (formerly 1000 South 4th Street) in Clinton, Clinton County, Iowa (Subject Property).

The Subject Property is a portion of the property addressed as 413 10th Avenue South (former 1000 South 4th Street), identified as City of Clinton Assessor Parcel Number (APN) 8059700000 located in Clinton, Clinton County, Iowa (Subject Property). The parcel totals approximately 0.374-acre in area and is developed with two buildings. The owner of the parcel originally owned the building addressed as 413 10th Avenue South. The owner purchased the property formerly addressed as 1000 South 4th Street in approximately 2009. At that time, the addresses of the two buildings were combined, and the address for both buildings is currently 413 10th Avenue South. The building located at 413 10th Avenue South is not included in this Phase I ESA. The 0.05 acre portion of the parcel formerly addressed as 1000 South 4th Street is considered the Subject Property. It was constructed prior to 1885 and is approximately 4,400 square feet in area, two-stories, and was formerly used for retail purposes on the first floor and apartments on the second floor. This building is currently used by Central Siding Supply for storage of home improvement products and personal storage.

North of the Subject Property is 10th Avenue South followed by an apartment building. To the west are an alley and Central Siding Supply. South are attached vacant commercial/residential buildings. To the east of the Subject Property is South 4th Street followed by vacant, grassed land.

Based on a review of the historical sources, the Subject Property was developed by at least 1885 with the current building that was occupied by a grocery store from the 1920s through the 1950s and in the 1980s, and a laundromat from the 1960s through the 2000s. From approximately 2009 to the present, the Subject Property building has been used for storage for Central Siding Supply and personal storage of the property owner.

Historical city directories indicate the surrounding areas were developed with residential properties and retail businesses beginning in at least 1885 through 2020. Businesses have included a beer distributor, bookstore, video store, ministry, restaurants, taverns, employment services, upholstering, custom furniture, used clothes store, barber, warehouse, pharmacies, offices, hardware store, beauty shop, grocery, laundromat, and gasoline stations. Two gasoline stations were located adjacent and east of the Subject Property from at least 1937 through the 1970s. Based on their regulatory status and the downgradient direction from the Subject Property, the gasoline stations are not considered RECs.

The interior of the Subject Property building could not be accessed due to the unstable condition of the building.

A Phase I ESA and Phase II ESA, dated 2018, were provided by the City of Clinton for the properties located at 1000 – 1006 South 4th Street in Clinton, Iowa. The reports include the suspected UST and cistern were identified as RECs. The report identified the building at 413 10th Avenue South as a REC as it was identified as a former auto repair/auto sales shop from 1987 through 1992. The Phase II ESA was conducted to assess the RECs identified in the Phase I ESA. According to the report, due to site constraints, soil samples were not collected from the area of the suspected UST and cistern. The two closest borings to the suspected UST and cistern were approximately 40 and 65 feet away. Two borings were advanced near 1000 South 4th Street to the east and west of the building. The constituents of concern were not identified in soil samples above the Iowa Statewide Standards. Further action was not recommended. However, based on the distance of the borings from the suspected UST and cistern (40 and 60 feet away) and that soil and groundwater samples were not obtained, the suspected areas of concern that may have impacted soil and groundwater do not appear to have been adequately assessed at that time. A Phase I ESA for the Subject Property and the property located at 413 10th Avenue South, dated June 2022, was provided by the City of Clinton. The Phase I ESA identified several RECs that included a suspected UST located in the basement of the Subject Property, the former use of the adjacent 413 10th Avenue South property as auto repair, and a possible vapor encroachment condition at the Subject property.

Based on the age of the Subject Property building (over 100 years), it is possible that ACM and LBP are present.

The Subject Property was identified on the environmental database report as a Federal Brownfields facility in 2019. The database indicated a vent pipe and fill port were identified in the basement of the building and the adjacent property was used historically for auto repair. The possible presence of an UST at the Subject Property is considered a REC. Other facilities identified on the environmental database are not considered concerns due to their regulatory status, and/or distance and direction from the Subject Property.

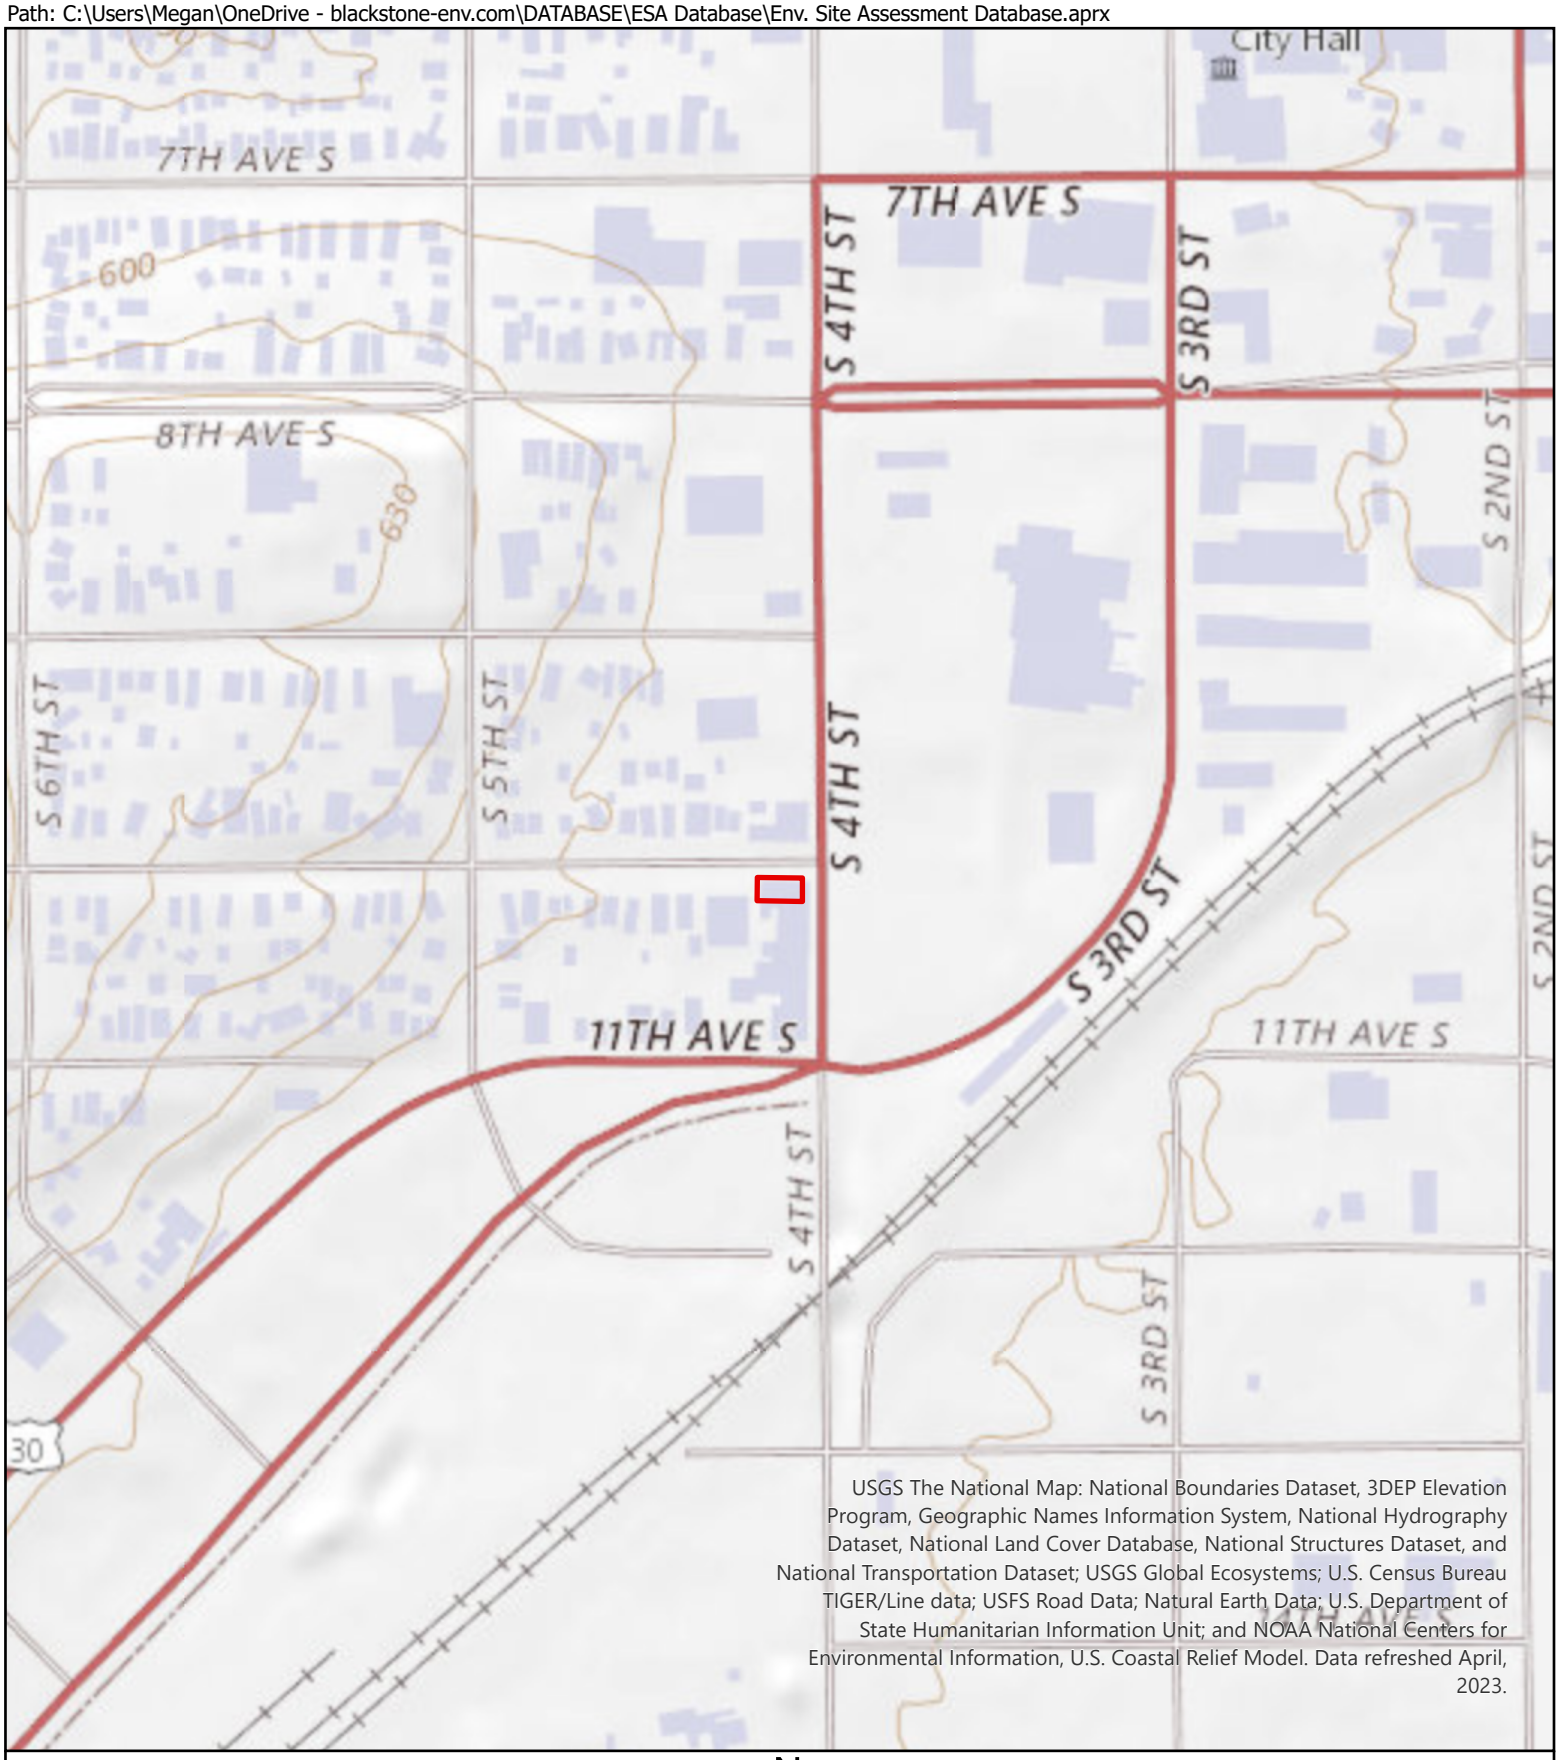
10.2 CONCLUSIONS

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-21 of a portion of the property addressed as 413 10th Avenue South (former 1000 South 4th Street), identified as City of Clinton Assessor Parcel Number (APN) 8059700000 located in Clinton, Clinton County, Iowa, the Subject Property. Any exceptions to, or deletions from, this practice are described in Section 2 of this report. This assessment has revealed the following RECs in connection with the Subject Property:

- The presence of a suspected UST in the former 1000 South 4th Street building.
- The former use of the adjacent building located at 413 10th Avenue South as auto repair.
- The possible presence of a vapor encroachment condition at the Subject Property.

CRECs, HRECs, and de minimus conditions were not identified.

10.3 RECOMMENDATIONS



In order to evaluate the potential environmental impacts related to the identified RECs, additional investigation is recommended.

11.0 REFERENCES

References used for this report are presented throughout the text and in the Appendices.

RE: CITY DIRECTORY RESEARCH
1000 South 4th Street
Clinton,IA 52732

Thank you for contacting ERIS for an City Directory Search for the site described above. Our staff has conducted a reverse listing City Directory search to determine prior occupants of the subject site and adjacent properties. We have provided the nearest addresses(s) when adjacent addresses are not listed. If we have searched a range of addresses, all addresses in that range found in the Directory are included.

Note: Reverse Listing Directories generally are focused on more highly developed areas. Newly developed areas may be covered in the more recent years, but the older directories will tend to cover only the "central" parts of the city. To complete the search, we have either utilized the ACPL, Library of Congress, State Archives, and/or a regional library or history center as well as multiple digitized directories. These do not claim to be a complete collection of all reverse listing city directories produced.

ERIS has made every effort to provide accurate and complete information but shall not be held liable for missing, incomplete or inaccurate information. To complete this search we used the general range(s) below to search for relevant findings. If you believe there are additional addresses or streets that require searching please contact us at 866-517-5204.

Search Criteria:
400-440 of S 10th Ave
900-1030 of S 4th St

Notice: IMPORTANT LIMITATIONS and YOUR LIABILITY

Reliance on information in Report: This report DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as database review of environmental records.

License for use of information in Report: No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

Your Liability for misuse: Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

No warranty of Accuracy or Liability for ERIS: The information contained in this report has been produced by ERIS Information Inc. ("ERIS") using various sources of information, including information provided by Federal and State government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

Executive Summary

Property Information:

Project Property:		*1000 South 4th Street* *1000 South 4th Street Clinton IA 52732*
Project No:		*3563*
Coordinates:		
	Latitude:	*41.83515514*
	Longitude:	*-90.19352926*
	UTM Northing:	*4,635,282.26*
	UTM Easting:	*733,034.57*
	UTM Zone:	*UTM Zone 15T*
Elevation:		*597 FT*

Order Information:

Order No:	*23082100371*
Date Requested:	*August 21, 2023*
Requested by:	*Blackstone Environmental*
Report Type:	*Database Report*

Historicals/Products:

Aerial Photographs	*Historical Aerials (with Project Boundaries)*
City Directory Search	*CD - 2 Street Search*

Desc Hist: The property is owned by Daniel and Margaret Keis. It is located in a primarily residential/commercial area of Clinton, Iowa. The building consists of an approximately 4,140 square foot commercial building (calculated as two-story building). The existing structure was originally constructed circa 1864. One vent pipe and fill port characteristic of an underground storage tank was observed in the basement. A brick-lined well or cistern was observed as well in the basement. Historic documents show that the adjacent property was an auto repair/auto sales shop.

Highlights: Phase I recommended further investigation to confirm no impact of any contaminants. A Phase II was prepared in 2018. Based on the results of the Phase II no further action was recommended apart from additional investigation in the property basement to further evaluate the presence of a suspected UST. Additionally, given the age of the building ACM and LBP sampling and testing should be conducted for the structure prior to renovation or demolition activities occur. As of March 2020 no additional testing has been conducted. Former Use: The property is owned

by Daniel and Margaret Keis. It is located in a primarily residential/commercial area of Clinton, Iowa. The building consists of an approximately 4,140 square foot commercial building (calculated as two-story building). The existing structure was originally constructed circa 1864. One vent pipe and fill port characteristic of an underground storage tank was observed in the basement. A brick-lined well or cistern was observed as well in the basement. Highlights: Phase I recommended further investigation to confirm no impact of any contaminants. A Phase II was prepared in 2018. Based on the results of the Phase II no further action was recommended apart from additional investigation in the property basement to further evaluate the presence of a suspected UST. Additionally, given the age of the

building ACM and LBP sampling and testing should be conducted for the structure prior to renovation or demolition activities occur. As of March 2020 no additional testing has been conducted. Former Use: The property is owned by Daniel and Margaret Keis. It is located in a primarily residential/commercial area of Clinton, Iowa. The building consists of an approximately 4,140 square foot commercial building (calculated as two-story building). The existing structure was originally constructed circa 1864. One vent pipe and fill port characteristic of an underground storage tank was observed in the basement. A brick-lined well or cistern was observed as well in the basement. Historic documents show that the adjacent property was an auto repair/auto sales shop.

Highlights: Phase I recommended further investigation to confirm no impact of any contaminants. A Phase II was prepared in 2018. Based on the results of the Phase II no further action was recommended apart from additional investigation in the property basement to further evaluate the presence of a suspected UST. Additionally, given the age of the building ACM and LBP sampling and testing should be conducted for the structure prior to renovation or demolition activities occur. As of March 2020 no additional testing has been conducted. Former Use: The property is owned by Daniel and Margaret Keis. It is located in a primarily residential/commercial area of Clinton, Iowa. The building consists of an approximately 4,140 square foot commercial building (calculated as two-story building). The existing structure was originally constructed circa 1864. One vent pipe and fill port characteristic of an underground storage tank was observed in the basement. A brick-lined well or cistern was observed as well in the basement. Historic documents show that the adjacent property was an auto repair/auto sales shop.

Desc Hist:	The property was built in 1868 and has most recently been used as rental property. The property is currently vacant and in foreclosure. The property is currently located in a primarily residential/commercial area of Clinton, Iowa. Adjacent properties have presence of vent pipe and fill port characteristic of underground storage tank and brick-lined well/cistern filled with historic debris. Another adjacent property has a history as an auto repair/auto sales shop. The city acquired the property and plans to redevelop it

Highlights: The detected concentrations for contaminates were below the most restrictive ILRP SWS for soil or below laboratory reporting limits. Asbestos and Lead based paint sampling is still needed on the property. The city obtained title to the property. The city plans to demolish the buildings and redevelop the site into commercial use consistent with the character of downtown. Former Use: The property was built in 1868 and has most recently been used as rental property. The property is currently vacant and in foreclosure. The property is currently located in a primarily residential/commercial area of Clinton, Iowa. Adjacent properties have presence of vent pipe and fill port characteristic of underground storage tank and brick-lined well/cistern filled with historic debris. Another adjacent property has a history as an auto repair/auto sales shop. The city acquired the property and plans to redevelop it

Highlights: The RCRA metals concentrations from soil samples collected at the Property were below the most restrictive DNR ILRP SWS for soil or below laboratory reporting limits. Additional asbestos and lead based paint sampling is still needed on the site. The city plans to acquire and redevelop the site. Former Use: The property is currently owned by SAP Rental LLC Series 1. The building consists of an approximately 4,676 square foot building (calculated three-story building). The structure was originally constructed circa 1900. Adjacent properties have found a vent pipe and fill port characteristic of an underground storage tank and a brick-lined well or cistern filled with historic debris. Highlights: The RCRA metals concentrations from soil samples collected at the Property were below the most restrictive DNR ILRP SWS for soil or below laboratory reporting limits. Additional asbestos and lead based paint sampling is still needed on the site. The city plans to acquire and redevelop the site. Former Use: The property is currently owned by SAP Rental LLC Series 1. The building consists of an approximately 4,676 square foot building (calculated three-story building). The structure was originally constructed circa 1900. Adjacent properties have found a vent pipe and fill port characteristic of an underground storage tank and a brick-lined well or cistern filled with historic debris. Along with another adjacent property with a history of operating an auto repair/auto sales shop.

Desc Hist: The property was built in 1900 and has most recently been used as bar, until the business was shut down in 2008 due to the condition of the building. The building is currently vacant and has been abandoned. Previous uses are unknown at this time. The building is blighted and is part of a larger block of buildings with shared walls. The city had previously looked at demolition of the property in 2008, but funds were not available to proceed at that time. The city is currently pursuing a 657A (nuisance) process to take title to the property. The city plans to demolish the buildings and redevelop the site into commercial use consistent with the character of downtown.

Highlights: The detected RCRA metals concentrations from soil samples collected at the Property were below the most restrictive DNR ILRP SWS for soil or below laboratory reporting limits. Asbestos and lead based paint sampling is still needed on the site given age of structure. The city planned to acquire and redevelop the site. Former Use: The property was built in 1900 and has most recently been used as bar, until the business was shut down in 2008 due to the condition of the building. The building is currently vacant and has been abandoned. Previous uses are unknown at this time. The building is blighted and is part of a larger block of buildings with shared walls. IC Addl Info:
Highlights: The detected RCRA metals concentrations from soil samples collected at the Property were below the most restrictive DNR ILRP SWS for soil or below laboratory reporting limits. Asbestos and lead based paint sampling is still needed on the site given age of structure. The city planned to acquire and redevelop the site. Former Use: The property was built in 1900 and has most recently been used as bar, until the business was shut down in 2008 due to the condition of the building. The building is currently vacant and has been abandoned. Previous uses are unknown at this time. The building is blighted and is part of a larger block of buildings with shared walls. The city had previously looked at demolition of the property in 2008, but funds were not available to proceed at that time. The city is currently pursuing a 657A (nuisance) process to take title to the property. The city plans to demolish the buildings and redevelop the site into commercial use consistent with the character of downtown.

IC Addl Info:
Highlights: The detected RCRA metals concentrations from soil samples collected at the Property were below the most restrictive DNR ILRP SWS for soil or below laboratory reporting limits. Asbestos and lead based paint sampling is still needed on the site given age of structure. The city planned to acquire and redevelop the site. Former Use: The property was built in 1900 and has most recently been used as bar, until the business was shut down in 2008 due to the condition of the building. The building is currently vacant and has been abandoned. Previous uses are unknown at this time. The building is blighted and is part of a larger block of buildings with shared walls. The city had previously looked at demolition of the property in 2008, but funds were not available to proceed at that time. The city is currently pursuing a 657A (nuisance) process to take title to the property. The city plans to demolish the buildings and redevelop the site into commercial use consistent with the character of downtown.

Highlights: The Liphardt Property was initially investigated under the EPA USTFields Program. Petroleum products identified as diesel fuel and waste oil were detected in groundwater. The subject property and adjacent property to the west, which historically had a gasoline UST, are being investigated under the Iowa LUST Program. Subsequent soil sampling has not located a source are on either property and groundwater contaminant concentrations are below laboratory reporting limits. Former UST properties are located on the neighboring properties to the north, northwest, and west. (PPF – Liphardt Property, 7/26/06) Former Use: The property was residentially developed and then occupied by a water tower.

Highlights: ¿ None of the detected constituents were above the applicable standards for Range 1 or Range 2 soil samples. • Two of the proposed groundwater samples were not collected due to shallow bedrock. The concentration of TEH as Motor Oil at Depot-2 exceeded the Tier 1 Lookup Value for a Protected Groundwater Source, but was below the Tier 1 Lookup Value for Non-Protected Groundwater. No constituents detected above any applicable standard in the soil samples collected at the Former Rail Depot. Groundwater encountered at one of the three proposed locations. The concentration of TEH as Motor Oil at Depot-2 exceeded the Tier 1 Lookup Value for an actual receptor, but was below the Tier 1 Lookup Value for a potential receptor. The City has an ordinance prohibiting the installation of drinking water wells within the Liberty Square Corridor, and no water wells currently exist within 1,000 feet downgradient of the site. The risk appears to be minimal, however the Tier 1 Lookup Values were exceeded and this report should be supplied to IDNR for further guidance. Former Use: The property contained both industrial and residential development from approximately 1897 to 1909. The industrial use included a coal shed and a wood storage yard. A railroad constructed a passanger rail depot in 1915. Use of the structure as a depot continuted until approximately 1970. Subsequent owners have used the building for commercial-retail purposes since 1970. Melvin L. Liphardt currently owns the property.

NFA Certifcat Sent:	03-Nov-2006 00:00:00	***Coordinator:***	Verne Schrunk

Legal Description: SOUTH CLINTON, LOTS 1 AND 2, BLOCK 20, CLINTON, IA.

Technical Controls: GROUNDWATER INGESTION--ORDINANCE: Soil or Groundwater contamination is present (or may be present in the future due to contaminant migration) at levels which if ingested by humans could present an unreasonable risk to health. The potential for exposure to this groundwater by installation of groundwater wells is being regulated by the following control:

A city or county ordinance was in place at the time of issuance of this no further action certificate which regulates the installation of drinking and non-drinking water wells. The permitting authority has provided a non-binding certification that it is not likely to allow permitting of groundwater wells on this property because of the availability of a public water supply. If this ordinance is not maintained or is otherwise established to be ineffective, the "no action required" classification may be rescinded.

Certificate Information

Type: LUST
NFA Letter Date: 07-Apr-2010 00:00:00
Request Date: 15-Mar-2012 00:00:00
Certificate Date:
NFA Certifcat Sent:
Legal Description:
Technical Controls: GROUNDWATER INGESTION--ORDINANCE: Soil or Groundwater contamination is present (or may be present in the furture due to contaminant migration) at levels which if ingested by humans could present an unreasonable risk to health. The potential for exposure to this groundwater by installation of groundwater wells is being regulated by the following control: A city or county ordinance was in place at the time of issuance of this no further action certificate which regulates the installation of drinking and non-drinking water wells. The permitting authority has provided a non-binding certification that it is not likely to allow permitting of groundwater wells on this property because of the availability of a public water supply. If this ordinance is not maintained or is otherwise establised to be ineffective, the 'no action required' classification may be rescinded.

Desc Hist:	The parcel totals approximately 0.42 acres with one commercial structure and a parking lot. The structure is used as office space for New Age Builders, Inc., a general contractor, and Mel Foster Company, a realty agency. The structure was previously a Kentucky Fried Chicken (KFC) restaurant. The property was first identified as a residence from circa 1909 through circa 1956. Circa 1960 a restaurant identified as the Golden Point Drive-In occupied the site. The KFC restaurant occupied the site from circa 1965 through circa 2005.

Highlights: Property is located along the US Highway 30 realignment corridor. Property to the west is a know LUST site. Review of data from the LUST site indicated low level groundwater contamination had extended to the Former KFC site. Contamination is being managed by the LUST RP. Former Use: The parcel totals approximately 0.42 acres with one commercial structure and a parking lot. The structure is used as office space for New Age Builders, Inc., a general contractor, and Mel Foster Company, a realty agency. The structure was previously a Kentucky Fried Chicken (KFC) restaurant. The property was first identified as a residence from circa 1909 through circa 1956. Circa 1960 a restaurant identified as the Golden Point Drive-In occupied the site. The KFC restaurant occupied the site from circa 1965 through circa 2005.

Highlights:	Property is located along the US Highway 30 realignment corridor. Property to the west is a know LUST site. Review of data from the LUST site indicated low level groundwater contamination had extended to the Former KFC site. Contamination is being managed by the LUST RP. Former Use: The parcel totals approximately 0.42 acres with one commercial structure and a parking lot. The structure is used as office space for New Age Builders, Inc., a general contractor, and Mel Foster Company, a realty agency. The structure was previously a Kentucky Fried Chicken (KFC) restaurant. The property was first identified as a residence from circa 1909 through circa 1956. Circa 1960 a restaurant identified as the Golden Point Drive-In occupied the site. The KFC restaurant occupied the site from circa 1965 through circa 2005.

Desc Hist: The site is generally located on the southeast side of the intersection of Liberty Avenue and South 5th Street. The site historically contained various industrial developments including a lumberyard from approximately 1897 to 1902, an engineering company from 1925-1967, an automotive parts company from 1970 to 1980, a metal crafter business from 1985 to 1995 and a metal fabrication shop in 1999. Historical Sanborn maps and an interview with the property owner indicated the site had a foundry associated with the engine block manufacturers from approximately 1925 until 1980. Additionally, historical Sanborn maps indentify a railroad siding located on the property from 1897 to 1950. The site reconnaissance located the railroad siding but the property owner indicated it had not been used since he purchased the site around 1980. The site reconnaissance identified a large pit associated with the former foundry and numerous unlabeled 55-gallon drums throughout the facility, some of which were bulging.

Highlights:

• Soil samples collected from Range 1 did not exceed any regulatory standards. ¿ The concentrations of TEH as diesel were above the Tier 1 Lookup Value at Trust-1 in Range 2 soil. • Concentrations of RCRA metals in the one groundwater sample collected at the site (Trust-5) exceeded the statewide standards. Additionally, only one of the 6 proposed groundwater samples could be collected due to shallow bedrock. No groundwater sample was collected from Trust-1 where TEH exceeded the Tier 1 Lookup Value. The City of Clinton has an ordinance prohibiting installation of drinking water wells in the area; however there is a well downgradient of the facility owned by Pilsbury Feed Mill located approximately 200 meters southwest of the site. Additionally, it is noted the groundwater sample was unfiltered and sediment can cause the concentration of RCRA metals to be higher than filtered samples. TEH as diesel exceeded the Tier 1 Lookup Value in Range 2 Soil, and RCRA metals were detected above statewide standard in groundwater. The calculated cumulative cancer and non-cancer risks were unacceptable for groundwater. Therefore, further investigation appears to be warranted for this site. Former Use: The site is generally located on the southeast side of the intersection of Liberty Avenue and South 5th Street. The site historically contained various industrial developments including a lumberyard from approximately 1897 to 1902, an engineering company from 1925-1967, an automotive parts company from 1970 to 1980, a metal crafter business from 1985 to 1995 and a metal fabrication shop in 1999. Historical Sanborn maps and an interview with the property owner indicated the site had a foundry associated with the engine block manufacturers from approximately 1925 until 1980. Additionally, historical Sanborn maps indentify a railroad siding located on the property from 1897 to 1950. The site reconnaissance located the railroad siding but the property owner indicated it had not been used since he purchased the site around 1980. The site reconnaissance identified a large pit associated with the former foundry and numerous unlabeled 55-gallon drums throughout the facility, some of which were bulging.

Highlights: • Soil samples collected from Range 1 did not exceed any regulatory standards. ¿ The concentrations of TEH as diesel were above the Tier 1 Lookup Value at Trust-1 in Range 2 soil. • Concentrations of RCRA metals in the one groundwater sample collected at the site (Trust-5) exceeded the statewide standards. Additionally, only one of the 6 proposed groundwater samples could be collected due to shallow bedrock. No groundwater sample was collected from Trust-1 where TEH exceeded the Tier 1 Lookup Value. The City of Clinton has an ordinance prohibiting installation of drinking water wells in the area; however there is a well downgradient of the facility owned by Pilsbury Feed Mill located approximately 200 meters southwest of the site. Additionally, it is noted the groundwater sample was unfiltered and sediment can cause the concentration of RCRA metals to be higher than filtered samples. TEH as diesel exceeded the Tier 1 Lookup Value in Range 2 Soil, and RCRA metals were detected above statewide standard in groundwater. The calculated cumulative cancer and non-cancer risks were unacceptable for groundwater. Therefore, further investigation appears to be warranted for this site. Former Use: The site is generally located on the southeast side of the intersection of Liberty Avenue and South 5th Street. The site historically contained various industrial developments including a lumberyard from approximately 1897 to 1902, an engineering company from 1925-1967, an automotive parts company from 1970 to 1980, a metal crafter business from 1985 to 1995 and a metal fabrication shop in 1999. Historical Sanborn maps and an interview with the property owner indicated the site had a foundry associated with the engine block manufacturers from approximately 1925 until 1980. Additionally, historical Sanborn maps indentify a railroad siding located on the property from 1897 to 1950. The site reconnaissance located the railroad siding but the property owner indicated it had not been used since he purchased the site around 1980. The site reconnaissance identified a large pit associated with the former foundry and numerous unlabeled 55-gallon drums throughout the facility, some of which were bulging.

Tank Details

Tank ID: 24071
Brand:
Type: Retail Sales
In Use: -1
Installation Details: Installer Certified by Tank and Piping Manufacturers; Manufacturers' Checklist Completed; Tank and Piping Tested for Leaks During
and After Installation
Filled in Place:
Identify Inert Material:
Construction Material: Double Wall Composite

Tank - Dates

Date: 01-Sep-1993 00:00:00
Description: tank installed

Tank - External Protection Info

Type: Fiberglass Reinforced Plastic Coated (FRP)
CP Test Date:

Tank - Compartments

Compartment ID: 24406
Install Date: 01-Sep-1993 00:00:00
Contents: Regular (87)
Capacity: 4000

Tank - Compartments Details

Inspection ID: 1607
Primary Method: -1

Hazardous Waste Code:	F003
Waste Code Description:	THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
Hazardous Waste Code:	F005
Waste Code Description:	THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
Hazardous Waste Code:	D022
Waste Code Description:	CHLOROFORM
Hazardous Waste Code:	U002
Waste Code Description:	2-PROPANONE (I) (OR) ACETONE (I)
Hazardous Waste Code:	U031
Waste Code Description:	1-BUTANOL (I) (OR) N-BUTYL ALCOHOL (I)

Hazardous Waste Code: U220
Waste Code Description: BENZENE, METHYL- (OR) TOLUENE

Hazardous Waste Code: D001
Waste Code Description: IGNITABLE WASTE

Hazardous Waste Code: U154
Waste Code Description: METHANOL (I) (OR) METHYL ALCOHOL (I)

Hazardous Waste Code: D018
Waste Code Description: BENZENE

Hazardous Waste Code: U213
Waste Code Description: FURAN, TETRAHYDRO-(I) (OR) TETRAHYDROFURAN (I)

Hazardous Waste Code: UOIL
Waste Code Description:

Hazardous Waste Code: D035
Waste Code Description: METHYL ETHYL KETONE

Certificate Date:	13-Dec-2019 00:00:00	**CC Send To:**	PMMIC
NFA Certifcat Sent:	13-Dec-2019 00:00:00	**Coordinator:**	Tammy Vander Bloemen

Legal Description: See NFA certificate

Technical Controls: GROUNDWATER INGESTION--ORDINANCE: Soil or Groundwater contamination is present (or may be present in the future due to contaminant migration) at levels which if ingested by humans could present an unreasonable risk to health. The potential for exposure to this groundwater by installation of groundwater wells is being regulated by the following control: A city or county ordinance was in place at the time of issuance of this no further action certificate which regulates the installation of drinking and non-drinking water wells. The permitting authority has provided a non-binding certification that it is not likely to allow permitting of groundwater wells on this property because of the availability of a public water supply. If this ordinance is not maintained or is otherwise established to be ineffective, the 'no action required' classification may be rescinded.

Desc Hist: Property operated as a Petroleum Bulk Storage and distribution facility from 1890s ~ 2003. The property was purchased by Troy Pucket at a tax sale and used as a pallet recycling facility and for automotive repairs. A July 2005 fire distroyed the building and contents. The fire department pushed in the building to prevent collapse. The property has remained unoccupied since that time and became an area dumping ground for tires, chemical containers and unwanted furniture.

IC Addl Info: City of Clinton has a well ordinance requiring special permits for water well installation in the Liberty Square Corridor. Permit allows denial of permits in environmental impaired areas.
Highlights: Debris covered that site and required removal in order to complete Phase II testing. Soils located at the former loading dock are petroleum saturated and will require removal. Cleanup of soil contamination will be completed using EPA Petroleum Cleanup Grant Former Use: Property operated as a Petroleum Bulk Storage and distribution facility from 1890s ~ 2003. The property was purchased by Troy Pucket at a tax sale and used as a pallet recycling facility and for automotive repairs. A July 2005 fire distroyed the building and contents. The fire department pushed in the building to prevent collapse. The property has remained unoccupied since that time and became an area dumping ground for tires, chemical containers and unwanted furniture.

IC Addl Info:	City of Clinton has a well ordinance requiring special permits for water well installation in the Liberty Square Corridor. Permit allows denial of permits in environmental impaired areas.
Highlights:	Debris covered that site and required removal in order to complete Phase II testing. Soils located at the former loading dock are petroleum saturated and will require removal. Cleanup of soil contamination will be completed using EPA Petroleum Cleanup Grant Former Use: Property operated as a Petroleum Bulk Storage and distribution facility from 1890s ~ 2003. The property was purchased by Troy Pucket at a tax sale and used as a pallet recycling facility and for automotive repairs. A July 2005 fire distroyed the building and contents. The fire department pushed in the building to prevent collapse. The property has remained unoccupied since that time and became an area

dumping ground for tires, chemical containers and unwanted furniture.

The property was purchased by Troy Pucket at a tax sale and used as a pallet recycling facility and for automotive repairs. A July 2005 fire distroyed the building and contents. The fire department pushed in the building to prevent collapse. The property has remained unoccupied since that time and became an area dumping ground for tires, chemical containers and unwanted furniture.

IC Addl Info: City of Clinton has a well ordinance requiring special permits for water well installation in the Liberty Square Corridor. Permit allows denial of permits in environmental impaired areas.

Highlights: Debris covered that site and required removal in order to complete Phase II testing. Soils located at the former loading dock are petroleum saturated and will require removal. Cleanup of soil contamination will be completed using EPA Petroleum Cleanup Grant Former Use: Property operated as a Petroleum Bulk Storage and distribution facility from 1890s ~ 2003. The property was purchased by Troy Pucket at a tax sale and used as a pallet recycling facility and for automotive repairs. A July 2005 fire distroyed the building and contents. The fire department pushed in the building to prevent collapse. The property has remained unoccupied since that time and became an area dumping ground for tires, chemical containers and unwanted furniture.

Highlights:	Property is located along the US Highway 30 realignment corridor. The property has a long history as a bulk oil storage facility and has been sitting vacant for over two years. Former Use: The property was used for pallet manufacturing for ten years prior to its purchase by Mr. Puckett and prior to that it was a Skelly Oil Company bulk oil station with aboveground storage tanks for oil and diesel and oil storage inside the building in 55-gallon drums. The property has been vacant since July 29, 2005 due to a fire in the site building that resulted in an emergency demolition of the site building immediately thereafter.

Highlights: Property is located along the US Highway 30 realignment corridor. The property has a long history as a bulk oil storage facility and has been sitting vacant for over two years. Former Use: The property was used for pallet manufacturing for ten years prior to its purchase by Mr. Puckett and prior to that it was a Skelly Oil Company bulk oil station with aboveground storage tanks for oil and diesel and oil storage inside the building in 55-gallon drums. The property has been vacant since July 29, 2005 due to a fire in the site building that resulted in an emergency demolition of the site building immediately thereafter.

Highlights: Phase I conducted indicating further investigation is recommended to confirm no impact from an adjacent site that was used previously as service fueling station. Soil and/or groundwater sampling should be conducted to determine the presence of chemicals of concern, including but not limited to, VOCs, metals, and petroleum contaminants. Additional sampling and testing should be conducted prior to renovation or demolition to determine if asbestos or lead are present on the property. If either asbestos or lead are found the property should be abated before renovation or reuse. Former Use: U.S. Post Office building was built circa 1902 and operated as post office until 1990. The property was sold in 1999 and has been used for storage since the post office closed. The roof has been leaking for years. The interior of the building has deteriorated and is considered blight. Property has high visibility and is located on a key corner of the downtown area. It is located in an Opportunity Zone. Once property is cleaned up and renovated it has the potential to be utilized for residential or commercial use.

Highlights: Phase I conducted indicating further investigation is recommended to confirm no impact from an adjacent site that was used previously as service fueling station. Soil and/or groundwater sampling should be conducted to determine the presence of chemicals of concern, including but not limited to, VOCs, metals, and petroleum contaminants. Additional sampling and testing should be conducted prior to renovation or demolition to determine if asbestos or lead are present on the property. If either asbestos or lead are found the property should be abated before renovation or reuse. Former Use: U.S. Post Office building was built circa 1902 and operated as post office until 1990. The property was sold in 1999 and has been used for storage since the post office closed. The roof has been leaking for years. The interior of the building has deteriorated and is considered blight. Property has high visibility and is located on a key corner of the downtown area. It is located in an Opportunity Zone. Once property is cleaned up and renovated it has the potential to be utilized for residential or commercial use.

Desc Hist:	The property was previously an active and functioning YMCA with a pool and indoor exercise facility as well as offices. It was built in the early 1900s and then a significant addition was built in the 1960s. The YMCA is still an organization strictly because they own the property. The building is leased to the Victory Center for use as a men's shelter. They do not use the whole building, however, so a significant portion of the facility is vacant. The property has become blighted, with multiple nuisance complaints. It sits at a major intersection downtown and creates the perception of abandonment and blight. The city has identified the property as a historic restoration possibility, but the 1960's portion has dissuaded purchasers. The YMCA has offered this property at zero to no cost for an interested local government or non-profit. Additional testing to confirm no impact on public health and for asbestos/lead is needed prior to redevelopment.

Highlights: A service/filling station was located within 0.03 of a mile of the property. Also there was a swimming pool on the property. A small motor oil stain was observed in the basement. A 55 gallon plastic drum was observed in the boiler room and it was unclear what the contents were of the drum. Because of these findings further investigation was recommended. An ACM and LBP inspection was obtained indicating presence of ACM and LBP above SWS requiring abatement prior to renovation or demolition of an structures on the property. The city acquired the site 8/3/2020 through IA Ch657(a) due to delinquent taxes. They plan to cleanup the site to make ready for future redevelopment. Former Use: The property was previously an active and functioning YMCA with a pool and indoor exercise facility as well as offices. It was built in the early 1900s and then a significant addition was built in the 1960s. The YMCA continue to operate as such until merged with YWCA in 2008. A portion of the building was used as a homeless shelter until 2020, at which time the property was completely vacant. The property sits at a major intersection downtown and has become blighted and abandoned. The city has identified the property as a historic restoration possibility, but the 1960's portion has dissuaded purchasers.

Highlights: A service/filling station was located within 0.03 of a mile of the property. Also there was a swimming pool on the property. A small motor oil stain was observed in the basement. A 55 gallon plastic drum was observed in the boiler room and it was unclear what the contents were of the drum. Because of these findings further investigation was recommended. An ACM and LBP inspection was obtained indicating presence of ACM and LBP above SWS requiring abatement prior to renovation or demolition of an structures on the property. The city acquired the site 8/3/2020 through IA Ch657(a) due to delinquent taxes. They plan to cleanup the site to make ready for future redevelopment. Former Use: The property was previously an active and functioning YMCA with a pool and indoor exercise facility as well as offices. It was built in the early 1900s and then a significant addition was built in the 1960s. The YMCA continue to operate as such until merged with YWCA in 2008. A portion of the building was used as a homeless shelter until 2020, at which time the property was completely vacant. The property sits at a major intersection downtown and has become blighted and abandoned. The city has identified the property as a historic restoration possibility, but the 1960's portion has dissuaded purchasers.

Desc Hist:	The property was previously an active and functioning YMCA with a pool and indoor exercise facility as well as offices. It was built in the early 1900s and then a significant addition was built in the 1960s. The YMCA is still an organization strictly because they own the property. The building is leased to the Victory Center for use as a men's shelter. They do not use the whole building, however, so a significant portion of the facility is vacant. The property has become blighted, with multiple nuisance complaints. It sits at a major intersection downtown and creates the perception of abandonment and blight. The city has identified the property as a historic restoration possibility, but the 1960's portion has dissuaded purchasers. The YMCA has offered this property at zero to no cost for an interested local government or non-profit. Additional testing to confirm no impact on public health and for asbestos/lead is needed prior to redevelopment.

Highlights: A service/filling station was located within 0.03 of a mile of the property. Also there was a swimming pool on the property. A small motor oil stain was observed in the basement. A 55 gallon plastic drum was observed in the boiler room and it was unclear what the contents were of the drum. Because of these findings further investigation was recommended. An ACM and LBP inspection was obtained indicating presence of ACM and LBP above SWS requiring abatement prior to renovation or demolition of an structures on the property. The city acquired the site 8/3/2020 through IA Ch657(a) due to delinquent taxes. They plan to cleanup the site to make ready for future redevelopment. Former Use: The property was previously an active and functioning YMCA with a pool and indoor exercise facility as well as offices. It was built in the early 1900s and then a significant addition was built in the 1960s. The YMCA continue to operate as such until merged with YWCA in 2008. A portion of the building was used as a homeless shelter until 2020, at which time the property was completely vacant. The property sits at a major intersection downtown and has become blighted and abandoned. The city has identified the property as a historic restoration possibility, but the 1960's portion has dissuaded purchasers.

Desc Hist:	The property was previously an active and functioning YMCA with a pool and indoor exercise facility as well as offices. It was built in the early 1900s and then a significant addition was built in the 1960s. The YMCA is still an organization strictly because they own the property. The building is leased to the Victory Center for use as a men's shelter. They do not use the whole building, however, so a significant portion of the facility is vacant. The property has become blighted, with multiple nuisance complaints. It sits at a major intersection downtown and creates the perception of abandonment and blight. The city has identified the property as a historic restoration possibility, but the 1960's portion has dissuaded purchasers. The YMCA has offered this property at zero to no cost for an interested local government or non-profit. Additional testing to confirm no impact on public health and for asbestos/lead is needed prior to redevelopment.

Highlights: A service/filling station was located within 0.03 of a mile of the property. Also there was a swimming pool on the property. A small motor oil stain was observed in the basement. A 55 gallon plastic drum was observed in the boiler room and it was unclear what the contents were of the drum. Because of these findings further investigation was recommended. An ACM and LBP inspection was obtained indicating presence of ACM and LBP above SWS requiring abatement prior to renovation or demolition of an structures on the property. The city acquired the site 8/3/2020 through IA Ch657(a) due to delinquent taxes. They plan to cleanup the site to make ready for future redevelopment. Former Use: The property was previously an active and functioning YMCA with a pool and indoor exercise facility as well as offices. It was built in the early 1900s and then a significant addition was built in the 1960s. The YMCA continue to operate as such until merged with YWCA in 2008. A portion of the building was used as a homeless shelter until 2020, at which time the property was completely vacant. The property sits at a major intersection downtown and has become blighted and abandoned. The city has identified the property as a historic restoration possibility, but the 1960's portion has dissuaded purchasers.

A 55 gallon plastic drum was observed in the boiler room and it was unclear what the contents were of the drum. Because of these findings further investigation was recommended. An ACM and LBP inspection was obtained indicating presence of ACM and LBP above SWS requiring abatement prior to renovation or demolition of an structures on the property. The city acquired the site 8/3/2020 through IA Ch657(a) due to delinquent taxes. They plan to cleanup the site to make ready for future redevelopment. Former Use: The property was previously an active and functioning YMCA with a pool and indoor exercise facility as well as offices. It was built in the early 1900s and then a significant addition was built in the 1960s. The YMCA continue to operate as such until merged with YWCA in 2008. A portion of the building was used as a homeless shelter until 2020, at which time the property was completely vacant. The property sits at a major intersection downtown and has become blighted and abandoned. The city has identified the property as a historic restoration possibility, but the 1960's portion has dissuaded purchasers.

Legal Description: LOT SIX (6) IN BATHER'S SECOND SUBDIVISION OF OUTLOT ONE (1), IN IOWA LAND COMPANY'S WEST ADDITION TO THE CITY OF CLINTON, IOWA; AND LOT FIVE (5) AND THE NORTHEASTERLY SIX FEET (6') OF LOT FOUR (4) IN BATHER'S SECOND SUBDIVISION OF OUTLOT ONE (1), IN IOWA LAND COMPANY'S WEST ADDITION TO THE CITY OF CLINTON, IOWA.

Technical Controls: GROUNDWATER INGESTION--ORDINANCE: Soil or Groundwater contamination is present (or may be present in the future due to contaminant migration) at levels which if ingested by humans could present an unreasonable risk to health. The potential for exposure to this groundwater by installation of groundwater wells is being regulated by the following control:

A city or county ordinance was in place at the time of issuance of this no further action certificate which regulates the installation of drinking and non-drinking water wells. The permitting authority has provided a non-binding certification that it is not likely to allow permitting of groundwater wells on this property because of the availability of a public water supply. If this ordinance is not maintained or is otherwise established to be ineffective, the "no action required" classification may be rescinded.

NOTE: IF MONITORING WELLS MW-2A/B-2, MW-3/B-3, MW-6/B-6, MW-9/B-9, MW-10/B-10, OR MW-B ARE SUBSEQUENTLY LOCATED, THEY MUST BE PROPERLY ABANDONED IN ACCORDANCE WITH 567--39.8 OF THE IOWA ADMINISTRATIVE CODE.

Desc Hist: This is the site of a 6-story office/commercial building, built in 1914. Located in downtown Clinton, the building has been underutilized, and mostly vacant, for the last 20 years. Costs for renovation, including asbestos inspection and abatement to facilitate remodeling, have hindered most purchasers. The non-profit 'Rock Island Economic Growth Corporation' seeks to acquire the building, renovate the interior, and market the building for lease as a 28-unit apartment building, with ground-floor commercial space. As pre-purchase environmental due diligence costs were a large undertaking to begin reviewing the feasibility of renovation investment, 128(a) funds were used to assist the non-profit applicant with this early stage of project review. The non-profit anticipates acquiring the site in late 2014, and upon investment of their own funds, and state and federal tax credit program awards, they will begin renovation in mid-2015.

Desc Hist: This is the site of a 6-story office/commercial building, built in 1914. Located in downtown Clinton, the building has been underutilized, and mostly vacant, for the last 20 years. Costs for renovation, including asbestos inspection and abatement to facilitate remodeling, have hindered most purchasers. The non-profit 'Rock Island Economic Growth Corporation' seeks to acquire the building, renovate the interior, and market the building for lease as a 28-unit apartment building, with ground-floor commercial space. As pre-purchase environmental due diligence costs were a large undertaking to begin reviewing the feasibility of renovation investment, 128(a) funds were used to assist the non-profit applicant with this early stage of project review. The non-profit anticipates acquiring the site in late 2014, and upon investment of their own funds, and state and federal tax credit program awards, they will begin renovation in mid-2015.

Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. ERIS updates databases as set out in ASTM Standard E1527-13 and E1527-21, Section 8.1.8 Sources of Standard Source Information:

"Government information from nongovernmental sources may be considered current if the source updates the information at least every 90 days, or, for information that is updated less frequently than quarterly by the government agency, within 90 days of the date the government agency makes the information available to the public."

Standard Environmental Record Sources

Federal

National Priority List: NPL

Sites on the United States Environmental Protection Agency (EPA)'s National Priorities List of the most serious uncontrolled or abandoned hazardous waste sites identified for possible long-term remedial action under the Superfund program. The NPL, which EPA is required to update at least once a year, is based primarily on the score a site receives from EPA's Hazard Ranking System. A site must be on the NPL to receive money from the Superfund Trust Fund for remedial action. Sites are represented by boundaries where available in the EPA Superfund Site Boundaries maintained by the Shared Enterprise Geodata and Services (SEGS). Site boundaries represent the footprint of a whole site, the sum of all of the Operable Units and the current understanding of the full extent of contamination; for Federal Facility sites, the total site polygon may be the Facility boundary. Where there is no polygon boundary data available for a given site, the site is represented as a point.

Government Publication Date: May 25, 2023

National Priority List - Proposed: PROPOSED NPL

Sites proposed by the United States Environmental Protection Agency (EPA), the state agency, or concerned citizens for addition to the National Priorities List (NPL) due to contamination by hazardous waste and identified by the EPA as a candidate for cleanup because it poses a risk to human health and/or the environment. Sites are represented by boundaries where available in the EPA Superfund Site Boundaries maintained by the Shared Enterprise Geodata and Services (SEGS). Site boundaries represent the footprint of a whole site, the sum of all of the Operable Units and the current understanding of the full extent of contamination; for Federal Facility sites, the total site polygon may be the Facility boundary. Where there is no polygon boundary data available for a given site, the site is represented as a point.

Government Publication Date: May 25, 2023

Deleted NPL: DELETED NPL

Sites deleted from the United States Environmental Protection Agency (EPA)'s National Priorities List. The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate. Sites are represented by boundaries where available in the EPA Superfund Site Boundaries maintained by the Shared Enterprise Geodata and Services (SEGS). Site boundaries represent the footprint of a whole site, the sum of all of the Operable Units and the current understanding of the full extent of contamination; for Federal Facility sites, the total site polygon may be the Facility boundary. Where there is no polygon boundary data available for a given site, the site is represented as a point.

Government Publication Date: May 25, 2023

SEMS List 8R Active Site Inventory: SEMS

The U.S. Environmental Protection Agency's (EPA) Superfund Program has deployed the Superfund Enterprise Management System (SEMS), which integrates multiple legacy systems into a comprehensive tracking and reporting tool. This inventory contains active sites evaluated by the Superfund program that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. The Active Site Inventory Report displays site and location information at active SEMS sites. An active site is one at which site assessment, removal, remedial, enforcement, cost recovery, or oversight activities are being planned or conducted. This data includes SEMS sites from the List 8R Active file as well as applicable sites from the SEMS GIS/REST file layer obtained from EPA's Facility Registry Service.

Government Publication Date: Mar 23, 2023

Inventory of Open Dumps, June 1985: ODI

The Resource Conservation and Recovery Act (RCRA) provides for publication of an inventory of open dumps. The Act defines "open dumps" as facilities which do not comply with EPA's "Criteria for Classification of Solid Waste Disposal Facilities and Practices" (40 CFR 257).

Government Publication Date: Jun 1985

SEMS List 8R Archive Sites: SEMS ARCHIVE

The U.S. Environmental Protection Agency's (EPA) Superfund Enterprise Management System (SEMS) Archived Site Inventory displays site and location information at sites archived from SEMS. An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time. This data includes sites from the List 8R Archived site file.

Government Publication Date: Mar 23, 2023

Comprehensive Environmental Response, Compensation and Liability Information System - CERCLIS: CERCLIS

Superfund is a program administered by the United States Environmental Protection Agency (EPA) to locate, investigate, and clean up the worst hazardous waste sites throughout the United States. CERCLIS is a database of potential and confirmed hazardous waste sites at which the EPA Superfund program has some involvement. It contains sites that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. The EPA administers the Superfund program in cooperation with individual states and tribal governments; this database is made available by the EPA.

Government Publication Date: Oct 25, 2013

EPA Report on the Status of Open Dumps on Indian Lands: IODI

Public Law 103-399, The Indian Lands Open Dump Cleanup Act of 1994, enacted October 22, 1994, identified congressional concerns that solid waste open dump sites located on American Indian or Alaska Native (AI/AN) lands threaten the health and safety of residents of those lands and contiguous areas. The purpose of the Act is to identify the location of open dumps on Indian lands, assess the relative health and environment hazards posed by those sites, and provide financial and technical assistance to Indian tribal governments to close such dumps in compliance with Federal standards and regulations or standards promulgated by Indian Tribal governments or Alaska Native entities.

Government Publication Date: Dec 31, 1998

CERCLIS - No Further Remedial Action Planned: CERCLIS NFRAP

An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time. The Archive designation means that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL). This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Government Publication Date: Oct 25, 2013

CERCLIS Liens: CERCLIS LIENS

A Federal Superfund lien exists at any property where EPA has incurred Superfund costs to address contamination ("Superfund site") and has provided notice of liability to the property owner. A Federal CERCLA ("Superfund") lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. This database is made available by the United States Environmental Protection Agency (EPA). This database was provided by the United States Environmental Protection Agency (EPA). Refer to SEMS LIEN as the current data source for Superfund Liens.

Government Publication Date: Jan 30, 2014

RCRA CORRACTS-Corrective Action: RCRA CORRACTS

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. At these sites, the Corrective Action Program ensures that cleanups occur. EPA and state regulators work with facilities and communities to design remedies based on the contamination, geology, and anticipated use unique to each site.

Government Publication Date: Apr 24, 2023

RCRA non-CORRACTS TSD Facilities: RCRA TSD

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. This database includes Non-Corrective Action sites listed as treatment, storage and/or disposal facilities of hazardous waste as defined by RCRA.

Government Publication Date: Apr 24, 2023

RCRA Generator List: RCRA LQG

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Large Quantity Generators (LQGs) generate 1,000 kilograms per month or more of hazardous waste or more than one kilogram per month of acutely hazardous waste.

Government Publication Date: Apr 24, 2023

RCRA Small Quantity Generators List: RCRA SQG

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Small Quantity Generators (SQGs) generate more than 100 kilograms, but less than 1,000 kilograms, of hazardous waste per month.

Government Publication Date: Apr 24, 2023

RCRA Very Small Quantity Generators List: RCRA VSQG

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Very Small Quantity Generators (VSQG) generate 100 kilograms or less per month of hazardous waste, or one kilogram or less per month of acutely hazardous waste. Additionally, VSQG may not accumulate more than 1,000 kilograms of hazardous waste at any time.

Government Publication Date: Apr 24, 2023

RCRA Non-Generators: RCRA NON GEN

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Non-Generators do not presently generate hazardous waste.

Government Publication Date: Apr 24, 2023

RCRA Sites with Controls: RCRA CONTROLS

List of Resource Conservation and Recovery Act (RCRA) facilities with institutional controls in place. RCRA gives the U.S. Environmental Protection Agency (EPA) the authority to control hazardous waste from the "cradle-to-grave." This includes the generation, transportation, treatment, storage, and disposal of hazardous waste. RCRA also set forth a framework for the management of non-hazardous solid wastes. The 1986 amendments to RCRA enabled EPA to address environmental problems that could result from underground tanks storing petroleum and other hazardous substances.

Government Publication Date: Apr 24, 2023

Federal Engineering Controls-ECs: FED ENG

This list of Engineering controls (ECs) is provided by the United States Environmental Protection Agency (EPA). ECs encompass a variety of engineered and constructed physical barriers (e.g., soil capping, sub-surface venting systems, mitigation barriers, fences) to contain and/or prevent exposure to contamination on a property. The EC listing includes remedy component data from Superfund decision documents issued in fiscal years 1982-2021 for applicable sites on the final or deleted on the National Priorities List (NPL); and sites with a Superfund Alternative Approach (SAA) Agreement in place. The only sites included that are not on the NPL; proposed for NPL; or removed from proposed NPL, are those with an SAA Agreement in place.

Government Publication Date: Jun 22, 2023

Federal Institutional Controls- ICs: FED INST

This list of Institutional controls (ICs) is provided by the United States Environmental Protection Agency (EPA). ICs are non-engineered instruments, such as administrative and legal controls, that help minimize the potential for human exposure to contamination and/or protect the integrity of the remedy. Although it is EPA's expectation that treatment or engineering controls will be used to address principal threat wastes and that groundwater will be returned to its beneficial use whenever practicable, ICs play an important role in site remedies because they reduce exposure to contamination by limiting land or resource use and guide human behavior at a site. The IC listing includes remedy component data from Superfund decision documents issued in fiscal years 1982-2021 for applicable sites on the final or deleted on the National Priorities List (NPL); and sites with a Superfund Alternative Approach (SAA) Agreement in place. The only sites included that are not on the NPL; proposed for NPL; or removed from proposed NPL, are those with an SAA Agreement in place.

Government Publication Date: Jun 22, 2023

Land Use Control Information System: LUCIS

The LUCIS database is maintained by the U.S. Department of the Navy and contains information for former Base Realignment and Closure (BRAC) properties across the United States.

Government Publication Date: Sep 1, 2006

Institutional Control Boundaries at NPL sites: NPL IC

Boundaries of Institutional Control areas at sites on the United States Environmental Protection Agency (EPA)'s National Priorities List, or Proposed or Deleted, made available by the EPA's Shared Enterprise Geodata and Services (SEGS). United States Environmental Protection Agency (EPA)'s National Priorities List of the most serious uncontrolled or abandoned hazardous waste sites identified for possible long-term remedial action under the Superfund program. Institutional controls are non-engineered instruments such as administrative and legal controls that help minimize the potential for human exposure to contamination and/or protect the integrity of the remedy.

Government Publication Date: May 25, 2023

Emergency Response Notification System: ERNS 1982 TO 1986

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories.

Government Publication Date: 1982-1986

Emergency Response Notification System: ERNS 1987 TO 1989

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories.

Government Publication Date: 1987-1989

Emergency Response Notification System: ERNS

Database of oil and hazardous substances spill reports made available by the United States Coast Guard National Response Center (NRC). The NRC fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. These data contain initial incident data that has not been validated or investigated by a federal/state response agency.

Government Publication Date: Apr 3, 2023

The Assessment, Cleanup and Redevelopment Exchange System (ACRES) Brownfield Database: FED BROWNFIELDS

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties protects the environment, reduces blight, and takes development pressures off greenspaces and working lands. This data is provided by the United States Environmental Protection Agency (EPA) and includes Brownfield sites from the Cleanups in My Community (CIMC) web application.

Government Publication Date: Sep 13, 2022

FEMA Underground Storage Tank Listing: FEMA UST

The Federal Emergency Management Agency (FEMA) of the Department of Homeland Security maintains a list of FEMA owned underground storage tanks.

Government Publication Date: Dec 31, 2017

Facility Response Plan: FRP

This listing contains facilities that have submitted Facility Response Plans (FRPs) to the U.S. Environmental Protection Agency (EPA). Facilities that could reasonably be expected to cause "substantial harm" to the environment by discharging oil into or on navigable waters are required to prepare and submit FRPs. Harm is determined based on total oil storage capacity, secondary containment and age of tanks, oil transfer activities, history of discharges, proximity to a public drinking water intake or sensitive environments. This listing includes FRP facilities from an applicable EPA FOIA file and Homeland Infrastructure Foundation-Level Data (HIFLD) data file.

Government Publication Date: May 2, 2023

Delisted Facility Response Plans: DELISTED FRP

Facilities that once appeared in - and have since been removed from - the list of facilities that have submitted Facility Response Plans (FRP) to EPA. Facilities that could reasonably be expected to cause "substantial harm" to the environment by discharging oil into or on navigable waters are required to prepare and submit Facility Response Plans (FRPs). Harm is determined based on total oil storage capacity, secondary containment and age of tanks, oil transfer activities, history of discharges, proximity to a public drinking water intake or sensitive environments.

Government Publication Date: May 2, 2023

Historical Gas Stations: HIST GAS STATIONS

This historic directory of service stations is provided by the Cities Service Company. The directory includes Cities Service filling stations that were located throughout the United States in 1930.

Government Publication Date: Jul 1, 1930

Petroleum Refineries: REFN

List of petroleum refineries from the U.S. Energy Information Administration (EIA) Refinery Capacity Report. Includes operating and idle petroleum refineries (including new refineries under construction) and refineries shut down during the previous year located in the 50 States, the District of Columbia, Puerto Rico, the Virgin Islands, Guam, and other U.S. possessions. Survey locations adjusted using public data.

Government Publication Date: Aug 30, 2022

Petroleum Product and Crude Oil Rail Terminals: BULK TERMINAL

List of petroleum product and crude oil rail terminals made available by the U.S. Energy Information Administration (EIA). Includes operable bulk petroleum product terminals located in the 50 States and the District of Columbia with a total bulk shell storage capacity of 50,000 barrels or more, and/or the ability to receive volumes from tanker, barge, or pipeline; also rail terminals handling the loading and unloading of crude oil that were active between 2017 and 2018. Petroleum product terminals comes from the EIA-815 Bulk Terminal and Blender Report, which includes working, shell in operation, and shell idle for several major product groupings. Survey locations adjusted using public data.

Government Publication Date: Jun 29, 2022

LIEN on Property: SEMS LIEN

The U.S. Environmental Protection Agency's (EPA) Superfund Enterprise Management System (SEMS) provides Lien details on applicable properties, such as the Superfund lien on property activity, the lien property information, and the parties associated with the lien.

Government Publication Date: Mar 23, 2023

Superfund Decision Documents: SUPERFUND ROD

This database contains a list of decision documents for Superfund sites. Decision documents serve to provide the reasoning for the choice of (or) changes to a Superfund Site cleanup plan. The decision documents include completed Records of Decision (ROD), ROD Amendments, Explanations of Significant Differences (ESD) for active and archived sites stored in the Superfund Enterprise Management System (SEMS), along with other associated memos and files. This information is maintained and made available by the U.S. Environmental Protection Agency.

Government Publication Date: Mar 23, 2023

Formerly Utilized Sites Remedial Action Program: DOE FUSRAP

The U.S. Department of Energy (DOE) established the Formerly Utilized Sites Remedial Action Program (FUSRAP) in 1974 to remediate sites where radioactive contamination remained from the Manhattan Project and early U.S. Atomic Energy Commission (AEC) operations. The DOE Office of Legacy Management (LM) established long-term surveillance and maintenance (LTS&M) requirements for remediated FUSRAP sites. DOE evaluates the final site conditions of a remediated site on the basis of risk for different future uses. DOE then confirms that LTS&M requirements will maintain protectiveness.

Government Publication Date: Mar 4, 2017

State

Registry of Hazardous Waste or Hazardous Substance Disposal Sites: SHWS

This Registry of Hazardous Waste or Hazardous Substance Disposal Sites is maintained by the Iowa Department of Natural Resources. Hazardous disposal sites may have been plotted using Township, Section and Range and display approximate locations. Please note not all the known hazardous waste or contaminated sites that exist in the state are listed on the Registry. This database is state equivalent CERCLIS.

Government Publication Date: Dec 30, 2022

Removed from the Registry of Hazardous Waste or Hazardous Substance Disposal Sites: DEL SHWS

A list of sites that have been delisted or removed from the Registry of Hazardous Waste or Hazardous Substance Disposal Sites. This list was made available by the Department of Natural Resources (DNR). This database is state equivalent CERCLIS.

Government Publication Date: Dec 31, 2022

Delisted Registry of Hazardous Waste or Hazardous Substance Disposal Sites: DELISTED SHWS

List of sites which once appeared on - and have since been removed from - either the Hazardous Substance Remedial Fund and Sites Registry, or the list of sites removed from it, made available by the Iowa Department of Natural Resources (DNR). The hazardous disposal sites have been plotted using Township, Section and Range and display approximate locations.

Government Publication Date: Jul 24, 2023

Contaminated Sites in Iowa: CONT

The Contaminated Sites Section of the Iowa Department of Natural Resources (DNR) deals with a range of situations that involve contamination caused by a release of hazardous materials or hazardous waste products.

Government Publication Date: Jul 24, 2023

Solid Waste Management Facilities with Permits by the Iowa DNR: SWF/LF

The Iowa Department of Natural Resources (DNR) regulates the operation of facilities that manage, process and dispose solid waste. These facilities include sanitary landfills, appliance demanufacturing facilities, transfer stations, land application sites, incinerators, composting facilities, household hazardous materials sites, waste tire management and material recovery facilities. It includes all sites which are permitted or have had permits. It does not include non-permitted closed dumps.

Government Publication Date: Sep 15, 2022

Leaking Underground Storage Tank Sites in Iowa: LUST

A list of Leaking Underground Storage Tank (LUST) sites where petroleum contamination has been found. This list was made available by a joint venture of the Iowa Department of Natural Resources (DNR) and the Public Safety State Fire Marshal Office (SFM).

Government Publication Date: Mar 29, 2023

Leaking Aboveground Storage Tanks: LAST

A list of leaking aboveground storage tank (LAST) sites made available by the Iowa Department of Natural Resources (DNR).

Government Publication Date: Jul 24, 2023

Delisted Leaking Storage Tanks: DELISTED LST

List of sites removed from either the Leaking Underground Storage Tank (LUST) sites list or the Leaking Aboveground Storage Tank (LAST) sites list made available by the Iowa Department of Natural Resources (DNR).

Government Publication Date: Jul 24, 2023

Underground Storage Tanks in Iowa: UST

The Underground Storage Tanks (UST) Section of the Department of Natural Resources (DNR) is responsible for the regulation of underground storage tank systems used for the storage of regulated substances, primarily petroleum products.

Government Publication Date: Mar 29, 2023

Aboveground Storage Tanks: AST

A list of aboveground storage tanks (AST) that contain primarily the aboveground storage of combustible or flammable products. This list is maintained by a joint venture between the Iowa Department of Natural Resources (DNR) and the Public Safety State Fire Marshal Office (SFM).

Government Publication Date: Oct 26, 2017

Aboveground Storage Tanks (State Fire Marshal): SFM AST

A list of aboveground storage tanks (AST) that primarily store combustible or flammable liquids. Aboveground petroleum storage tanks that are greater than 1,100 gallons in capacity must be registered with the state fire marshal's office. This list is provided by the Iowa Department of Public Safety's State Fire Marshal Division (SFM).

Government Publication Date: Jun 1, 2023

Delisted Storage Tanks: DELISTED TANK

This database contains a list of storage tank sites that were removed by the Department of Natural Resources (DNR) from Storage Tanks Section.

Government Publication Date: Jun 1, 2023

Sites with Institutional Controls: INST

A list of sites in the Land Recycling Program (LRP) that have Institutional Controls in place. This list was made available by the Iowa Department of Natural Resources (DNR).

Government Publication Date: Jul 24, 2023

Land Recycling Program Sites: VCP

The Land Recycling Program (LRP) of the Iowa Department of Natural Resources (DNR) allows owners or other stakeholders of a property to voluntarily assess and implement remedial actions at a site that is contaminated or is perceived to be contaminated. The assessment of the property must address the severity of the contamination problems and the risks associated with the contamination.

Government Publication Date: Jul 24, 2023

Brownfields Sites Listing: BROWNFIELDS

Brownfields are abandoned, idled, or under-used industrial and commercial facilities where expansion or redevelopment is complicated by real or perceived environmental contamination. The Iowa Department of Natural Resources (DNR) tracks brownfield sites as well as targeted brownfields assessment sites.

Government Publication Date: Jul 24, 2023

Tribal

Leaking Underground Storage Tanks (LUSTs) on Indian Lands: INDIAN LUST

This list of leaking underground storage tanks (LUSTs) on Tribal/Indian Lands in Region 7, which includes Iowa, is made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Oct 12, 2017

Underground Storage Tanks on Tribal/Indian Lands: INDIAN UST

This list of underground storage tanks (USTs) on Tribal/Indian Lands in Region 7, which includes Iowa, is made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Apr 25, 2023

Delisted Tribal Leaking Storage Tanks: DELISTED INDIAN LST

Leaking Underground Storage Tank (LUST) facilities which once appeared on - and have since been removed from - the Regional Tribal/Indian LUST lists made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Apr 26, 2023

Delisted Tribal Underground Storage Tanks: DELISTED INDIAN UST

Underground Storage Tank (UST) facilities which once appeared on - and have since been removed from - the Regional Tribal/Indian UST lists made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Apr 26, 2023

County

No County standard environmental record sources available for this State.

Additional Environmental Record Sources

Federal

Facility Registry Service/Facility Index: FINDS/FRS

The Facility Registry Service (FRS) is a centrally managed database that identifies facilities, sites, or places subject to environmental regulations or of environmental interest. FRS creates high-quality, accurate, and authoritative facility identification records through rigorous verification and management procedures that incorporate information from program national systems, state master facility records, and data collected from EPA's Central Data Exchange registrations and data management personnel. This list is made available by the Environmental Protection Agency (US EPA).

Government Publication Date: Aug 18, 2022

Toxics Release Inventory (TRI) Program: TRIS

The U.S. Environmental Protection Agency's Toxics Release Inventory (TRI) is a database containing data on disposal or other releases of toxic chemicals from U.S. facilities and information about how facilities manage those chemicals through recycling, energy recovery, and treatment. There are currently 770 individually listed chemicals and 33 chemical categories covered by the TRI Program. Facilities that manufacture, process or otherwise use these chemicals in amounts above established levels must submit annual reporting forms for each chemical. Note that the TRI chemical list does not include all toxic chemicals used in the U.S. One of TRI's primary purposes is to inform communities about toxic chemical releases to the environment.

Government Publication Date: Oct 19, 2022

PFOA/PFOS Contaminated Sites: PFAS NPL

This list of National Priorities List (NPL) and related Superfund Alternative Agreement (SAA) sites where PFOA or PFOS contaminants have been detected in water and/or soil is provided by the U.S. Environmental Protection Agency (EPA). EPA Disclaimer with FOIA file: Inclusion on the list does not necessarily mean that drinking water has been affected, nor does inclusion mean that anyone at the site has been exposed or is at risk for detrimental health effects.

Government Publication Date: Jun 15, 2023

Federal Agency Locations with Known or Suspected PFAS Detections: PFAS FED SITES

List of Federal agency locations with known or suspected detections of Per- and Polyfluoroalkyl Substances (PFAS), made available by the U.S. Environmental Protection Agency (EPA) in their PFAS Analytic Tools data. EPA outlines that these data are gathered from several federal entities, such as the Federal Superfund program, Department of Defense (DOD), National Aeronautics and Space Administration, Department of Transportation, and Department of Energy. The dates this data was extracted for the PFAS Analytic Tools range from March 2022 to April 2023. Sites on this list do not necessarily reflect the source/s of PFAS contamination and detections do not indicate level of risk or human exposure at the site. Agricultural notifications in this data are limited to DOD sites only. At this time, the EPA is aware that this list is not comprehensive of all Federal agencies.

Government Publication Date: Apr 24, 2023

SSEHRI PFAS Contamination Sites: PFAS SSEHRI

This PFAS Contamination Site Tracker database is compiled by the Social Science Environmental Health Research Institute (SSEHRI) at Northeastern University. According to the SSEHRI, the database records qualitative and quantitative data from each known site of PFAS contamination, including timeline of discovery, sources, levels, health impacts, community response, and government response. The goal of this database is to compile information and support public understanding of the rapidly unfolding issue of PFAS contamination. All data presented was extracted from government websites, news articles, or publicly available documents, and this is cited in the tracker. Locations for the Known PFAS Contamination Sites are sourced from the PFAS Sites and Community Resources Map, credited to the Northeastern University's PFAS Project Lab, Silent Spring Institute, and the PFAS-REACH team. Disclaimer: The source conveys the data undergoes regular updates as new information becomes available, some sites may be missing and/or contain information that is incorrect or outdated, as well as their information represents all contamination sites SSEHRI is aware of, not all possible contamination sites. This data is not intended to be used for legal purposes. Access the following source link for the most current information: https://pfasproject.com/pfas-sites-and-community-resources/

Government Publication Date: Oct 9, 2022

National Response Center PFAS Spills: ERNS PFAS

This Per- and Poly-Fluoroalkyl Substances (PFAS) Spills dataset is made available via the U.S. Environmental Protection Agency's (EPA) PFAS Analytic Tools. The National Response Center (NRC), operated by the U.S. Coast Guard, serves as an emergency call center that fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. Response center calls from 1990 to the most recent complete calendar year where there was indication of Aqueous Film Forming Foam (AFFF) usage are included in this dataset. NRC calls may reference AFFF usage in the "Material Involved" or "Incident Description" fields. Limitations: The data from the NRC website contain initial incident data that has not been validated or investigated by a federal/state response agency. Keyword searches may misidentify some incident reports that do not contain PFAS. This dataset should also not be considered to be exhaustive of all PFAS spills/release incidents.

Government Publication Date: Apr 15, 2023

PFAS NPDES Discharge Monitoring: PFAS NPDES

This list of National Pollutant Discharge Elimination System (NPDES) permitted facilities with required monitoring for Per- and Polyfluoroalkyl (PFAS) Substances is made available via the U.S. Environmental Protection Agency (EPA)'s PFAS Analytic Tools. Any point-source wastewater discharger to waters of the United States must have a NPDES permit, which defines a set of parameters for pollutants and monitoring to ensure that the discharge does not degrade water quality or impair human health. This list includes NPDES permitted facilities associated with permits that monitor for Per- and Polyfluoroalkyl Substances (PFAS), limited to the years 2007 - present. EPA further advises the following regarding these data: currently, fewer than half of states have required PFAS monitoring for at least one of their permittees, and fewer states have established PFAS effluent limits for permittees. For states that may have required monitoring, some reporting and data transfer issues may exist on a state-by-state basis.

Government Publication Date: Feb 19, 2023

Perfluorinated Alkyl Substances (PFAS) from Toxic Release Inventory: PFAS TRI

List of Toxics Release Inventory (TRI) facilities at which the reported chemical is a per- or polyfluoroalkyl (PFAS) substance included in the U.S. Environmental Protection Agency's (EPA) consolidated PFAS Master List of PFAS Substances. Encompasses Toxics Release Inventory records included in the EPA PFAS Analytic Tools. The EPA's TRI database currently tracks information on disposal or releases of 770 individually listed toxic chemicals and 33 chemical categories from thousands of U.S. facilities and details about how facilities manage those chemicals through recycling, energy recovery, and treatment.

Government Publication Date: Oct 19, 2022

Perfluorinated Alkyl Substances (PFAS) Water Quality: PFAS WATER

The Water Quality Portal (WQP) is a cooperative service sponsored by the United States Geological Survey (USGS), the Environmental Protection Agency (EPA), and the National Water Quality Monitoring Council (NWQMC). This listing includes records from the Water Quality Portal where the characteristic (environmental measurement) is in the Environmental Protection Agency (EPA)'s consolidated Master List of PFAS Substances.
Government Publication Date: Jul 20, 2020

PFAS TSCA Manufacture and Import Facilities: PFAS TSCA

The U.S. Environmental Protection Agency (EPA) issued the Chemical Data Reporting (CDR) Rule under the Toxic Substances Control Act (TSCA) and requires chemical manufacturers and facilities that manufacture or import chemical substances to report data to EPA. This list is specific only to TSCA Manufacture and Import Facilities with reported per- and poly-fluoroalkyl (PFAS) substances. Data file is sourced from EPA's PFAS Analytic Tools TSCA dataset which includes CDR/Inventory Update Reporting data from 1998 up to 2020. Disclaimer: This data file includes production and importation data for chemicals identified in EPA's CompTox Chemicals Dashboard list of PFAS without explicit structures and list of PFAS structures in DSSTox. Note that some regulations have specific chemical structure requirements that define PFAS differently than the lists in EPA's CompTox Chemicals Dashboard. Reporting information on manufactured or imported chemical substance amounts should not be compared between facilities, as some companies claim Chemical Data Reporting Rule data fields for PFAS information as Confidential Business Information.
Government Publication Date: Jan 5, 2023

PFAS Waste Transfers from RCRA e-Manifest : PFAS E-MANIFEST

This Per- and Poly-Fluoroalkyl Substances (PFAS) Waste Transfers dataset is made available via the U.S. Environmental Protection Agency's (EPA) PFAS Analytic Tools. Every shipment of hazardous waste in the U.S. must be accompanied by a shipment manifest, which is a critical component of the cradle-to-grave tracking of wastes mandated by the Resource Conservation and Recovery Act (RCRA). According to the EPA, currently no Federal Waste Code exists for any PFAS compounds. To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: • PFAS • PFOA • PFOS • PERFL • AFFF • GENX • GEN-X (plus the Vermont state-specific waste codes). Limitations: Amount or concentration of PFAS being transferred cannot be determined from the manifest information. Keyword searches may misidentify some manifest records that do not contain PFAS. This dataset should also not be considered to be exhaustive of all PFAS waste transfers.
Government Publication Date: Apr 9, 2023

PFAS Industry Sectors: PFAS IND

This Per- and Poly-Fluoroalkyl Substances (PFAS) Industry Sectors dataset is made available via the U.S. Environmental Protection Agency's (EPA) PFAS Analytic Tools. The EPA developed the dataset from various sources that show which industries may be handling PFAS including: EPA's Enforcement and Compliance History Online (ECHO) records restricted to potential PFAS-handling industry sectors; ECHO records for Fire Training Sites identified where fire-fighting foam may have been used in training exercises; and 14 CFR Part 139 Airports compiled from historic and current records from the FAA Airport Data and Information Portal. Since July 2006, all certificated Part 139 Airports are required to have fire-fighting foam onsite that meet certain military specifications, which to date have been fluorinated (Aqueous Film Forming Foam). Limitations: Inclusion in this dataset does not indicate that PFAS are being manufactured, processed, used, or released by the facility. Listed facilities potentially handle PFAS based on their industrial profile, but are unconfirmed by the EPA. Keyword searches in ECHO for Fire Training sites may misidentify some facilities and should not be considered to be an exhaustive list of fire training facilities in the U.S.
Government Publication Date: Apr 16, 2023

Hazardous Materials Information Reporting System: HMIRS

US DOT - Department of Transportation Pipeline and Hazardous Materials Safety Administration (PHMSA) Incidents Reports Database taken from Hazmat Intelligence Portal, U.S. Department of Transportation.
Government Publication Date: Sep 1, 2020

National Clandestine Drug Labs: NCDL

The U.S. Department of Justice ("the Department"), Drug Enforcement Administration (DEA), provides this data as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy.
Government Publication Date: Feb 8, 2023

Toxic Substances Control Act: TSCA

The Environmental Protection Agency (EPA) is amending the Toxic Substances Control Act (TSCA) section 8(a) Inventory Update Reporting (IUR) rule and changing its name to the Chemical Data Reporting (CDR) rule.
The CDR enables EPA to collect and publish information on the manufacturing, processing, and use of commercial chemical substances and mixtures (referred to hereafter as chemical substances) on the TSCA Chemical Substance Inventory (TSCA Inventory). This includes current information on chemical substance production volumes, manufacturing sites, and how the chemical substances are used. This information helps the Agency determine whether people or the environment are potentially exposed to reported chemical substances. EPA publishes submitted CDR data that is not Confidential Business Information (CBI).

Government Publication Date: Apr 11, 2019

Hist TSCA: HIST TSCA

The Environmental Protection Agency (EPA) is amending the Toxic Substances Control Act (TSCA) section 8(a) Inventory Update Reporting (IUR) rule and changing its name to the Chemical Data Reporting (CDR) rule.
The 2006 IUR data summary report includes information about chemicals manufactured or imported in quantities of 25,000 pounds or more at a single site during calendar year 2005. In addition to the basic manufacturing information collected in previous reporting cycles, the 2006 cycle is the first time EPA collected information to characterize exposure during manufacturing, processing and use of organic chemicals. The 2006 cycle also is the first time manufacturers of inorganic chemicals were required to report basic manufacturing information.

Government Publication Date: Dec 31, 2006

FTTS Administrative Case Listing: FTTS ADMIN

An administrative case listing from the Federal Insecticide, Fungicide, & Rodenticide Act (FIFRA) and Toxic Substances Control Act (TSCA), together known as FTTS. This database was obtained from the Environmental Protection Agency's (EPA) National Compliance Database (NCDB). The FTTS and NCDB was shut down in 2006.

Government Publication Date: Jan 19, 2007

FTTS Inspection Case Listing: FTTS INSP

An inspection case listing from the Federal Insecticide, Fungicide, & Rodenticide Act (FIFRA) and Toxic Substances Control Act (TSCA), together known as FTTS. This database was obtained from the Environmental Protection Agency's (EPA) National Compliance Database (NCDB). The FTTS and NCDB was shut down in 2006.

Government Publication Date: Jan 19, 2007

Potentially Responsible Parties List: PRP

Early in the site cleanup process, the U.S. Environmental Protection Agency (EPA) conducts a search to find the Potentially Responsible Parties (PRPs). The EPA looks for evidence to determine liability by matching wastes found at the site with parties that may have contributed wastes to the site. This listing contains PRPs, Noticed Parties, at sites in the EPA's Superfund Enterprise Management System (SEMS).

Government Publication Date: Jan 25, 2023

State Coalition for Remediation of Drycleaners Listing: SCRD DRYCLEANER

The State Coalition for Remediation of Drycleaners (SCRD) was established in 1998, with support from the U.S. Environmental Protection Agency (EPA) Office of Superfund Remediation and Technology Innovation. Coalition members are states with mandated programs and funding for drycleaner site remediation. Current members are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin. Since 2017, the SCRD no longer maintains this data, refer to applicable state source data where available.

Government Publication Date: Nov 08, 2017

Integrated Compliance Information System (ICIS): ICIS

The U.S. Environmental Protection Agency's Enforcement and Compliance History Online system incorporates data from the Integrated Compliance Information System - National Pollutant Discharge Elimination System (ICIS-NPDES). ICIS-NPDES is an information management system maintained by the Office of Compliance to track permit compliance and enforcement status of facilities regulated by the NPDES under the Clean Water Act. This data includes permit, inspection, violation and enforcement action information for applicable ICIS records.

Government Publication Date: Oct 15, 2022

Drycleaner Facilities: FED DRYCLEANERS

A list of drycleaner facilities from Enforcement and Compliance History Online (ECHO) data as made available by the U.S. Environmental Protection Agency (EPA), sourced from the ECHO Exporter file. The EPA tracks facilities that possess NAIC and SIC codes that classify businesses as drycleaner establishments.

Government Publication Date: Apr 15, 2023

Delisted Drycleaner Facilities: DELISTED FED DRY

List of sites removed from the list of Drycleaner Facilities (sites in the EPA's Integrated Compliance Information System (ICIS) with NAIC or SIC codes identifying the business as a drycleaner establishment).

Government Publication Date: Apr 15, 2023

Formerly Used Defense Sites: FUDS

Formerly Used Defense Sites (FUDS) are properties that were formerly owned by, leased to, or otherwise possessed by and under the jurisdiction of the Secretary of Defense prior to October 1986, where the Department of Defense (DOD) is responsible for an environmental restoration. The FUDS Annual Report to Congress (ARC) is published by the U.S. Army Corps of Engineers (USACE). This data is compiled from the USACE's Geospatial FUDS data layers and Homeland Infrastructure Foundation-Level Data (HIFLD) FUDS dataset.

Government Publication Date: Jul 12, 2022

FUDS Munitions Response Sites: FUDS MRS

Boundaries of Munitions Response Sites (MRS), published with the Formerly Used Defense Sites (FUDS) Annual Report to Congress (ARC) by the U.S. Army Corps of Engineers (USACE). An MRS is a discrete location within a Munitions response area (MRA) that is known to require a munitions response. An MRA means any area on a defense site that is known or suspected to contain unexploded ordnance (UXO), discarded military munitions (DMM), or munitions constituents (MC). This data is compiled from the USACE's Geospatial MRS data layers and Homeland Infrastructure Foundation-Level Data (HIFLD) MRS dataset.

Government Publication Date: Jul 12, 2022

Former Military Nike Missile Sites: FORMER NIKE

This information was taken from report DRXTH-AS-IA-83A016 (Historical Overview of the Nike Missile System, 12/1984) which was performed by Environmental Science and Engineering, Inc. for the U.S. Army Toxic and Hazardous Materials Agency Assessment Division. The Nike system was deployed between 1954 and the mid-1970's. Among the substances used or stored on Nike sites were liquid missile fuel (JP-4); starter fluids (UDKH, aniline, and furfuryl alcohol); oxidizer (IRFNA); hydrocarbons (motor oil, hydraulic fluid, diesel fuel, gasoline, heating oil); solvents (carbon tetrachloride, trichloroethylene, trichloroethane, stoddard solvent); and battery electrolyte. The quantities of material a disposed of and procedures for disposal are not documented in published reports. Virtually all information concerning the potential for contamination at Nike sites is confined to personnel who were assigned to Nike sites. During deactivation most hardware was shipped to depot-level supply points. There were reportedly instances where excess materials were disposed of on or near the site itself at closure. There was reportedly no routine site decontamination.

Government Publication Date: Dec 2, 1984

PHMSA Pipeline Safety Flagged Incidents: PIPELINE INCIDENT

A list of flagged pipeline incidents made available by the U.S. Department of Transportation (US DOT) Pipeline and Hazardous Materials Safety Administration (PHMSA). PHMSA regulations require incident and accident reports for five different pipeline system types.

Government Publication Date: Mar 31, 2021

Material Licensing Tracking System (MLTS): MLTS

A list of sites that store radioactive material subject to the Nuclear Regulatory Commission (NRC) licensing requirements. This list is maintained by the NRC. As of September 2016, the NRC no longer releases location information for sites. Site locations were last received in July 2016.

Government Publication Date: May 11, 2021

Historic Material Licensing Tracking System (MLTS) sites: HIST MLTS

A historic list of sites that have inactive licenses and/or removed from the Material Licensing Tracking System (MLTS). In some cases, a site is removed from the MLTS when the state becomes an "Agreement State". An Agreement State is a State that has signed an agreement with the Nuclear Regulatory Commission (NRC) authorizing the State to regulate certain uses of radioactive materials within the State.

Government Publication Date: Jan 31, 2010

Mines Master Index File: MINES

The Master Index File (MIF) is provided by the United State Department of Labor, Mine Safety and Health Administration (MSHA). This file, which was originally created in the 1970's, contained many Mine-IDs that were invalid. MSHA removes invalid IDs from the MIF upon discovery. MSHA applicable data includes the following: all Coal and Metal/Non-Metal mines under MSHA's jurisdiction since 1/1/1970; mine addresses for all mines in the database except for Abandoned mines prior to 1998 from MSHA's legacy system (addresses may or may not correspond with the physical location of the mine itself); violations that have been assessed penalties as a result of MSHA inspections beginning on 1/1/2000; and violations issued as a result of MSHA inspections conducted beginning on 1/1/2000.

Government Publication Date: Nov 7, 2022

Surface Mining Control and Reclamation Act Sites: SMCRA

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by the Office of Surface Mining Reclamation and Enforcement (OSMRE) to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of Abandoned Mine Land (AML) impacts, as well as information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

Government Publication Date: Aug 18, 2022

Mineral Resource Data System: MRDS

The Mineral Resource Data System (MRDS) is a collection of reports describing metallic and nonmetallic mineral resources throughout the world. Included are deposit name, location, commodity, deposit description, geologic characteristics, production, reserves, resources, and references. This database contains the records previously provided in the Mineral Resource Data System (MRDS) of USGS and the Mineral Availability System/Mineral Industry Locator System (MAS/MILS) originated in the U.S. Bureau of Mines, which is now part of USGS. The USGS has ceased systematic updates of the MRDS database with their focus more recently on deposits of critical minerals while providing a well-documented baseline of historical mine locations from USGS topographic maps.

Government Publication Date: Mar 15, 2016

DOE Legacy Management Sites: LM SITES

The U.S. Department of Energy (DOE) Office of Legacy Management (LM) currently manages radioactive and chemical waste, environmental contamination, and hazardous material at over 100 sites across the U.S. The LM manages sites with diverse regulatory drivers (statutes or programs that direct cleanup and management requirements at DOE sites) or as part of internal DOE or congressionally-recognized programs, such as but not limited to: Formerly Utilized Sites Remedial Action Program (FUSRAP), Uranium Mill Tailings Radiation Control Act (UMTRCA Title I, Tile II), Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), Resource Conservation and Recovery Act (RCRA), Decontamination and Decommissioning (D&D), Nuclear Waste Policy Act (NWPA). This site listing includes data exported from the DOE Office of LM's Geospatial Environmental Mapping System (GEMS). GEMS Data disclaimer: The DOE Office of LM makes no representation or warranty, expressed or implied, regarding the use, accuracy, availability, or completeness of the data presented herein.

Government Publication Date: May 25, 2023

Alternative Fueling Stations: ALT FUELS

This list of alternative fueling stations is sourced from the Alternative Fuels Data Center (AFDC). The U.S. Department of Energy's Office of Energy Efficiency & Renewable Energy launched the AFDC in 1991 as a repository for alternative fuel vehicle performance data, which provides a wealth of information and data on alternative and renewable fuels, advanced vehicles, fuel-saving strategies, and emerging transportation technologies. The data includes Biodiesel (B20 and above), Compressed Natural Gas (CNG), Electric, Ethanol (E85), Hydrogen, Liquefied Natural Gas (LNG), Propane (LPG), and Renewable Diesel (R20 and above) fuel type locations.

Government Publication Date: Jun 5, 2023

Superfunds Consent Decrees: CONSENT DECREES

This list of Superfund consent decrees is provided by the Department of Justice, Environment & Natural Resources Division (ENRD) through a Freedom of Information Act (FOIA) applicable file. This listing includes Consent Decrees for CERCLA or Superfund Sites filed and/or as proposed within the ENRD's Case Management System (CMS) since 2010. CMS may not reflect the latest developments in a case nor can the agency guarantee the accuracy of the data. ENRD Disclaimer: Congress excluded three discrete categories of law enforcement and national security records from the requirements of the FOIA; response is limited to those records that are subject to the requirements of the FOIA; however, this should not be taken as an indication that excluded records do, or do not, exist.

Government Publication Date: Apr 19, 2023

Air Facility System: AFS

This EPA retired Air Facility System (AFS) dataset contains emissions, compliance, and enforcement data on stationary sources of air pollution. Regulated sources cover a wide spectrum; from large industrial facilities to relatively small operations such as dry cleaners. AFS does not contain data on facilities that are solely asbestos demolition and/or renovation contractors, or landfills. ECHO Clean Air Act data from AFS are frozen and reflect data as of October 17, 2014; the EPA retired this system for Clean Air Act stationary sources and transitioned to ICIS-Air.

Government Publication Date: Oct 17, 2014

Registered Pesticide Establishments: SSTS

This national list of active EPA-registered foreign and domestic pesticide and/or device-producing establishments is based on data from the Section Seven Tracking System (SSTS). The Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) Section 7 requires that each producing establishment must place its EPA establishment number on the label or immediate container of each pesticide, active ingredient or device produced. An EPA establishment number on a pesticide product label identifies the EPA registered location where the product was produced. The list of establishments is made available by the U.S. Environmental Protection Agency (EPA).

Government Publication Date: Mar 1, 2023

Polychlorinated Biphenyl (PCB) Transformers: PCBT

Locations of Transformers Containing Polychlorinated Biphenyls (PCBs) registered with the United States Environmental Protection Agency. PCB transformer owners must register their transformer(s) with EPA. Although not required, PCB transformer owners who have removed and properly disposed of a registered PCB transformer may notify EPA to have their PCB transformer de-registered. Data made available by EPA.

Government Publication Date: Oct 15, 2019

Polychlorinated Biphenyl (PCB) Notifiers: PCB

Facilities included in the national list of facilities that have notified the United States Environmental Protection Agency (EPA) of Polychlorinated Biphenyl (PCB) activities. Any company or person storing, transporting or disposing of PCBs or conducting PCB research and development must notify the EPA and receive an identification number.

Government Publication Date: Mar 20, 2023

State

Spill incidents reported to Iowa DNR and tracked in the Hazardous Substance Incident database: SPILLS

Spill incidents reported to the Iowa Department of Natural Resources (DNR) and tracked in the Hazardous Substance Incident database.

Government Publication Date: Jul 25, 2023

Dry Cleaning Facilities: DRYCLEANERS

A listing of drycleaners in Iowa. This is maintained by Iowa's Department of Natural Resources's Air Bureau Quality.

Government Publication Date: Jul 31, 2023

Delisted Drycleaners: DELISTED DRYCLEANERS

List of sites which onece appeared on - and have since been removed from - the list of drycleaners made available by Iowa's Department of Natural Resources Air Quality Bureau.

Government Publication Date: Jul 31, 2023

Air Permitted Facilities: AIR PERMITS

The Iowa Department of Natural Resources (DNR) maintains this list of facilities with operating permits for Title V of the Federal Clean Air Act, as well as facilities required to submit an air emissions inventory, and other facilities with air quality interest such as Feed Mills, Group 1 Grain Elevators, and Permit By Rule (PBR) Spray Booths.

Government Publication Date: May 2, 2023

Per- and Polyfluoroalkyl Substances (PFAS) Use or Release: PFAS

List of known or suspected Per- and Polyfluoroalkyl Substances (PFAS) release locations and sites engaged in a business type that is known to use PFAS in some manner. Data made available by the Iowa Department of Natural Resources.

Government Publication Date: Jan 13, 2021

Liens Filed Listing: LIENS

A list of Underground Storage Tank Fund Liens maintained by the Iowa Department of Natural Resources.

Government Publication Date: Mar 15, 2023

Tier 2 Report: TIER 2

A list of Tier 2 facilities - entities that store chemicals and are required to report them under the Emergency Planning and Community Right-to-Know Act (EPCRA) of 1986. This list is made available by the Iowa Department of Natural Resources (DNR).

Government Publication Date: Mar 22, 2022

Tribal

No Tribal additional environmental record sources available for this State.

County

No County additional environmental record sources available for this State.

Definitions

Database Descriptions: This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

Detail Report: This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

Distance: The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

Direction: The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

Elevation: The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

Executive Summary: This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

Map Key: The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

Unplottables: These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

APPENDIX D

SUPPORTING DOCUMENTS

APPENDIX A

==========

PHASE I ESA
USER QUESTIONNAIRE

This questionnaire has been developed for the User of the Phase I ESA. The "User" is generally the party seeking to use the Phase I ESA pursuant to the Practice E1527-21 and may include, without limitation, a prospective purchaser or prospective tenant of the property, an owner of the property, a lender, or a property manager.

The User must provide information, if available, to the environmental professional performing the Phase I ESA in the form of responses to the following questions to qualify for Landowner Liability Protections (LLPS) offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001. Failure to provide this information, if available, could result in a determination that "all appropriate inquiry" is not complete.

Interviewees are requested to answer the following questions in good faith and to the best of their actual knowledge.

Project Information

Subject Property Name: Central Siding Supply

Subject Property Address: 1000 South 4th Street (a/k/a part of 413 10th Avenue South)

Date questionnaire completed by Interviewee: 08/22/2023

Interviewee Information

Interviewee: Lisa Frederick

Title: City Clerk / Deputy City Administrator

Company: City of Clinton

Association to Subject Property:	☐ Client	☐ Occupant
(Check those that apply)	☐ Site Manager	☐ Other (define) _____
	X Government Official	

© 2023 Blackstone Environmental, Inc.

Subject Property Information

Please provide a name and number of the person familiar with the Subject Property to contact to conduct an interview and site walk.

Name: Daniel Keis

Phone number/email address: 563-219-1244

Company: Property Owner / Central Siding Supply

QUESTIONS FOR THE USER (CLIENT)

Please write your answer indicating yes or no to the following questions and provide additional detail for "yes" responses.

1) What is the reason why the Phase I ESA is required? The City-owned buildings at 1006-1008 South 4th Street collapsed. The City is procuring title to 1000 South 4th Street (a/k/a part of 413 10th Avenue South) in order to complete emergency demolition of the structures north of the alley in the 1000 Block of South 4th Street. Structural engineer determined the site is subject to collapse and a dangerous building.

2) What is the current and propose future use of the Subject Property? The property is currently vacant. Its primary use is to display a sign for Central Siding Supply. The proposed future use would be to see redevelopment in the entire block (new commercial and/or mixed commercial/residential use).

3) Have you engaged a title company or professional to review recorded land title records and lien records? If yes, please provide. Yes. Title report is projected to be received 08/22/2023.

4) Did a search of land title records or judicial records identify any environmental liens filed or recorded against the Subject Property under federal, tribal, state, or local law? Will know on 08/22/2023.

5) Did a search of land title records or judicial records identify any Activity Use Limitations (AULs) such as engineering controls, land use restrictions, or institutional controls in place at the Subject Property? Will know on 08/22/2023.

© 2023 Blackstone Environmental, Inc.

6) As the user of this ESA do you have any specialized knowledge or experience related to the Subject Property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business? No

7) Does the purchase price being paid for this Subject Property reasonably reflect the fair market value of the Subject Property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the Subject Property? The City is procuring the property for free. Due to the costs incurred of having to demolish the property.

8) Are you aware of commonly known or reasonably ascertainable information about the Subject Property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, as user,

(a.) Do you know the past uses of the Subject Property? Unknown.

(b.) Do you know of specific chemicals that are present or once were present at the Subject Property? Unknown

(c.) Do you know of spills or other chemical releases that have taken place at the Subject Property? Unknown

(d.) Do you know of any environmental cleanups that have taken place at the Subject Property? Unknown

© 2023 Blackstone Environmental, Inc.

9) As the user of this Phase I ESA, based on your knowledge and experience related to the Subject Property, are there any obvious indicators that point to the presence or likely presence of contamination at the Subject Property? Unknown / not to my knowledge

The ERIS ***Physical Setting Report - PSR*** provides comprehensive information about the physical setting around a site and includes a complete overview of topography and surface topology, in addition to hydrologic, geologic and soil characteristics. The location and detailed attributes of oil and gas wells, water wells, public water systems and radon are also included for review.

The compilation of both physical characteristics of a site and additional attribute data is useful in assessing the impact of migration of contaminants and subsequent impact on soils and groundwater.

Disclaimer

This Report does not provide a full environmental evaluation for the site or adjacent properties. Please see the terms and disclaimer at the end of the Report for greater detail.

Hydrologic Information

FEMA Flood Zone Definitions

Special Flood Hazard Areas – High Risk

Special Flood Hazard Areas represent the area subject to inundation by 1-percent-annual chance flood. Structures located within the SFHA have a 26-percent chance of flooding during the life of a standard 30-year mortgage. Federal floodplain management regulations and mandatory flood insurance purchase requirements apply in these zones.

ZONE	DESCRIPTION
A	Areas subject to inundation by the 1-percent-annual-chance flood event. Because detailed hydraulic analyses have not been performed, no Base Flood Elevations (BFEs) or flood depths are shown.
AE, A1-A30	Areas subject to inundation by the 1-percent-annual-chance flood event determined by detailed methods. BFEs are shown within these zones. (Zone AE is used on new and revised maps in place of Zones A1–A30.)
AH	Areas subject to inundation by 1-percent-annual-chance shallow flooding (usually areas of ponding) where average depths are 1–3 feet. BFEs derived from detailed hydraulic analyses are shown in this zone.
AO	Areas subject to inundation by 1-percent-annual-chance shallow flooding (usually sheet flow on sloping terrain) where average depths are 1–3 feet. Average flood depths derived from detailed hydraulic analyses are shown within this zone.
AR	Areas that result from the decertification of a previously accredited flood protection system that is determined to be in the process of being restored to provide base flood protection.
A99	Areas subject to inundation by the 1-percent-annual-chance flood event, but which will ultimately be protected upon completion of an under-construction Federal flood protection system. These are areas of special flood hazard where enough progress has been made on the construction of a protection system, such as dikes, dams, and levees, to consider it complete for insurance rating purposes. Zone A99 may be used only when the flood protection system has reached specified statutory progress toward completion. No BFEs or flood depths are shown.

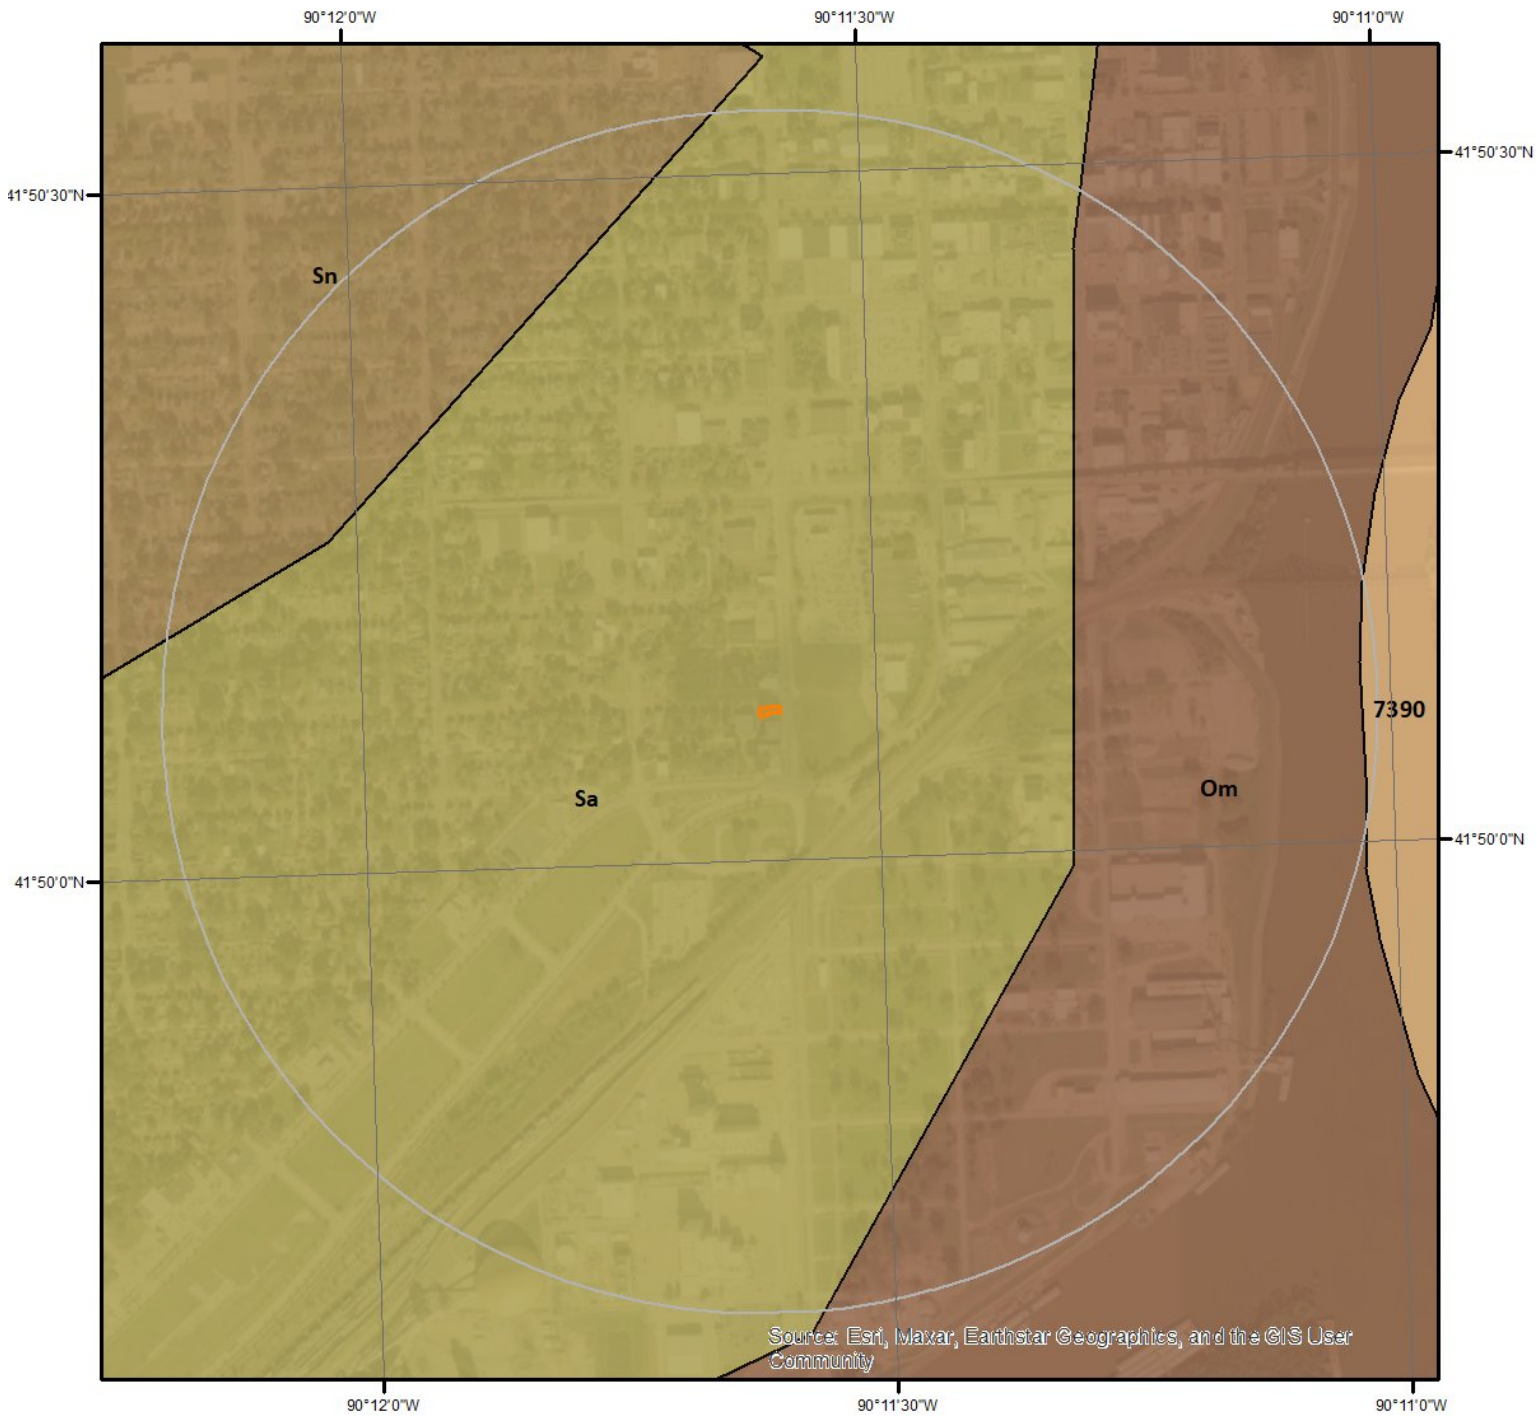
Coastal High Hazard Areas – High Risk

Coastal High Hazard Areas (CHHA) represent the area subject to inundation by 1-percent-annual chance flood, extending from offshore to the inland limit of a primary front al dune along an open coast and any other area subject to high velocity wave action from storms or seismic sources. Structures located within the CHHA have a 26-percent chance of flooding during the life of a standard 30-year mortgage. Federal floodplain management regulations and mandatory purchase requirements apply in these zones.

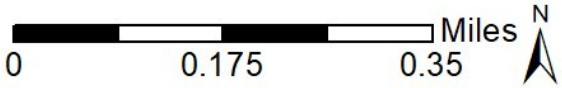
ZONE	DESCRIPTION
V	Areas along coasts subject to inundation by the 1-percent-annual-chance flood event with additional hazards associated with storm-induced waves. Because detailed coastal analyses have not been performed, no BFEs or flood depths are shown.
VE, V1-V30	Areas along coasts subject to inundation by the 1-percent-annual-chance flood event with additional hazards due to storm-induced velocity wave action. BFEs derived from detailed hydraulic coastal analyses are shown within these zones. (Zone VE is used on new and revised maps in place of Zones V1–V30.)

Hydrologic Information

Moderate and Minimal Risk Areas



Areas of moderate or minimal hazard are studied based upon the principal source of flood in the area. However, buildings in these zones could be flooded by severe, concentrated rainfall coupled with inadequate local drainage systems. Local stormwater drainage systems are not normally considered in a community's flood insurance study. The failure of a local drainage system can create areas of high flood risk within these zones. Flood insurance is available in participating communities, but is not required by regulation in these zones. Nearly 25-percent of all flood claims filed are for structures located within these zones.



ZONE	DESCRIPTION
B, X (shaded)	Moderate risk areas within the 0.2-percent-annual-chance floodplain, areas of 1-percent-annual-chance flooding where average depths are less than 1 foot, areas of 1-percent-annual-chance flooding where the contributing drainage area is less than 1 square mile, and areas protected from the 1-percent-annual-chance flood by a levee. No BFEs or base flood depths are shown within these zones. (Zone X (shaded) is used on new and revised maps in place of Zone B.)
C, X (unshaded)	Minimal risk areas outside the 1-percent and .2-percent-annual-chance floodplains. No BFEs or base flood depths are shown within these zones. (Zone X (unshaded) is used on new and revised maps in place of Zone C.)

Undetermined Risk Areas

ZONE	DESCRIPTION
D	Unstudied areas where flood hazards are undetermined, but flooding is possible. No mandatory flood insurance purchase requirements apply, but coverage is available in participating communities.

Geologic Information

Geologic Units

This maps shows geologic units in the area. Please refer to the report for detailed descriptions.

Geologic Information

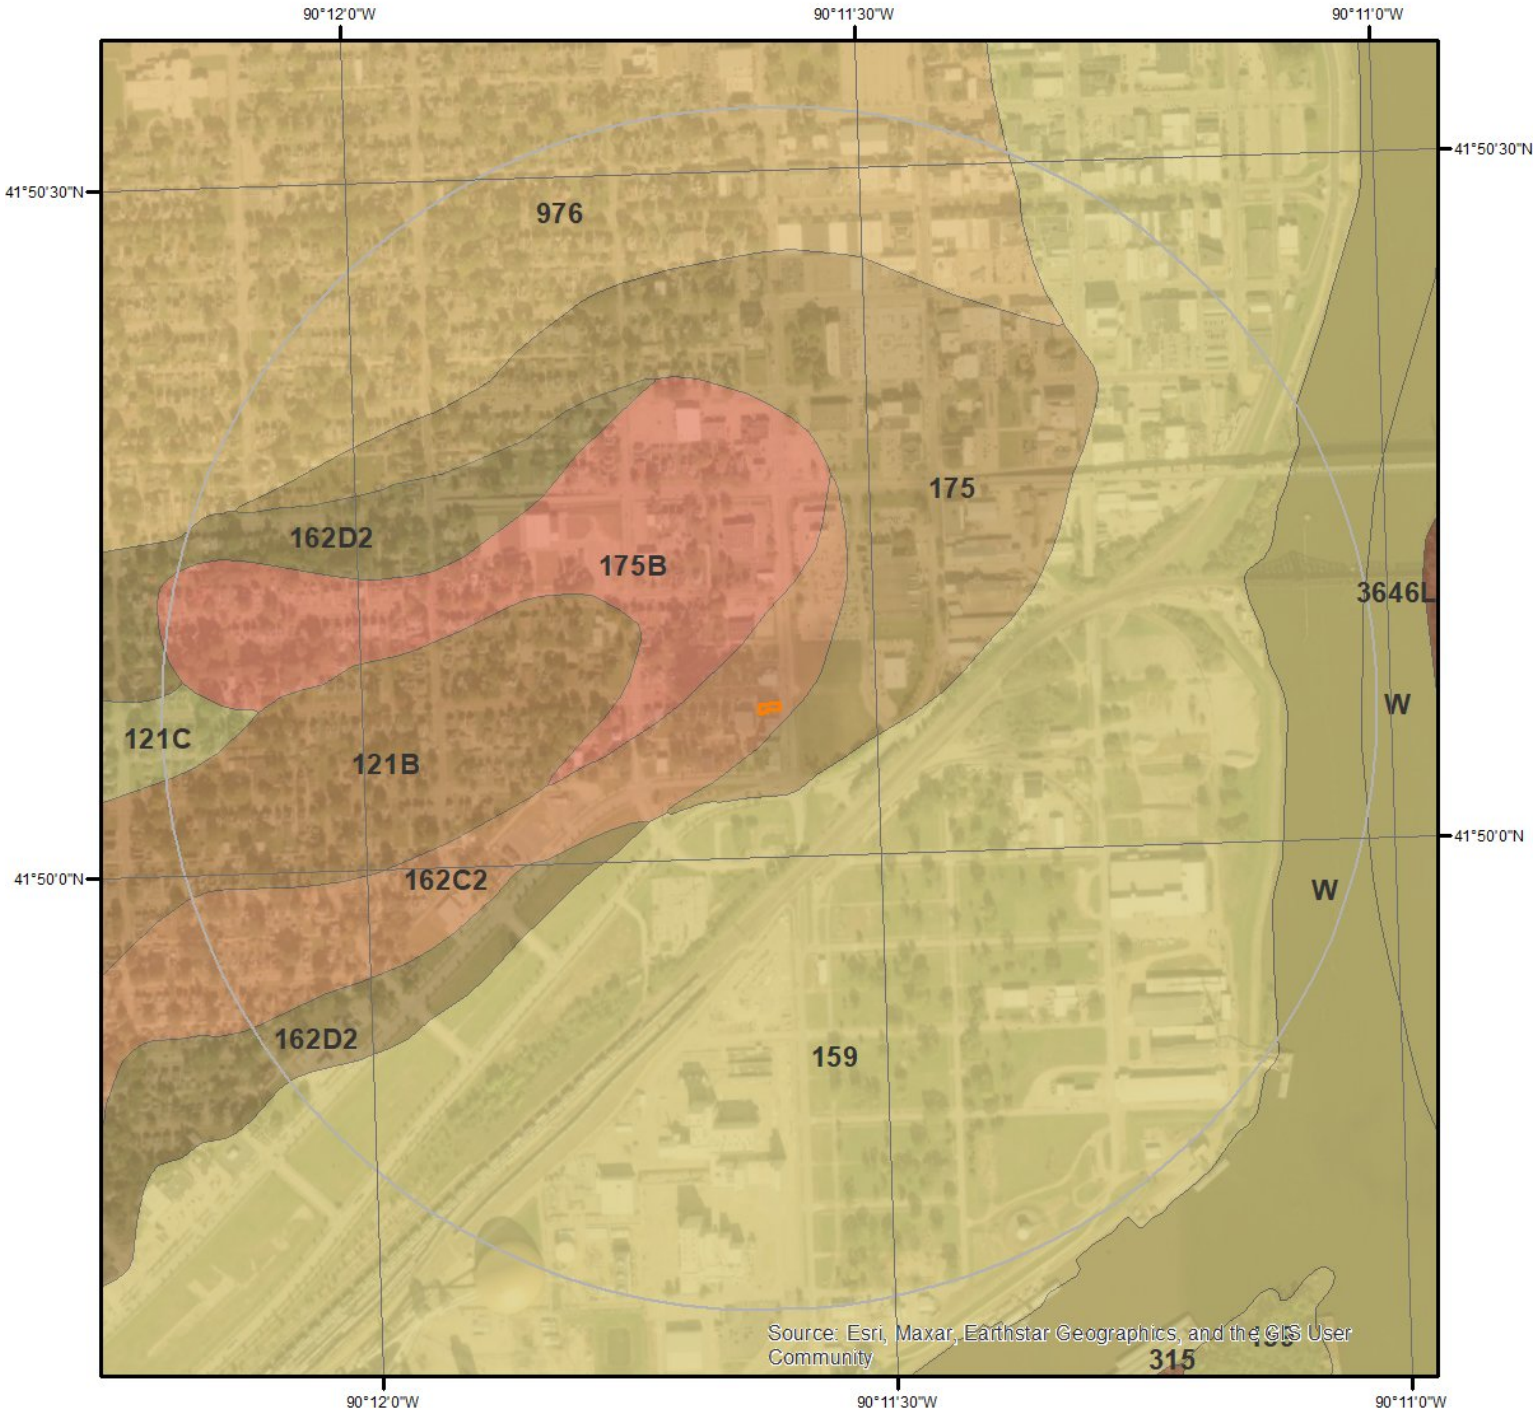
The previous page shows USGS geology information. Detailed information about each unit is provided below.

Geologic Unit Om

Unit Name:	Maquoketa Formation
Unit Age:	Phanerozoic | Paleozoic | Ordovician-Late [Cincinnatian]
Primary Rock Type:	shale
Secondary Rock Type:	dolostone (dolomite)
Unit Description:	Predominantly grayish-green shale in east-central area; predominantly brown dolomite and chert in the subsurface of north-central and western areas; red shale with limonite or hematite pellets (Neda) occurs locally at top.

Geologic Unit Sn

Unit Name:	Niagaran Series
Unit Age:	Phanerozoic | Paleozoic | Silurian
Primary Rock Type:	dolostone (dolomite)
Secondary Rock Type:	chert
Unit Description:	Gower Dolomite- LeClaire (reef phase) tough, greenish-blue dolomite; Anamosa (inner-reef) soft, yellowish-brown, thin-bedded dolomite. Hopkinton Dolomite- light colored dolomite with nodular chert.



Geologic Unit Sa

Unit Name:	Alexandrian Series
Unit Age:	Phanerozoic | Paleozoic | Silurian
Primary Rock Type:	dolostone (dolomite)
Secondary Rock Type:	chert
Unit Description:	Kankakee Formation- light colored dolomite; contains much interbedded chert. Approx thickness 155 ft. Englewood Dolomite- gray, sandy, silty, argillaceous dolomite. Approx thickness 55 ft

Geologic Unit 7390

Unit Name:	Maquoketa Group
Unit Age:	Ordovician
Primary Rock Type:	shale
Secondary Rock Type:	limestone
Unit Description:	Maquoketa Group

Soil Information

SSURGO Soils

N

This maps shows SSURGO soil units around the target property. Please refer to the report for detailed soil descriptions.

ERIS

Soil Information

The previous page shows a soil map using SSURGO data from USDA Natural Resources Conservation Service. Detailed information about each unit is provided below.

Map Unit 121B (1.37%)

Map Unit Name:	Tama silt loam, driftless, 2 to 6 percent slopes
Bedrock Depth - Min:	null
Watertable Depth - Annual Min:	null
Drainage Class - Dominant:	Well drained
Hydrologic Group - Dominant:	C - Soils in this group have moderately high runoff potential when thoroughly wet. Water transmission through the soil is somewhat restricted.

Major components are printed below

Tama(90%)

horizon Ap(0cm to 15cm)	Silt loam
horizon A(15cm to 36cm)	Silty clay loam
horizon BA(36cm to 46cm)	Silty clay loam
horizon Bt(46cm to 114cm)	Silty clay loam
horizon BC, C(114cm to 200cm)	Silt loam

Component Description:

Minor map unit components are excluded from this report.

Map Unit: 121B - Tama silt loam, driftless, 2 to 6 percent slopes

Component: Tama (90%)
The Tama component makes up 90 percent of the map unit. Slopes are 2 to 6 percent. This component is on ridges on uplands. The parent material consists of loess. Depth to a root restrictive layer is greater than 60 inches. The natural drainage class is well drained. Water movement in the most restrictive layer is moderately high. Available water to a depth of 60 inches (or restricted depth) is very high. Shrink-swell potential is moderate. This soil is not flooded. It is not ponded. There is no zone of water saturation within a depth of 72 inches. Organic matter content in the surface horizon is about 4 percent. Nonirrigated land capability classification is 2e. This soil does not meet hydric criteria.

Component: Muscatine (5%)
Generated brief soil descriptions are created for major soil components. The Muscatine soil is a minor component.

Component: Dinsdale (5%)
Generated brief soil descriptions are created for major soil components. The Dinsdale soil is a minor component.

Map Unit 121C (0.44%)

Map Unit Name:	Tama silt loam, driftless, 5 to 9 percent slopes
Bedrock Depth - Min:	null
Watertable Depth - Annual Min:	null
Drainage Class - Dominant:	Well drained
Hydrologic Group - Dominant:	C - Soils in this group have moderately high runoff potential when thoroughly wet. Water transmission through the soil is somewhat restricted.

Major components are printed below

Tama(90%)

horizon Ap(0cm to 15cm)	Silt loam
horizon A(15cm to 36cm)	Silty clay loam
horizon BA(36cm to 46cm)	Silty clay loam
horizon Bt(46cm to 114cm)	Silty clay loam
horizon BC, C(114cm to 200cm)	Silt loam

Soil Information

Component Description:

Minor map unit components are excluded from this report.

Map Unit: 121C - Tama silt loam, driftless, 5 to 9 percent slopes

Component: Tama (90%)
The Tama component makes up 90 percent of the map unit. Slopes are 5 to 9 percent. This component is on ridges on uplands. The parent material consists of loess. Depth to a root restrictive layer is greater than 60 inches. The natural drainage class is well drained. Water movement in the most restrictive layer is moderately high. Available water to a depth of 60 inches (or restricted depth) is very high. Shrink-swell potential is moderate. This soil is not flooded. It is not ponded. There is no zone of water saturation within a depth of 72 inches. Organic matter content in the surface horizon is about 4 percent. Nonirrigated land capability classification is 3e. This soil does not meet hydric criteria.

Component: Dinsdale (5%)
Generated brief soil descriptions are created for major soil components. The Dinsdale soil is a minor component.

Component: Tama (5%)
Generated brief soil descriptions are created for major soil components. The Tama soil is a minor component.

Map Unit 159 (5.29%)

Map Unit Name:	Finchford loamy sand, 0 to 2 percent slopes
Bedrock Depth - Min:	null
Watertable Depth - Annual Min:	null
Drainage Class - Dominant:	Excessively drained
Hydrologic Group - Dominant:	A - Soils in this group have low runoff potential when thoroughly wet. Water is transmitted freely through the soil.
Major components are printed below	
Finchford(100%)	
horizon H1(0cm to 79cm)	Loamy sand
horizon H2(79cm to 152cm)	Loamy sand

Component Description:

Minor map unit components are excluded from this report.

Map Unit: 159 - Finchford loamy sand, 0 to 2 percent slopes

Component: Finchford (100%)
The Finchford, rarely flooded component makes up 100 percent of the map unit. Slopes are 0 to 2 percent. This component is on stream terraces on river valleys. The parent material consists of sandy and gravelly alluvium. Depth to a root restrictive layer is greater than 60 inches. The natural drainage class is excessively drained. Water movement in the most restrictive layer is high. Available water to a depth of 60 inches (or restricted depth) is low. Shrink-swell potential is low. This soil is rarely flooded. It is not ponded. There is no zone of water saturation within a depth of 72 inches. Organic matter content in the surface horizon is about 2 percent. Nonirrigated land capability classification is 4s. This soil does not meet hydric criteria.

Map Unit 162C2 (0.44%)

Map Unit Name:	Downs silt loam, 5 to 9 percent slopes, moderately eroded
Bedrock Depth - Min:	null
Watertable Depth - Annual Min:	null
Drainage Class - Dominant:	Well drained
Hydrologic Group - Dominant:	C - Soils in this group have moderately high runoff potential when thoroughly wet. Water transmission through the soil is somewhat restricted.
Major components are printed below	
Downs(85%)	
horizon Ap(0cm to 20cm)	Silt loam

horizon BE(20cm to 43cm)	Silt loam
horizon Bt1, Bt2(43cm to 84cm)	Silty clay loam
horizon Bt3(84cm to 99cm)	Silt loam
horizon BC(99cm to 122cm)	Silt loam
horizon C(122cm to 200cm)	Silt loam

Component Description:

Minor map unit components are excluded from this report.

Map Unit: 162C2 - Downs silt loam, 5 to 9 percent slopes, moderately eroded

Component: Downs (85%)
The Downs, moderately eroded component makes up 85 percent of the map unit. Slopes are 5 to 9 percent. This component is on hillslopes on uplands. The parent material consists of loess. Depth to a root restrictive layer is greater than 60 inches. The natural drainage class is well drained. Water movement in the most restrictive layer is moderately high. Available water to a depth of 60 inches (or restricted depth) is very high. Shrink-swell potential is moderate. This soil is not flooded. It is not ponded. There is no zone of water saturation within a depth of 72 inches. Organic matter content in the surface horizon is about 3 percent. Nonirrigated land capability classification is 3e. This soil does not meet hydric criteria.

Component: Newvienna (5%)
Generated brief soil descriptions are created for major components. The Newvienna soil is a minor component.

Component: Downs (5%)
Generated brief soil descriptions are created for major components. The Downs soil is a minor component.

Component: Nasset (5%)
Generated brief soil descriptions are created for major components. The Nasset soil is a minor component.

Map Unit 162D2 (0.55%)

Map Unit Name:	Downs silt loam, 9 to 14 percent slopes, moderately eroded
Bedrock Depth - Min:	null
Watertable Depth - Annual Min:	null
Drainage Class - Dominant:	Well drained
Hydrologic Group - Dominant:	C - Soils in this group have moderately high runoff potential when thoroughly wet. Water transmission through the soil is somewhat restricted.

Major components are printed below

Downs(80%)

horizon Ap(0cm to 20cm)	Silt loam
horizon BE(20cm to 43cm)	Silt loam
horizon Bt1, Bt2(43cm to 84cm)	Silty clay loam
horizon Bt3(84cm to 99cm)	Silt loam
horizon BC(99cm to 122cm)	Silt loam
horizon C(122cm to 200cm)	Silt loam

Component Description:

Minor map unit components are excluded from this report.

Map Unit: 162D2 - Downs silt loam, 9 to 14 percent slopes, moderately eroded

Component: Downs (80%)
The Downs, moderately eroded component makes up 80 percent of the map unit. Slopes are 9 to 14 percent. This component is on hillslopes on uplands. The parent material consists of loess. Depth to a root restrictive layer is greater than 60 inches. The natural drainage class is well drained. Water movement in the most restrictive layer is moderately high. Available water to a depth of 60 inches (or restricted depth) is very high. Shrink-swell potential is moderate. This soil is not flooded. It is not ponded. There is no zone of water saturation within a depth of 72 inches. Organic matter content in the surface horizon is about 3 percent. Nonirrigated land capability classification is 3e. This soil does not meet hydric criteria.

Component: Newvienna (5%)

Soil Information

Generated brief soil descriptions are created for major components. The Newvienna soil is a minor component.

Component: Downs (5%)
Generated brief soil descriptions are created for major components. The Downs soil is a minor component.

Component: Nasset (5%)
Generated brief soil descriptions are created for major components. The Nasset soil is a minor component.

Component: Downs (5%)
Generated brief soil descriptions are created for major components. The Downs soil is a minor component.

Map Unit 175 (0.47%)

Map Unit Name:	Dickinson fine sandy loam, 0 to 2 percent slopes
Bedrock Depth - Min:	null
Watertable Depth - Annual Min:	null
Drainage Class - Dominant:	Well drained
Hydrologic Group - Dominant:	A - Soils in this group have low runoff potential when thoroughly wet. Water is transmitted freely through the soil.

Major components are printed below

Dickinson(95%)

horizon Ap(0cm to 23cm)	Fine sandy loam
horizon A(23cm to 46cm)	Fine sandy loam
horizon Bw(46cm to 76cm)	Fine sandy loam
horizon BC(76cm to 91cm)	Loamy sand
horizon C(91cm to 200cm)	Sand

Component Description:

Minor map unit components are excluded from this report.

Map Unit: 175 - Dickinson fine sandy loam, 0 to 2 percent slopes

Component: Dickinson (95%)
The Dickinson component makes up 95 percent of the map unit. Slopes are 0 to 2 percent. This component is on dunes on dissected till plains. The parent material consists of sandy eolian deposits. Depth to a root restrictive layer is greater than 60 inches. The natural drainage class is well drained. Water movement in the most restrictive layer is high. Available water to a depth of 60 inches (or restricted depth) is low. Shrink-swell potential is low. This soil is not flooded. It is not ponded. There is no zone of water saturation within a depth of 72 inches. Organic matter content in the surface horizon is about 2 percent. This component is in the R108CY506IA Sandy Upland Prairie Schizachyrium Scoparium-oenothera Rhombipetala (little Bluestem-fourpoint Evening Primrose) ecological site. Nonirrigated land capability classification is 3s. This soil does not meet hydric criteria. There are no saline horizons within 30 inches of the soil surface.

Component: Sparta (5%)
Generated brief soil descriptions are created for major soil components. The Sparta soil is a minor component.

Map Unit 175B (0.32%)

Map Unit Name:	Dickinson fine sandy loam, 2 to 5 percent slopes
Bedrock Depth - Min:	null
Watertable Depth - Annual Min:	null
Drainage Class - Dominant:	Well drained
Hydrologic Group - Dominant:	A - Soils in this group have low runoff potential when thoroughly wet. Water is transmitted freely through the soil.

Major components are printed below

Dickinson(95%)

horizon Ap(0cm to 23cm)	Fine sandy loam
horizon A(23cm to 46cm)	Fine sandy loam

horizon Bw(46cm to 76cm)	Fine sandy loam
horizon BC(76cm to 91cm)	Loamy sand
horizon C(91cm to 200cm)	Sand

Component Description:

Minor map unit components are excluded from this report.

Map Unit: 175B - Dickinson fine sandy loam, 2 to 5 percent slopes

Component: Dickinson (95%)
The Dickinson component makes up 95 percent of the map unit. Slopes are 2 to 5 percent. This component is on dunes on dissected till plains. The parent material consists of sandy eolian deposits. Depth to a root restrictive layer is greater than 60 inches. The natural drainage class is well drained. Water movement in the most restrictive layer is high. Available water to a depth of 60 inches (or restricted depth) is low. Shrink-swell potential is low. This soil is not flooded. It is not ponded. There is no zone of water saturation within a depth of 72 inches. Organic matter content in the surface horizon is about 2 percent. This component is in the R108CY506IA Sandy Upland Prairie Schizachyrium Scoparium-oenothera Rhombipetala (little Bluestem-fourpoint Evening Primrose) ecological site. Nonirrigated land capability classification is 3e. This soil does not meet hydric criteria. There are no saline horizons within 30 inches of the soil surface.

Component: Sparta (5%)
Generated brief soil descriptions are created for major soil components. The Sparta soil is a minor component.

Map Unit 976 (5.88%)

Map Unit Name:	Raddle silt loam, 0 to 2 percent slopes
Bedrock Depth - Min:	null
Watertable Depth - Annual Min:	null
Drainage Class - Dominant:	Well drained
Hydrologic Group - Dominant:	B - Soils in this group have moderately low runoff potential when thoroughly wet. Water transmission through the soil is unimpeded.

Major components are printed below

Raddle(100%)

horizon H1(0cm to 48cm)	Silt loam
horizon H2(48cm to 152cm)	Silt loam

Component Description:

Minor map unit components are excluded from this report.

Map Unit: 976 - Raddle silt loam, 0 to 2 percent slopes

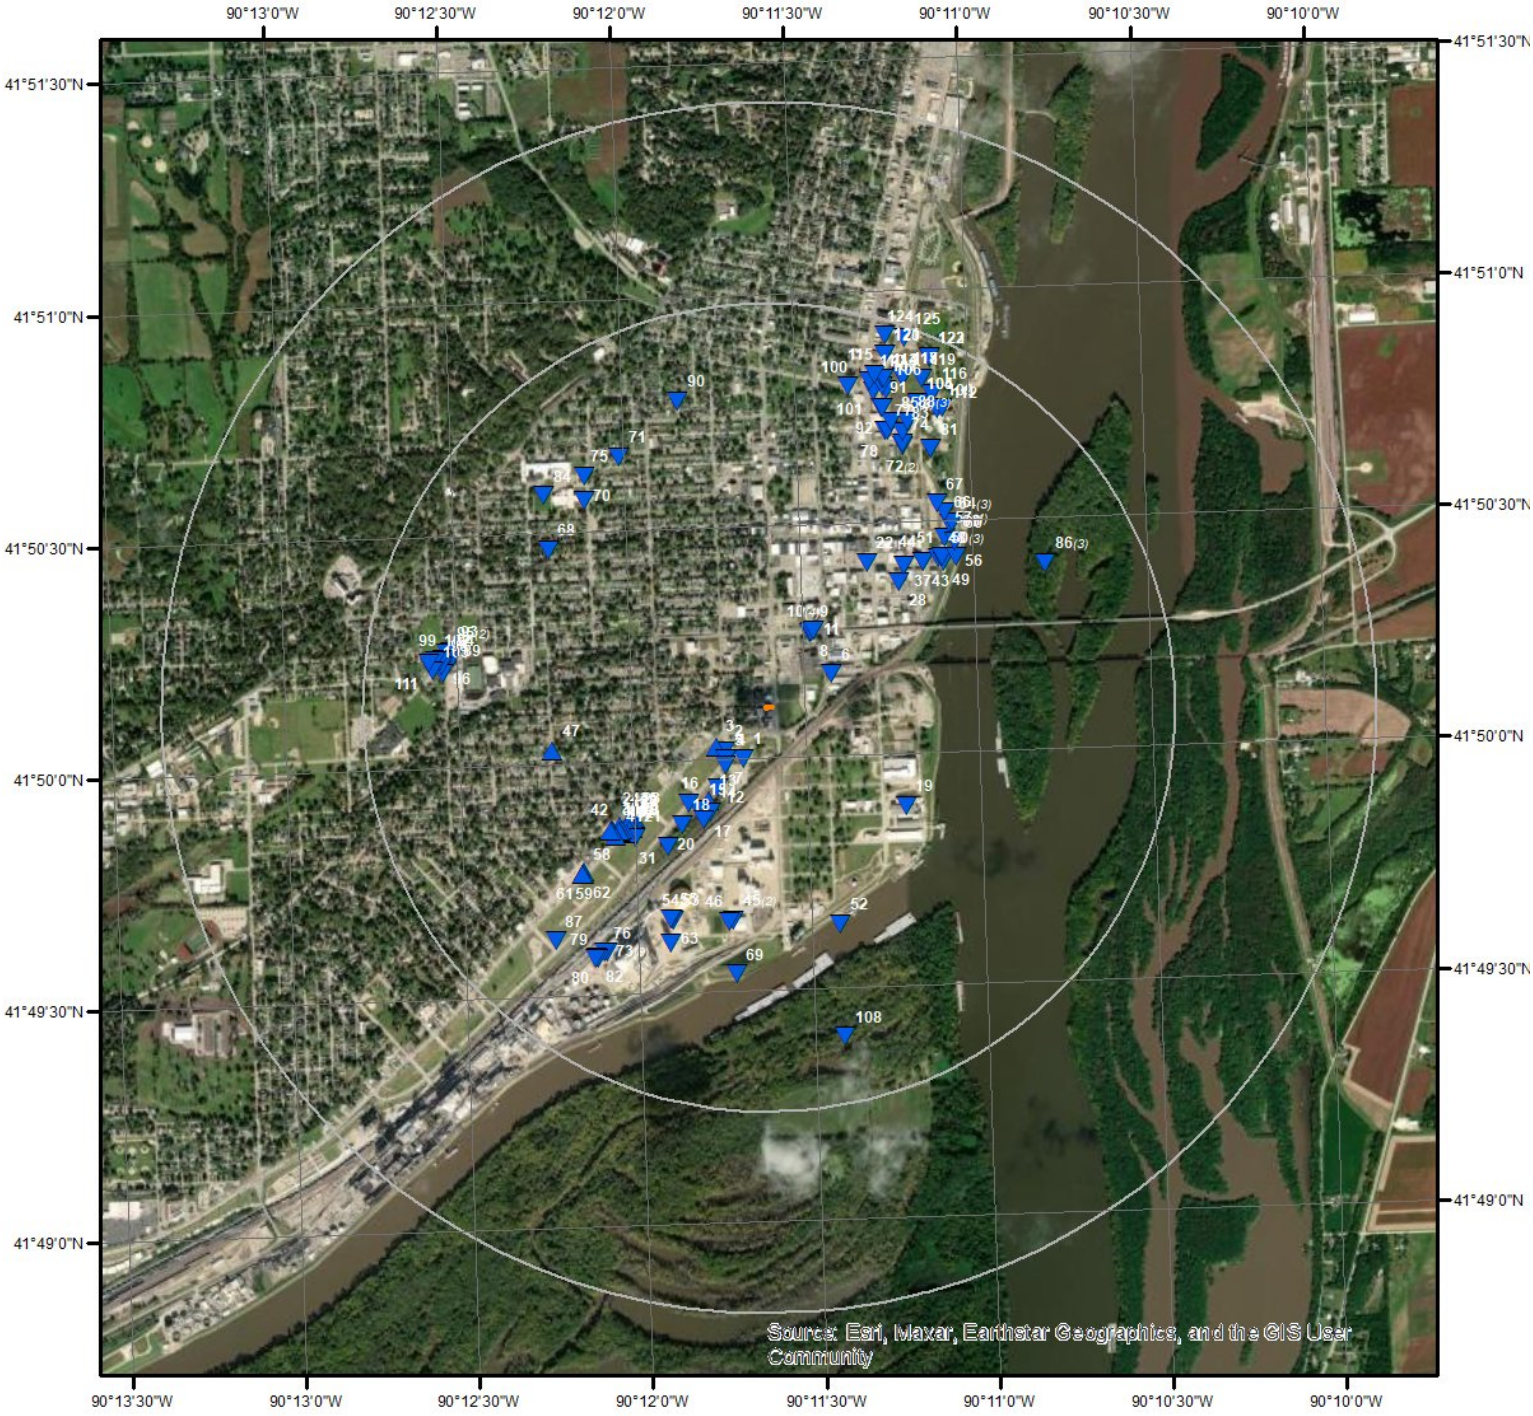
Component: Raddle (100%)
The Raddle component makes up 100 percent of the map unit. Slopes are 0 to 2 percent. This component is on stream terraces on river valleys. The parent material consists of silty alluvium. Depth to a root restrictive layer is greater than 60 inches. The natural drainage class is well drained. Water movement in the most restrictive layer is moderately high. Available water to a depth of 60 inches (or restricted depth) is very high. Shrink-swell potential is low. This soil is not flooded. It is not ponded. There is no zone of water saturation within a depth of 72 inches. Organic matter content in the surface horizon is about 4 percent. Nonirrigated land capability classification is 1. This soil does not meet hydric criteria.

Map Unit W (85.23%)

Map Unit Name:	Water

No more attributes available for this map unit

Component Description:



Minor map unit components are excluded from this report.

Map Unit: W - Water

Soil Information

Component: Water (100%)
Generated brief soil descriptions are created for major soil components. The Water is a miscellaneous area.

Radon Information

This section lists any relevant radon information found for the target property.

No Radon Zone Level records found for the project property or surrounding properties.

Zone 1: Counties with predicted average indoor radon screening levels greater than 4 pCi/L
Zone 2: Counties with predicted average indoor radon screening levels from 2 to 4 pCi/L
Zone 3: Counties with predicted average indoor radon screening levels less than 2 pCi/L

No Indoor Radon Data records found for the project property or surrounding properties.

Appendix

Federal Sources

FEMA National Flood Hazard Layer — **FEMA FLOOD**

The National Flood Hazard Layer (NFHL) data incorporates Flood Insurance Rate Map (FIRM) databases published by the Federal Emergency Management Agency (FEMA), and any Letters Of Map Revision (LOMRs) that have been issued against those databases since their publication date. The FIRM Database is the digital, geospatial version of the flood hazard information shown on the published paper FIRMs. The FIRM Database depicts flood risk information and supporting data used to develop the risk data. The FIRM Database is derived from Flood Insurance Studies (FISs), previously published FIRMs, flood hazard analyses performed in support of the FISs and FIRMs, and new mapping data, where available.

Indoor Radon Data — **INDOOR RADON**

Indoor radon measurements tracked by the Environmental Protection Agency(EPA) and the State Residential Radon Survey.

Public Water Systems Violations and Enforcement Data — **PWSV**

List of drinking water violations and enforcement actions from the Safe Drinking Water Information System (SDWIS) made available by the Drinking Water Protection Division of the US EPA's Office of Groundwater and Drinking Water. Enforcement sensitive actions are not included in the data released by the EPA. Address information provided in SWDIS may correspond either with the physical location of the water system, or with a contact address.

Radon Zone Level — **RADON ZONE**

Areas showing the level of Radon Zones (level 1, 2 or 3) by county. This data is maintained by the Environmental Protection Agency (EPA).

Safe Drinking Water Information System (SDWIS) — **SDWIS**

The Safe Drinking Water Information System (SDWIS) contains information about public water systems as reported to US Environmental Protection Agency (EPA) by the states. Addresses may correspond with the location of the water system, or with a contact address.

Soil Survey Geographic database — **SSURGO**

The Soil Survey Geographic database (SSURGO) contains information about soil as collected by the National Cooperative Soil Survey at the Natural Resources Conservation Service (NRCS). Soil maps outline areas called map units. The map units are linked to soil properties in a database. Each map unit may contain one to three major components and some minor components.

USGS Current Topo — **US TOPO**

US Topo topographic maps are produced by the National Geospatial Program of the U.S. Geological Survey (USGS). The project was launched in late 2009, and the term "US Topo" refers specifically to quadrangle topographic maps published in 2009 and later.

USGS Geology — **US GEOLOGY**

Seamless maps depicting geological information provided by the United States Geological Survey (USGS).

USGS National Water Information System — **FED USGS**

The U.S. Geological Survey (USGS)'s National Water Information System (NWIS) is the nation's principal repository of water resources data. This database includes comprehensive information of well-construction details, time-series data for gage height, streamflow, groundwater level, and precipitation and water use data.

Wells from NWIS — **FED USGS**

The U.S. Geological Survey's National Water Information System (NWIS) is the nation's principal repository of water resources data. The NWIS includes comprehensive information of well-construction details, time-series data for gage height, streamflow, groundwater level, and precipitation and water use data. This NWIW dataset contains select Site Types from the overall NWIS Sites data, limited to the following Group Site Types only: Groundwater Group Site Types: Well, Collector or Ranney type well, Hyporheic-zone well, Interconnected Wells, Multiple wells; Spring Group Site Type: Spring; and Other Group Site Types: Aggregate groundwater use, Cistern.

Appendix

State Sources

Oil and Gas Wells **OGW**

As of IA state regulatory agencies, FracTracker Alliance - state of Iowa confirmed not to have any active (drilled but not plugged) oil and gas wells.

Public Water Supply Wells **PWSW**

The Public Water Supply Wells (PWSW) data consist of all the community water supply wells in Iowa. This data was made available by Iowa Department of Natural Resources.

Water Well Database **WATER WELLS**

List of water well locations made available by the Iowa Department of Natural Resources. This listing is a compilation of records from various well databases including the Geologic Sampling Points database, the Safe Drinking Water Information System (SDWIS) Wells database, and the Water Allocation Compliance and Online Permitting (WACOP) database.

Liability Notice

Reliance on information in Report: The Physical Setting Report (PSR) DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as a review of environmental databases and physical characteristics for the site or adjacent properties.

License for use of information in Report: No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

Your Liability for misuse: Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

No warranty of Accuracy or Liability for ERIS: The information contained in this report has been produced by ERIS Information Inc. ("ERIS") using various sources of information, including information provided by Federal and State government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS Information Inc. disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

Trademark and Copyright: You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report(s) are protected by copyright owned by ERIS Information Inc. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

REPORT OF TITLE

BY REQUEST of Michelle Barnes

TO: Lynch Dallas, P.C.
526 2nd Avenue SE
Cedar Rapids, IA 52401

We furnish the following information of record in Clinton County, Iowa:

ABSTRACT NO. OR REFERENCE NO.: 134484

LEGAL DESCRIPTION: Lots seven (7) and eight (8) in block nineteen (19) in South Clinton in the City of Clinton, Iowa.

And

A part of lots nine (9) and ten (10) in block nineteen (19), South Clinton, within the City of Clinton, Iowa, described as follows: Commencing at the northeast corner of said lot ten (10); thence south along the easterly line of said lot ten (10), a distance of twenty-four (24) feet; thence west at right angles to the last described course, a distance of sixty (60) feet; thence south at right angles to the last described course, a distance of twelve (12) feet; thence west at right angles to the last described course, a distance of thirty (30) feet; thence north thirty-six (36) feet to the northerly line of said lots nine (9) and ten (10); thence east ninety (90) feet to the place of beginning.

PROPERTY ADDRESS: 413 10th Avenue South, Clinton, IA 52732

LAST GRANTEE, DEVISEE, OR HEIR OF RECORD: Daniel H. Keis and Margaret A. Keis, husband and wife, as joint tenants with full rights of survivorship and not as tenants in common, by Warranty Deed-Joint Tenancy dated April 3, 2008 and recorded April 7, 2008 at 2:16 P.M. as Instrument No. 2008-02595. Conveys: Lots 7 and 8 in block 19 in South Clinton in the City of Clinton, Iowa.

Daniel H. Keis, Jr. and Margaret A. Keis, husband and wife, as joint tenants with full rights of survivorship and not as tenants in common, by Warranty Deed (Corporate/Business Entity Grantor) dated August 29, 2008 and recorded August 29, 2008 at 10:13 A.M. as Instrument No. 2008-06567. Conveys: A part of lots 9 and 10 in block 19, South Clinton, within the City of Clinton, Iowa, described as follows: Commencing at the northeast corner of said lot 10; thence south along the easterly line of said lot 10 a distance of 24 feet; thence west at right angles to the last described course a distance of 60 feet; thence south at right angles to the last described course a distance of 12 feet; thence west at right angles to the last described course a distance of 30 feet; thence north 36 feet to the northerly line of said lots 9 and 10; thence east 90 feet to the place of beginning.

Daniel H. Keis, Jr. and Margaret A. Keis, husband and wife, as joint tenants with full rights of survivorship and not as tenants in common, by Corrective Quit Claim Deed dated March 17, 2015 and recorded March 20, 2015 at 3:57:29 P.M. as Instrument No. 2015-01813. Conveys: A part of lot_ 9 and 10 in block 19, South Clinton, within the City of Clinton, Iowa, described as follows: Commencing at the northeast corner of said lot 10; thence south along the easterly line of said lot 10 a distance of 24 feet; thence west at right angles to the last described course a distance of 60 feet; thence south at right angles to the last described course a distance of 12 feet; thence west at right angles to the last described course a distance of 30 feet; thence north 36 feet to the northerly line of said lots 9 and 10; thence east 90 feet to the place of beginning.

UNRELEASED MORTGAGES AND ASSIGNMENTS: Open-End Real Estate Purchase Money Mortgage (With Future Advance Clause) executed by Daniel H. Keis, Jr. and Margaret A. Keis, husband and wife, to Citizens First Bank, Clinton, Iowa in the principal sum of $100,000.00 dated April 7, 2008 and recorded April 7, 2008 at 2:18 P.M. as Instrument No. 2008-02596. This mortgage secures credit in the amount of $100,000.00. Loans and advances up to this amount, together with interest, are senior to indebtedness to other creditors under subsequently recorded or filed mortgages and liens. Upon: Real estate described in Warranty Deed recorded as Instrument No. 2008-02595. NOT SATISFIED.

COURT PROCEEDINGS, JUDGMENTS, LIENS, ETC.: None

1 SUMMARY

1.1 FINDINGS

Blackstone Environmental, Inc., (Blackstone) has completed a Phase I Environmental Site Assessment (ESA) of the property located at 413 10th Avenue South and former 1000 South 4th Street, City of Clinton Assessor Parcel Number (APN) 8059700000, located in Clinton, Clinton County, Iowa (Site).

The Phase I ESA was performed for East Central Intergovernmental Association (ECIA; the "Client") and the City of Clinton, to assess Site conditions, both past and present, for indications of recognized environmental conditions (RECs) prior to the potential purchase of the Site. The definition of REC is provided in Section 2.1. This report was prepared in general accordance with the ASTM Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process E1527-13, and All Appropriate Inquiries in general accordance with 40 Code of Federal Regulations (CFR) Part 312.

The Site totals approximately 0.374-acre in area and is developed with two buildings. The building located at 413 10th Avenue South is a 6,660 square foot metal warehouse that was constructed in 1976. This building is occupied by Central Siding Supply, a home improvement building materials distributor. The building formerly addressed as 1000 South 4th Street was constructed prior to 1885 and is approximately 4,400 square feet in area, two-stories, and was formerly used for retail purposes on the first floor and apartments on the second floor. This building is currently used by Central Siding Supply for storage of home improvement products and personal storage. The owner of 413 10th Avenue South purchased the property formerly addressed as 1000 South 4th Street in approximately 2011. At that time, the addresses were combined, and the address for both buildings is currently 413 10th Avenue South. Based on information provided by ECIA, it is Blackstone's understanding that the Site buildings are to be razed and the Site redeveloped.

North of the Site is 10th Avenue South followed by an apartment building. To the west of the building located at 413 10th Avenue South are residences. An alley and Central Siding Supply are located to the west of the former 1000 South 4th Street building. To the south of the building located at 413 10th Avenue South is an alley, warehouse for Central Siding Supply, and residences. South of the former 1000 South 4th Street building are attached vacant commercial/residential buildings. East of the building located at 413 10th Avenue South is an alley, the 1000 South 4th Street building and attached vacant commercial/residential buildings. To the east of the 1000 South 4th Street building is South 4th Street followed by vacant, grassed land.

Based on a review of the historical sources, the western portion of the Site (413 South 10th Avenue) was developed by at least 1885 with multiple residences. From 1890 through 1909, residences were demolished, and sheds and an icehouse were added. By 1950, the Site was developed with a residence and a shed. The current building was constructed in 1976 and was occupied by a beer distributor from development through the mid-1980s; insulating materials sales in the mid-1980s; auto sales and repair shop in the early 1990s; trucking company in the

© 2022 Blackstone Environmental, Inc.

mid-1990s; a residence in the early 2000s; and by Central Siding Supply and Illowa Storage from at least 2008 through the present. The former use of this building as an auto repair shop is considered a REC.

Historical resources indicate the eastern portion of the Site (1000 South 4th Street) was developed by at least 1885 with the current building that was occupied by a grocery store from the 1920s through the 1950s and in the 1980s, and a laundromat from the 1960s through the 2000s. From approximately 2011 to the present, the Site building has been used for storage for Central Siding Supply and personal storage of the property owner.

Historical city directories indicate the surrounding areas were developed with residential properties and retail businesses beginning in at least 1885 through 2020. Businesses have included a beer distributor, bookstore, video store, ministry, restaurants, taverns, employment services, upholstering, custom furniture, used clothes store, barber, warehouse, pharmacies, offices, hardware store, beauty shop, grocery, laundromat, and gasoline stations. Two gasoline stations were located adjacent and east of the Site from at least 1937 through the 1970s. Based on their regulatory status and the downgradient direction from the Site, the gas stations are not considered RECs.

During the Site reconnaissance, the building located at 413 10th Avenue South was observed to be a metal warehouse used for storage of building materials and an office. The building located at 1000 South 4th Street was observed to be two-story with a basement. Storage of building materials and personal belongings were observed on the first and second floor. A brick lined cistern and evidence of a vent pipe potentially associated with underground storage tanks (USTs) were observed in the basement of the building. The presence of the suspected UST is considered a REC to the Site.

A Phase I ESA and Phase II ESA, dated 2018, were provided by ECIA for the properties located at 1000 – 1006 South 4th Street in Clinton, Iowa. The reports include the Site building located along South 4th Street that was formerly addressed as 1000 South 4th Street. However, the reports do not include the Site building addressed as 413 10th Avenue South. The suspected UST and cistern were identified as RECs. The report identified the building at 413 10th Avenue South as a REC as it was identified as a former auto repair/auto sales shop from 1987 through 1992.

The Phase II ESA was conducted to assess the RECs identified in the Phase I ESA. According to the report, due to Site constraints, soil samples were not collected from the area of the suspected UST and cistern. The two closest borings to the suspected UST and cistern were approximately 40 and 65 feet away. Two borings were advanced near 1000 South 4th Street to the east and west of the building. The borings were advanced to 11 feet below ground surface (bgs) when refusal was encountered. Groundwater was not encountered in the borings. Soil samples were collected for the analysis of Resource Conservation and Recovery Act (RCRA) 8 metals, volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs), and total extractable hydrocarbons (TEH). VOCs, SVOCs, and TEH were not detected at concentrations above the laboratory detection limit. RCRA 8 metals were detected in the samples at

© 2022 Blackstone Environmental, Inc.

concentrations below the Iowa Statewide Standards. Further action was not recommended. However, based on the distance of the borings from the suspected UST and cistern (40 and 60 feet away) and that soil and groundwater samples were not obtained, the suspected areas of concern that may have impacted soil and groundwater do not appear to have been adequately assessed.

Based on the age of the Site buildings (over 44 years and over 100 years), it is possible that asbestos containing materials (ACM) and lead-based paint (LBP) are present. During the Site reconnaissance, suspect ACM that was observed included floor tiles and linoleum. Suspected LBP was observed in windowsills throughout the building.

The Site building addressed as 1000 South 4th Street was identified on the environmental database report as a Federal Brownfields facility in 2019. The database indicated a vent pipe and fill port were identified in the basement of the building and the adjacent property was used historically for auto repair. The possible presence of an UST at the Site is considered a REC. Other facilities identified on the environmental database are not considered concerns due to their regulatory status, and/or distance and direction from the Site.

Based on information obtained from historical records, environmental databases, Site reconnaissance, and interviews, RECs associated with the Site were not identified, except for the following:

- The presence of a suspected UST in the former 1000 South 4th Street building.
- The former use of the building located at 413 10th Avenue South as auto repair.
- The possible presence of a vapor encroachment condition at the Site.

The following table summarizes information reviewed in this report:

Report Component	Sec.	REC	CREC	HREC	*De Min*	Non-ASTM	Further Action	Comments
Current Property Use	**2.6**						**No**	
Adjacent Properties	**2.6.4**						**No**	
Historical Review	**4.5**						**Yes**	Additional assessment recommended
Previous Reports	**3.2**					**X**	**Yes**	ACM is present in the Site building. ACM should be removed by a licensed ACM abatement company prior to demolition.
User Provided Information	**3**						**No**	
Regulatory Database Review	**4.2**						**No**	
Site Reconnaissance:	**5**						**No**	
• Hazardous Materials	**5**						**No**	
• Petroleum Materials	**5**						**No**	
Vapor Encroachment Screen	**6**	**X**					**Yes**	Additional assessment recommended
Interviews	**7**						**No**	
ASTM Non-Scope:								
Lead Based Paint	**5.3**					**X**	**No**	Removal of LBP is not required in Iowa prior to demolition.
Asbestos	**5.3**					**X**	**Yes**	ACM is present in the Site building. ACM should be removed by a licensed ACM abatement company prior to demolition.

HREC = Historical REC
DeMin = *De minimus* Condition

Additional information leading to these conclusions is contained throughout this report and summarized in Section 8.

2 INTRODUCTION

The following report presents a summary of work performed in general accordance with guidelines of the ASTM Standard Practice for Environmental Assessments: Phase I Environmental Assessment Process (ASTM Standard Practice E 1527-13, hereinafter referred to as the "Standard Practice"). The work has also been performed in general accordance with the All Appropriate Inquiry (AAI) section of the Small Business Liability Relief and Brownfields Revitalization Act (AAI – 40 CFR Part 312).

2.1 PURPOSE

The purpose of this Phase I ESA is to identify recognized environmental conditions (RECs) related to the Site, to the extent feasible pursuant to the scope of services defined in our proposal dated April 11, 2022, and limitations discussed in this report. As defined in the Standard Practice, a REC is:

The presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. De minimis conditions are not recognized environmental conditions.

ASTM defines the term historic recognized environmental condition (HREC) to mean the presence of an environmental condition which in the past would have been considered a REC but is not an REC at the time of the Phase I ESA since the condition has been addressed to the satisfaction of the applicable regulatory authority or meets unrestricted use criteria established by a regulatory authority (and not subjecting the property to any required controls such as property use restrictions, institutional controls, etc.). This can be the result of remedial actions in compliance with regulatory requirements or the evaluation of RECs to the satisfaction of the environmental professional.

ASTM defines the term controlled recognized environmental condition (CREC) to mean a REC resulting from past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).

ASTM defines *de minimis* conditions as those that "generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies," i.e., minor soil or concrete staining.

2.2 DETAILED SCOPE OF SERVICES

This Phase I ESA was performed in general accordance with our proposal dated March 21, 2022, the Standard Practice, and AAI as reflected in the scope of this report. The scope of services included identification of the level of services desired by the Client based on the purpose for performing the Phase I ESA, and developing information to identify RECs in connection with the Site by gathering user-provided information, obtaining and reviewing regulatory databases, reviewing historical and physical records, conducting interviews, initiating local governmental inquiries, and conducting a visual, noninvasive reconnaissance of the Site and adjoining properties. Limitations, deviations from the ASTM Standard Practice, and data gaps, if evident, are discussed herein.

This Phase I ESA report does not incorporate additional services that are non-scope considerations relative to the Standard Practice. Non-scope considerations as defined by the Standard Practice include radon, lead in drinking water, wetlands, regulatory compliance, vapor intrusion assessment, cultural and historical resources, endangered species, indoor air quality, high voltage power lines, etc.

2.3 SIGNIFICANT ASSUMPTIONS

This Phase I ESA has been performed in general accordance with the Standard Practice. As indicated in the Standard Practice, no environmental site assessment can wholly eliminate uncertainty regarding the potential for recognized environmental conditions in connection with a property. This assessment is intended to reduce, but not eliminate uncertainty regarding the potential for recognized environmental conditions in connection with a property and recognized reasonable limits of time and cost.

It should be noted that portions of this Phase I ESA report are based on unverified information supplied to Blackstone by third-party sources. Efforts have been made to substantiate third-party information; however, Blackstone cannot guarantee its completeness or accuracy.

2.4 LIMITATIONS, EXCEPTIONS, AND DATA FAILURE

The work described herein was performed in accordance with the proposed scope of services approved by our Client. Environmental issues not specifically addressed in this report, such as services for subsurface or other invasive assessments, or evaluation of business environmental risk, were beyond the scope of our services and not included in our evaluation. Blackstone has performed the services in a manner consistent with that level of care and skill ordinarily exercised by other members of our profession currently practicing in the same locality and under similar conditions, within the limitations of the Standard Practice and the AAI Rule established by the U.S. Environmental Protection Agency (40 CFR Part 312). Blackstone has endeavored to meet this standard of care but may have been limited by conditions encountered during performance, or inability to review information not received by the report date. When appropriate, such

© 2022 Blackstone Environmental, Inc.

limitations are discussed in the report relative to their significance with respect to our findings. No warranties, express or implied, are intended or made.

Limitations identified herein must be considered when the user of this report formulates opinions regarding risks associated with the Site. Additional research and assessment may be performed to further evaluate risks, if requested by the Client. Blackstone will, upon request, advise the Client of additional research or assessment options that may be available at an additional cost.

Although Blackstone attempted to obtain reasonably ascertainable information regarding the Site, some information was either not received or not readily available at the time of this report, or a data failure leading to certain information being considered not reasonably ascertainable occurred. The following data gaps were identified:

- A title report/lien search was not provided for review.
- As of the date of this report, a response from the City of Clinton for a request for records has not been received.

The data gaps are not considered a significant due to other records reviewed.

2.5 USER RELIANCE

This Phase I ESA report has been prepared for the exclusive use of ECIA and the City of Clinton. No entities other than ECIA and the City of Clinton may rely on this report without the express written consent by Blackstone, ECIA, and the City of Clinton. Unless specifically agreed to in advance by Blackstone, non-compliance with this requirement will release Blackstone from any liability resulting from the use of this report by any unauthorized party. Because Site activities and regulations beyond our control could change at any time after the completion of this report, our observations, findings, and opinions can be considered reliable as of the date of the Site visit but may be limited by material changes in Site circumstances.

2.6 SITE DESCRIPTION

The Site description is presented in this section and describes the condition of the Site at the time of the Phase I ESA. The Site location is shown on Figure 1.

2.6.1 LOCATION DESCRIPTION

TABLE 2-1 SITE DESCRIPTION INFORMATION

Attribute	Information
SITE NAME	Keis Property
ADDRESS/LOCATION	413 10th Avenue South and former 1000 South 4th Street, Clinton, Clinton County, Iowa

City of Clinton Assessor Information (https://www.clintonco.illinois.gov/county-offices/gis/)	APN 8059700000	Address 413 10th Avenue South	Total Acres 0.374
TOTAL AREA	Approximately 0.37 acres		
LAND USE	413 10th Avenue – home improvement building materials distributor Former 1000 South 4th Street - home improvement products and personal items storage		

2.6.2 SITE AND VICINITY GENERAL CHARACTERISTICS

The Site is approximately 0.374-acre in area and developed with two buildings. The building addressed as 413 10th Avenue South is a 6,660 square foot metal warehouse that was constructed in 1976. This building is occupied by Central Siding Supply, a home improvement building materials distributor. The building located at 1000 South 4th Street was constructed between 1864 and 1900 and is approximately 4,400 square feet in area, two-stories, and was formerly used for retail purposes on the first floor and apartments on the second floor. It is currently used by Central Siding Supply for storage of home improvement building materials and personal items.

2.6.3 CURRENT/PROPOSED USE OF THE PROPERTY

TABLE 2-2 CURRENT/PROPOSED USES

Use	General Observations
CURRENT USE	Home improvement distributor and storage
PROPOSED USE	Demolition and unknown redevelopment

2.6.4 CURRENT USES OF ADJOINING PROPERTIES

Blackstone performed a brief drive-by survey of the properties immediately adjoining the Site on June 3, 2022. Table 2-3 summarizes the observed current use of the adjoining properties.

TABLE 2-3 ADJOINING PROPERTIES

Direction	Land Use Description
NORTH	10th Avenue South, apartment building (924-926 South 4th Street), and residences (412 and 416 South 4th Street)
SOUTH (413 10th Avenue)	Alley and storage building for Central Siding Supply (410 ½ 11th Avenue South)
SOUTH (1000 South 4th Street)	Vacant commercial/apartment buildings (1002 – 1020 South 4th Street)
EAST (413 10th Avenue)	Alley, building used by Central Siding Supply for storage (1000 South 4th Street) and vacant commercial/apartment buildings (1002 – 1008 South 4th Street)
EAST (1000 South 4th Street)	South 4th Street followed by vacant grassed land

© 2022 Blackstone Environmental, Inc.

TABLE 2-3 ADJOINING PROPERTIES

Direction	Land Use Description
WEST (413 10th Avenue)	Residences (421 and 423 10th Avenue South)
WEST (1000 South 4th Street)	Alleyway, Central Siding Supply (413 10th Avenue South) and residences (421 and 423 10th Avenue South)

Obvious indications of RECs associated with hazardous substances or petroleum products were not observed on adjoining properties.

2.7 GREEN AND SUSTAINABLE EFFORTS

Green and Sustainable Remediation (GSR) techniques were implemented during this Phase I ESA and include carpooling to the Site and submitting electronic reports as pdfs instead of printing.

3 USER PROVIDED INFORMATION

3.1 PHASE I ESA ENVIRONMENTAL QUESTIONNAIRE

A Phase I ESA Environmental Questionnaire was completed by Ms. Dawn Danielson, Brownfield Program Manager for ECIA, and Tammy Johnson, City of Clinton Code Enforcement Officer, representing the "Users" of this Phase I ESA. The owner of the property also completed the Environmental Questionniare. A copy of the completed questionnaires are included in Appendix D. Responses to User questions relative to AAI are summarized in the following sections.

3.1.1 REASON FOR PHASE I ESA

ECIA and the City of Clinton indicated that the Phase I ESA was ordered to identify possible environmental concerns at the Site. The owner indicated the City is in the process of redevelopment of the block along with demolition.

3.1.2 CURRENT AND FUTURE USE OF THE PROPERTY

ECIA stated the Site was vacant and the building on South 4th Street was to be abated and possibly demolished to make the Site ready for reuse.

The City of Clinton indicated the Site buildings are used for storage. The future plan is to demolish the entire block and market the area for redevelopment.

The owner stated the future use of the Site was "redevelopment."

3.1.3 TITLE RECORDS

A Chain of Title report was not provided for Blackstone review and the generation of such was not included in our scope of services. The City of Clinton, ECIA, and the owner had not obtained a title search for the Site.

3.1.4 ENVIRONMENTAL LIENS OR ACTIVITY USE LIMITATIONS

ECIA, the City of Clinton, and the owner were not aware of Environmental Liens or Activity Use Limitations on the Site.

3.1.5 SPECIALIZED KNOWLEDGE

ECIA, the City of Clinton, and the owner indicated they did not have specialized knowledge of the Site.

3.1.6 VALUATION REDUCTION FOR ENVIRONMENTAL ISSUES

The City of Clinton and the owner indicated this question was not applicable. ECIA was not sure of the purchase price.

3.1.7 REASONABLY ASCERTAINABLE INFORMATION

ECIA and the City of Clinton were not aware of the past use of the Site. The owner stated the Site was used for storage and laundry mat.

3.1.8 OBVIOUS INDICATORS OF CONTAMINATION AT THE SITE

ECIA stated that based on the age of the building, asbestos may be present. A previous report indicated an UST may have been present at the 1000 South 4th Street building.

The City of Clinton and the owner were not aware of obvious indicators of contamination at the Site.

3.2 PREVIOUS REPORTS

A Phase I ESA and a Phase II ESA, dated 2018, were provided by ECIA for the properties located at 1000 – 1006 South 4th Street in Clinton, Iowa. The reports include the Site building located along South 4th Street that was formerly addressed as 1000 South 4th Street. However, the reports do not include the Site building addressed as 413 10th Avenue South.

The Phase I ESA was conducted by Impact 7G for the City of Clinton and was dated February 28, 2018. The report stated that the building addressed as 1000 South 4th Street was constructed in approximately 1864. A vent pipe and fill port typically associated with suspected USTs was observed in the basement of the building. Information regarding the date of installation or use was not identified, but it was assumed to be a heating oil UST. A brick-lined well or cistern was also identified in the basement that was filled with historic debris. The suspected UST and cistern were identified as RECs. The report also identified 413 10th Avenue South as a REC as it was identified as a former auto repair/auto sales shop from 1987 through 1992. Additional investigation was recommended to assess the identified RECs.

The Phase II ESA was conducted by Impact 7G for ECIA to assess the RECs in the Phase I ESA and was dated December 12, 2018. According to the report, due to Site constraints, soil samples were not collected from the area of the suspect UST and cistern. The two closest borings to the suspected UST and cistern were approximately 40 and 65 feet away. Two borings were advanced near 1000 South 4th Street to the east and west of the building. The borings were advanced to 11 feet bgs when refusal was encountered. Groundwater was not encountered in the borings. Soil samples were collected from the borings at depths of between 0 and 2 feet bgs for the analysis of Resource Conservation and Recovery Act (RCRA) 8 metals and 7 to 9 feet bgs for the analysis of volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs), and total

© 2022 Blackstone Environmental, Inc.

extractable hydrocarbons (TEH). VOCs, SVOCs, and TEH were not detected at concentrations above the laboratory detection limit. RCRA 8 metals were detected in the samples at concentrations below the Iowa Statewide Standards. Further action was not recommended.

4 RECORDS REVIEW

4.1 PHYSICAL SETTING SOURCE(S)

Table 4-1 presents information about the physical setting of the Site and surrounding area. This information was obtained from published maps and other resources.

TABLE 4-1 PHYSICAL SETTING FOR SITE AND SURROUNDING AREA

PHYSICAL SETTING INFORMATION		SOURCE
Topography		
Site Elevation	600 feet above mean sea level	Environmental Risk Information Services (ERIS) Physical Setting Report dated May 25, 2022
Topographic Gradient	The general topographic gradient in the area of the Site is to the southeast.	
Closest Surface Water	Mississippi river located approximately 2,200 feet to the east of the Site.	
Soil Characteristics		
Soil Types	Downs silt loam	ERIS Physical Setting Report dated May 25, 2022
Description	Soils in this group have moderately high runoff potential when thoroughly wet. Water transmission through the soil is somewhat restricted.	
Hydrogeology		
Geology	Unit Name: Alexandrian Series Unit Age: Phanerozoic, Paleozoic, Silurian Primary Rock Type: dolostone Secondary Rock Type: chert	ERIS Physical Setting Report dated May 25, 2022
Estimated Depth to groundwater	Over 11 feet below ground surface (bgs).	Phase II ESA by Impact 7G dated December 12, 2018
*Hydrogeology**	Not known – expected to be parallel to topographic gradient (towards the southeast)	United States Geological Survey Topographic Map, Clinton, Iowa, dated 2015

**The groundwater flow direction may be expected to follow topography with respect to shallow unconfined groundwater: however, in the absence of site-specific monitoring well information, groundwater flow direction cannot be definitively determined.*

4.2 STANDARD ENVIRONMENTAL RECORD SOURCES

Federal, state, and local regulatory agencies publish databases or lists of businesses and properties that handle hazardous substances or petroleum products or are the known location of a release of hazardous substances to soil and/or groundwater. Blackstone contracted a commercial database service, ERIS, of Ontario, Canada to perform the government database search.

A description of the types of information contained in each of the databases reviewed, the agency responsible for compiling the data, and date each database was last updated is included in the radius map report located in Appendix C. Table 4-2 below lists the databases within the ASTM minimum search distances from the Site.

TABLE 4-2 RECORDS REVIEW, SEARCH DISTANCE, AND FINDINGS

Database	Description	Radius (Miles)	Listings Reported
Federal			
NPL	EPA National Priority List (NPL) – EPA's list of uncontrolled or abandoned hazardous waste facilities listed for priority services under the Superfund Program.	1.0	0
NPL (Delisted)	The NPL Delisted refers to facilities that have been removed from the NPL.	1.0	0
CERCLIS	The Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS) database includes facilities that EPA has or is currently investigating for a release or threatened release of hazardous substances.	0.5	0
CERCLIS/ NFRAP	CERCLIS-No Further Remedial Action Planned (NFRAP). No further remedial action planned after EPA investigation.	0.5	0
RCRA CORRACTS/ TSD	EPA list of Resource Conservation Recovery Act (RCRA) facilities associated with treatment, storage or disposal of hazardous waste that are undergoing corrective action. Corrective Action is required when there has been a "release" of hazardous waste constituents into the environment.	1.0	0
RCRA Non-CORRACTS/ TSD	EPA list of facilities that report treatment, storage, or disposal of hazardous waste, that are not subject to Corrective Action under RCRA.	0.5	0
RCRA Generators	EPA database of facilities that generate hazardous waste as part of their normal business practice; generators of hazardous waste are regulated under RCRA. Generators are either small quantity generators (SQG), large quantity generators (LQG), or conditionally exempt small quantity generators (CESQG).	0.25	2

TABLE 4-2 RECORDS REVIEW, SEARCH DISTANCE, AND FINDINGS

Database	Description	Radius (Miles)	Listings Reported
US ENG/INST CONTROLS (IC/EC)	EPA listings of sites with institutional controls (deed restrictions, use restrictions, etc.), or engineering controls (caps, liners, etc.), which include administrative or physical controls for waste/contamination and/or to restrict potential exposure to contamination.	0.5	0
ERNS	The Emergency Response Notification System (ERNS) is an EPA list of reported releases of oil and hazardous substances.	Site	0
State			
SHWS	State and tribal equivalent CERCLIS sites.	1.0	0
SWF/LF	State/tribal database of solid waste facilities.	0.5	2
LUST/LAST	State/tribal database of leaking underground and above-ground storage tanks.	0.5	12
UST/AST	State/tribal database of registered storage tanks.	0.25	10
IA INST CONTROL	Sites having institutional controls in the state of Iowa.	0.5	0
CONT	State/tribal facilities included in the Iowa Land Recycling Program.	0.5	9
Brownfields	State/tribal listing of Brownfield properties.	0.5	28

4.3 ADDITIONAL ENVIRONMENTAL RECORD SOURCES

In addition to the above ASTM-required databases, Blackstone reviewed other federal, local, and proprietary databases that are included by ERIS in their report. The additional records/databases searched are included in ERIS' report in Appendix C. The additional environmental record sources were used by Blackstone in our assessment of potential RECs.

4.4 RESULTS OF DATABASE SEARCH

The findings provided in the ERIS report within the ASTM-specified search distances were reviewed and pertinent findings are discussed below. The following table summarizes the site-specific information provided by the database for the Site (if applicable) and nearby identified facilities. Information for all listed facilities is included in Appendix C.

TABLE 4-3 DATABASE SEARCH RESULTS

DATABASE LISTINGS	FACILITY NAME/ADDRESS	REC (Y/N)
Facility Registry Service/Facility Index (FINDS/FRS) and Federal Brownfields	1000 South 4th Street	Yes
The Site building addressed as 1000 South 4th Street was identified on the FINDS/FRS and Federal Brownfields database in 2019. The database indicated a vent pipe and fill port were identified in the basement of the building and the adjacent property was used historically for auto repair. The possible presence of an UST at the Site is considered a REC.		
FINDS/FRS and Federal Brownfields	1002 South 4th Street	No
This property is located adjacent south of the Site and was identified on the FINDS/FRS and Federal Brownfields database in 2018. The database indicated the building was constructed in 1868 and was most recently used as a rental property. It was listed as vacant and in foreclosure. The City of Clinton plans to demolish the buildings and redevelop the Site for commercial use. Environmental concerns were not identified in the databases and therefore, the property is not considered a REC to the Site.		
FINDS/FRS and Federal Brownfields	1004 South 4th Street	No
This property is located adjacent south of the Site and was identified on the FINDS/FRS and Federal Brownfields database in 2018. The database indicated the building is vacant and has been abandoned. The City of Clinton plans to demolish the buildings and redevelop the Site for commercial use. Environmental concerns were not identified in the databases and therefore, the property is not considered a REC to the Site.		
FINDS/FRS and Federal Brownfields	1006-1008 South 4th Street	No
This property is located adjacent south of the Site and was identified on the FINDS/FRS and Federal Brownfields database in 2018. The database indicated the building was constructed in 1900. Environmental concerns were not identified in the databases and therefore, the property is not considered a REC to the Site.		
UST	Dillions One Stop 1001 South 4th Street	No
The listing is for a former gasoline station located less than 100 feet east and cross to downgradient from the Site. According to information reviewed on the Iowa Department of Natural Resources (IDNR) website, the former facility operated four 6,000-gallon USTs that contained gasoline and diesel that were installed in 1969 and removed in 1996. Two 500-gallon USTs were also present with unknown contents. These USTs were installed on an unknown date and were removed in 1996. The USTs received a No Further Action letter from the IDNR on November 27, 1996. The facility was not identified as having a leak. Based on the regulatory status and the cross to downgradient location from the Site, the property is not considered a REC.		
FINDS/FRS and UST	James Rasmussen 410 11th Avenue South	No
This property is located approximately 140 feet south of and crossgradient to the Site. It was identified on the FINDS/FRS and UST databases. The database indicated a 500-gallon UST was installed on the property in 1949 and ceased operations in 1977. The UST was filled in place in 1989. The IDNR online database indicates the UST contained gasoline and was issued a No Further Action letter on December 1, 1989. The property was not identified as having a leak. Based on the regulatory status and the crossgradient location from the Site, the property is not considered a REC to the Site.		
FED Brownfields	Delbert and Colleen Temple Properties 421 and 423 11th Avenue South	No

TABLE 4-3 DATABASE SEARCH RESULTS

DATABASE LISTINGS	FACILITY NAME/ADDRESS	REC (Y/N)
This property is located approximately 150 feet south of and downgradient to the Site and was identified on the Federal Brownfields database in 2004. The database indicated a Phase I ESA was conducted. The property was originally residential but then was commercially developed. Environmental concerns were not identified in the database and therefore, the property is not considered a REC to the Site.		
Fed Brownfields	411 and 415 11th Avenue South	No
This property is located approximately 150 feet south of and downgradient to the Site and was identified on the Federal Brownfields database in 2004. The database indicated a Phase I ESA was conducted. The property was originally residential but then was commercially developed. Environmental concerns were not identified in the database and therefore, the property is not considered a REC to the Site.		
Fed Brownfields	Family Dollar Store 429-435 11th Avenue South	No
This property is located approximately 150 feet south of and downgradient to the Site and was identified on the Federal Brownfields database in 2004. The database indicated a Phase I ESA was conducted. The property was originally an auto repair shop and a marble company. Based on the distance and direction from the Site and that this property is not identified on a database indicating that a leak has occurred, the property is not considered a REC to the Site.		
Fed Brownfields	Bossen Properties 425-433 11th Avenue South	No
This property is located approximately 150 feet south of and downgradient to the Site and was identified on the Federal Brownfields database in 2004. The database indicates a Phase I ESA was conducted. The property was originally residential but then was commercially developed. Environmental concerns were not identified in the database and therefore, the property is not considered a REC to the Site.		
Fed Brownfields	Dairy Queen Property 411 11th Avenue South	No
This property is located approximately 150 feet south of and downgradient to the Site and was identified on the Federal Brownfields database in 2004. The database indicated a Phase I ESA was conducted. The property was historically developed with commercial businesses and residences. Environmental concerns were not identified in the database and therefore, the property is not considered a REC to the Site.		
Fed Brownfields	Charles and Barbara Westbrook Property 1110 South 4th Street	No
This property is located approximately 200 feet south of and downgradient to the Site and was identified on the Federal Brownfields database in 2004. The database indicated a Phase I ESA was conducted. Historically, the property was developed with a two-story structure that was a machine shop and miscellaneous retail. Based on the distance and direction from the Site and that this property is not identified on a database indicating that a leak has occurred, the property is not considered a REC to the Site.		
UST and Leaking UST (LUST)	Clinton Car Company 1100 South 4th Street	No
This facility is located approximately 200 feet south of and downgradient to the Site and was identified as operating an UST and having a LUST. The database indicated the facility operated two 5,000-gallon gasoline USTs and one 500-gallon waste oil UST. The date of installation was listed as December 1, 1900, which generally indicates the date is unknown. The USTs ceased operations in 1982 and were removed in 1990. The IDNR online database indicated that the USTs received a NFA on November 9, 1990. Based on the regulatory status and the downgradient location from the Site, the property is not considered a REC to the Site.

TABLE 4-3 DATABASE SEARCH RESULTS

DATABASE LISTINGS	FACILITY NAME/ADDRESS	REC (Y/N)
UST and Leaking UST (LUST)	City of Clinton Property #2 1101-1105 South 4th Street	No
This facility is located approximately 200 feet south of and downgradient to the Site and was identified as operating an UST and having a LUST. The database indicated the facility operated an UST that was identified as a "pre-1974" tank. Further information on the details of the tank were not provided in the database or the IDNR database. The IDNR database indicated a leak of waste oil and diesel was reported in 2004. The IDNR issued a NFA letter for the facility on August 9, 2006. Based on the regulatory status and the downgradient location from the Site, the property is not considered a REC to the Site.		
FED Brownfields and Contaminated Sites	Liphardt Property Former Railroad Depot 325 11th Avenue South	No
This property is located approximately 350 feet southeast of and downgradient to the Site and was identified on the Federal Brownfields database in 2006. The database indicated a Phase I ESA was conducted. Historically, the property was developed with residences before being occupied by a water tower. Petroleum contamination was identified and reportedly cleaned up. A Phase I ESA was conducted at the Former Railroad Depot in 2010 that indicated the property contained industrial and residential properties in the late 1800s to early 1900s. A passenger railroad depot was constructed in 1915 and used until 1970. A Phase II Assessment was reportedly conducted in 2011. According to information identified on the IDNR contaminated Sites Online database, soil and groundwater samples were collected at the property and the only exceedance of the Iowa Statewide Standards was motor oil in groundwater. Because receptors were not identified, the EPA issued a No Further Action Letter for the property on July 21, 2017. Based on the regulatory status and the distance and direction from the Site, it is not considered a REC.		

The remaining facilities listed in the database report (Appendix C) are not considered RECs to the Site at this time based upon regulatory status, apparent topographic gradient, and/or distance from the Site.

4.4.1 Orphan Sites

Orphan sites are unmapped facilities that do not contain sufficient address or location information to be mapped relative to the Site. Twelve orphan sites were identified in the environmental database report. Based on the available information, the listings are related primarily to the former Dupont facility located over three miles from the Site and therefore are not of concern.

4.4.2 Site and Vicinity Observation Wells

A search for various types of wells was included in ERIS's Physical Setting Report (Appendix D). Wells were not identified on the Site.

4.5 OTHER RECORDS REVIEWED/AGENCIES CONTACTED

Additional sources of environmental records were evaluated as part of this Phase I ESA for reasonably ascertainable and/or practically reviewable documentation regarding RECs present

at the Site and adjoining properties. The additional sources contacted are discussed in the following sections.

4.5.1 City of Clinton

The City of Clinton was contacted by Blackstone for building and fire department records associated with the Site. As of the date of this report, a response has yet to be received.

The City of Clinton's Assessor's website was reviewed for information regarding the Site. According to the website database, the Site is owned by Daniel H and Margaret A Keis and is doing business as Central Site Supply. The building addressed as 413 10th Avenue South was constructed in 1976 with a 6,660 square foot metal warehouse. A 260 square foot office was added to this building in 1998. A two-story building plus basement was constructed at 1000 South 4th Street in 1900 and is approximately 4,400 square feet in area. The building was used as a retail business. Part of this building was originally built in 1864 as a 48 square foot warehouse.

4.5.2 IDNR

Blackstone accessed the IDNR contaminated site and storage tank databases for records of the Site. Records were not found on the database.

4.5 HISTORICAL USE INFORMATION

Blackstone reviewed historical sources for indications of RECs. Our review was focused on researching historical documents to identify obvious uses. Historical land use was researched to the first developed use of the Site, or back to 1940, whichever is earlier or readily available. The historical use information for the Site and the adjoining properties is presented collectively in this section.

4.5.3 Historical Topo Maps, Aerial Photographs, and Sanborn Fire Insurance Maps

The ERIS data package included a request for historical topographic maps, historic aerial photographs, and Sanborn Fire Insurance Map for the Site and surrounding areas. The information provided is listed below and copies are included in Appendix B:

- Topographic map: Clinton, Iowa, published in **1976, 1991, 2015,** and **2018** (1:24,000)
- Topographic map: Clinton, Iowa, published in **1891, 1894,** and **1952** (1:62,500)
- Aerial Photographs: ERIS, **1937**, **1951, 1956, 1966, 1969, 1976, 1983, 1986, 1994, 2004, 2005, 2006, 2007, 2008, 2009, 2010, 2011, 2013, 2014, 2015, 2017,** and **2019** (1"=500')
- Sanborn Fire Insurance Maps: **1885, 1890, 1897, 1902, 1909, 1917, 1925, 1950,** and **1967.**

TABLE 4-4 HISTORICAL INFORMATION REVIEW – 413 10th Avenue South

Direction	Description
Site	The Sanborn Fire Insurance map dated 1885 depicted the Site as developed with seven residences. By 1890s, five residences were present as well as an icehouse. Three houses, an icehouse, and two sheds were located on the Site in the 1897 Sanborn Fire Insurance map. By 1902, a warehouse for the adjacent grocery had been constructed. One residence, an icehouse, several sheds, and a hardware warehouse were located on Site by 1909. In the 1950 and 1967 maps, the Site was developed with a residence and a shed. By 1983, the aerial shows the Site developed with the current building. The Site appears relatively unchanged through 2019.
North	The 1885 Sanborn Fire Insurance map depicts 10th Avenue north of the Site, beyond are several connected buildings. From 1885 through 1967, the buildings were occupied by grocery stores, residences, barber, a dancing hall, drug store, cigar store, cigar factory, paint and wallpaper store, meat shop, cabinet maker, bank, and bakery. The building closest to the Site appeared to be developed with the current apartment building by 1983.
East	By 1885, the area east of the Site was developed with an alley, followed by several connected buildings. From 1885 through 1967, the buildings were occupied by a grocery, hardware store, residences, a shed, a vacant building, tin shops, harness and leather business, restaurant. warehouse, residences, and a clothing factory. The aerial photographs through 2019 show the area as relatively unchanged.
South	The 1885 through 1925 Sanborn Fire Insurance maps depicts an alley south of the Site, followed by residences. By 1950, a beer depot had been added. The beer distributor appeared to be demolished by 1986. By 2006, a warehouse building had been constructed. The aerial photographs through 2019 show the area as relatively unchanged.
West	From at least 1890 through, the Sanborn Fire Insurance maps depicted residences to the west of the Site. Residences were shown to the west of the Site in the 1937 through 2019 aerial photographs.

TABLE 4-5 HISTORICAL INFORMATION REVIEW – 1000 South 4th Street

Direction	Description
Site	According to a review of Sanborn Fire Insurance maps dated 1885 through 1902, the Site was developed with a grocery. In the 1909 map, it was used as a saloon and as a grocery in the 1917 map. From at least 1925 through 1967, the Site was used as a retail store and warehouse. The aerial photographs show the Site appearing relatively unchanged through 2019.
North	The 1885 Sanborn Fire Insurance map depicts 10th Avenue north of the Site, beyond are several connected buildings. From 1885 through 1967, the buildings were occupied by grocery stores, residences, barber, a dancing hall, drug store, cigar store, cigar factory, paint and wallpaper store, meat shop, cabinet maker, bank, and bakery. The building closest to the Site appeared to be developed with the current apartment building by 1983.
East	From at least 1885 through 1925, the area east of the Site was developed with South 4th Street followed by residences. By 1950, a gasoline station with three USTs was east of the Site (1001 South 4th Street). The 2004 through 2019 aerial photographs show the area east of the Site beyond 4th Street South as vacant land.

TABLE 4-5 HISTORICAL INFORMATION REVIEW – 1000 South 4th Street

Direction	Description
South	By 1885, the area south of the Site was developed with several connected buildings. From 1885 through 1967, the buildings were occupied by a grocery, hardware store, residences, a shed, a vacant building, tin shops, harness and leather business, restaurant. warehouse, residences, and a clothing factory. The aerial photographs through 2019 show the area as relatively unchanged.
West	The Sanborn Fire Insurance map dated 1885 depicted the area as developed with seven residences. By 1890, five residences were present as well as an icehouse. Three houses, an icehouse, and two sheds were located in the area in the 1897 Sanborn Fire Insurance map. By 1902, a warehouse for the Site grocery store had been constructed. One residence, an icehouse, several sheds, and a hardware warehouse were located to the east by 1909. In the 1950 and 1967 maps, the area was developed with a residence and a shed. By 1983, the aerial shows the area developed with the current building. The area appears relatively unchanged through 2019.

Note: USGS topographic maps may not show individual structures present within an area designated as and shaded as “Urban Area.” While observations may suggest no structures are shown, that does not necessarily indicate there were no structures on the property.

Based on a review of the historical sources, the western portion of the Site (413 South 10th Avenue) was developed by at least 1885 with multiple residences. From 1890 through 1909, residences were demolished, and sheds and an icehouse were added. By 1950, the Site was developed with a residence and a shed. From 1983 through 2019, the Site was developed with the current building.

Historical resources indicate the eastern portion of the Site (1000 South 4th Street) was developed by at least 1885 through at least 1967 with a building occupied by a grocery, saloon, a retail store, and warehouse. The aerial photographs show the Site appearing relatively unchanged through 2019.

The surrounding areas were developed by at least 1885 with residences and commercial buildings. The commercial buildings were occupied by grocery stores, barber, a dancing hall, drug store, cigar store, cigar factory, paint and wallpaper store, meat shop, cabinet maker, bank, bakery, tin shops, clothing factory, and gasoline stations. The area has remained residential and commercial through 2019. The former gasoline stations are discussed in Section 4.3.

4.5.4 Historical City Street Directories

Historical city directories can provide an indication of the type of use of the Site and adjoining areas by street address. ERIS’ report package included a search of historical city directories from 1925 to 2020 in the general vicinity of the Site. The table below summarizes listings provided by ERIS for the Site (if applicable) and nearby identified facilities. Information for all listed facilities is included in Appendix B.

Based on city directories reviewed, the Site building addressed as 413 South 11th Avenue was occupied by a beer distributor in the early 1980s, insulating materials sales in the mid-1980s, auto sales and repair shop in the early 1990s, trucking company in the mid-1990s, a residence in the early 2000s, and by Central Siding Supply and Illowa Storage from at least 2008 through 2020.

Former addresses of the Site were identified and include 407, 409, and 415 South 11th Avenue. These addresses were historically occupied by residences from the 1920s through the 1970s and a transportation company in the 1940s.

The Site building addressed as 1000 South 4th Street was historically occupied by a grocery store from the 1920s through the 1950s and in the 1980s, and a laundromat in the 1960s.

Historical city directories indicate the surrounding areas were developed with residential properties and retail businesses beginning in at least the 1920s through 2020. Businesses have included a beer distributor, bookstore, video store, ministry, restaurants, taverns, employment services, upholstering, custom furniture, used clothes store, barber, warehouse, pharmacies, offices, hardware store, beauty shop, grocery, laundromat, and gasoline stations. Two gasoline stations were adjacent east of the Site from at least 1937 through the 1970s. They are discussed in Section 4.3.

4.5.5 Historical Use Summary

Based on a review of the historical sources, the western portion of the Site (413 South 10th Avenue) was developed by at least 1885 with multiple residences. From 1890 through 1909, residences were demolished, and sheds and an icehouse were added. By 1950, the Site was developed with a residence and a shed. The current building was constructed in 1976 and was occupied by a beer distributor from development through the mid-1980s; insulating materials sales in the mid-1980s; auto sales and repair shop in the early 1990s; trucking company in the mid-1990s; a residence in the early 2000s; and by Central Siding Supply and Illowa Storage from at least 2008 through the present. The former use of this building as an auto repair shop is considered a REC.

Historical resources indicate the eastern portion of the Site (1000 South 4th Street) was developed by at least 1885 with the current building that was occupied by a grocery store from the 1920s through the 1950s and in the 1980s, and a laundromat from the 1960s through the 2000s. From approximately 2011 to the present, the Site building has been used for storage for Central Siding Supply and personal storage of the owner.

Historical city directories indicate the surrounding areas were developed with residential properties and retail businesses beginning in at least 1885 through 2020. Businesses have included a beer distributor, bookstore, video store, ministry, restaurants, taverns, employment services, upholstering, custom furniture, used clothes store, barber, warehouse, pharmacies, offices, hardware store, beauty shop, grocery, laundromat, and gasoline stations. Two gasoline stations were adjacent east of the Site from at least 1937 through the 1970s. They are discussed in Section 4.3.

5 SITE RECONNAISSANCE

Blackstone's assessment activities included a Site reconnaissance. This section summarizes the findings from the Site reconnaissance.

5.1 METHODOLOGY AND LIMITING CONDITIONS

Ms. Krista Brodersen of Blackstone performed the Site reconnaissance on June 3, 2022. The temperature was approximately 80 degrees Fahrenheit with sunny conditions. The Site reconnaissance included a visual inspection of the Site to assist in identifying the presence or likely presence of hazardous substances or petroleum products under conditions that indicate an existing release, a past release, or threat of release into structures, soil, groundwater, or surface water at the Site (RECs). Observations of readily apparent existing conditions are summarized in Table 5-1, and color photographs of the Site are presented in Appendix A. The Site location is shown on Figures 1 and 2.

Blackstone was accompanied on the Site reconnaissance by Ms. Tammy Johnson, City of Clinton Code Enforcement Officer and the Site owner, Mr. Dan Keis.

5.2 GENERAL SITE SETTING

The Site totals approximately 0.374-acre in area and is developed with two buildings. The building located at 413 10th Avenue South is a 6,660 square foot metal warehouse that was constructed in 1976. This building is occupied by Central Siding Supply, a home improvement building materials distributor. The building located at 1000 South 4th Street was constructed between 1864 and 1900 and is approximately 4,400 square feet in area, two-stories, and was formerly used for retail purposes on the first floor and apartments on the second floor. This building is currently used by Central Siding Supply for storage of home improvement products and personal storage.

5.3 SITE OBSERVATIONS

Site observations are shown in Table 5-1 and described below.

TABLE 5-1 SITE OBSERVATIONS

Feature	Observed
Aboveground storage tank (AST)	
Air emissions	
Below grade vaults	
Burned or buried debris	
Chemical storage	
Chemical mixing areas	
Discolored soil or water	
Ditches, streams	

Feature	Observed
Drains and piping (e.g., floor drains/ trenches, sand / grease traps)	X
Drums	
PCB- containing electrical or hydraulic equipment.	
Farm waste (e.g., feedlot spoils or manure stockpile)	
Fill dirt from an unknown source.	
Hazardous chemical and petroleum products in connection with known or unknown use.	
Non-hazardous containers with contents	
Hazardous waste storage	
Heating and cooling system and fuel source	X
Industrial waste treatment equipment	
Odors	
Pits, ponds, or lagoons	
Pools of liquid	
Process wastewater	
Sanitary sewer system	X
Septic system (e.g., tank and leach fields)	
Soil piles	
Solid waste/evidence of unauthorized dumping	
Stained pavement, soil, or concrete	
Stains or corrosion (interior, non-water)	
Storm drains/catch basins	
Stressed vegetation	
Sumps and clarifiers	
Surface water	
Underground storage tank(s) (including heating oil tanks)	X
Unidentified substance containers	
Wastewater discharge	
Water supplies (potable and process)	X
Wells (irrigation, monitoring, or domestic)	
Wells (oil and gas)	
Other	

During the Site reconnaissance, the building located at 413 10th Avenue South was observed to be a metal warehouse used for storage of building materials and an office. A trench drain was observed in the center of the building that is reportedly connected to the City of Clinton sanitary sewer. Several 1- and 5-gallon containers of oils and lubricants were observed on the concrete. The owner indicated vehicle maintenance was not conducted on the Site. Staining or leaks were not observed. Propane powered forklifts were observed being used at the Site.

The building located at 1000 South 4th Street was observed to be two-stories with a basement. Storage of building materials and personal belonging were observed on the first and second floor. Evidence of a former fire was observed on the second floor. The basement was mostly empty. However, a brick lined cistern and evidence of a vent pipe typically associated with USTs were observed. The owner did not have information about the cistern or suspected UST.

© 2022 Blackstone Environmental, Inc.

The Site is serviced by the City of Clinton water and sewer. Electricity and natural gas are supplied by Alliant Energy. The owner indicated the office in the building addressed as 413 10th Avenue South is heated and cooled but the warehouse is not. The building located at 1000 South 4th Street is not heated or cooled.

5.3 ASBESTOS AND LEAD-BASED PAINT

Based on the age of the Site buildings (over 44 years and over 100 years), it is possible that asbestos containing materials (ACM) and lead-based paint (LBP) are present. During the Site reconnaissance, suspect ACM observed included floor tiles and linoleum. Suspected LBP was observed in windowsills throughout the building.

5.4 ADJOINING PROPERTY RECONNAISSANCE

North of the Site is 10th Avenue South followed by an apartment building. To the west of the building located at 413 10th Avenue South are residences. An alley and Central Siding Supply are to the west of the former 1000 South 4th Street building. To the south of the building located at 413 10th Avenue South is an alley, warehouse for Central Siding Supply, and residences. South of the former 1000 South 4th Street building are attached vacant commercial/residential buildings. East of the building located at 413 10th Avenue South is an alley, the 1000 South 4th Street building and attached vacant commercial/residential buildings. To the east of the 1000 South 4th Street building is South 4th Street followed by vacant, grassed land.

Observations of adjoining properties from public vantage points did not identify obvious indications of RECs relative to the Site.

© 2022 Blackstone Environmental, Inc.

6 VAPOR ENCROACHMENT SCREEN

6.1 VAPOR ENCROACHMENT SCREEN

Vapor intrusion occurs when there is a migration of volatile chemicals from contaminated groundwater or soil into an overlying building. A Vapor Encroachment Screen identifies releases on and near the Site and evaluates the likelihood of vapors migrating to the subsurface of the Site. Based on the information reviewed for this report, an UST is potentially present in the basement of the Site and the property located at 413 South 10th Avenue was formerly used for auto repair. Based on the presence of the suspected UST and the former use of a portion of the Site as auto repair, it is possible a vapor encroachment condition exists at the Site.

© 2022 Blackstone Environmental, Inc.

7 INTERVIEWS

Interviews with key Site representatives were conducted as available.

7.1 INTERVIEWS WITH CURRENT OWNER / SITE MANAGER / OCCUPANT

Blackstone interviewed the owner of the Site, Mr. Dan Keis. He stated he purchased the Site approximately 11 years ago. He has a business that is adjacent to the west of the Site and wanted to put signage for this business on South 4th Street. In order to place signage on the street, he had to purchase the Site building and conduct business in that building. Since the Site was purchased, he has used the building for storage for his business Central Siding Supply and for personal storage. When he purchased the Site, he indicated the building did not have floors due to age and a past fire. He rebuilt all the floors in the building. He was not aware of the presence of the cistern and suspect UST and did not have information about either. He indicated the Site was formerly used as a laundromat. Mr. Keis was unaware of environmental concerns at the Site.

7.2 INTERVIEWS WITH PAST OWNERS AND OCCUPANTS

Previous owners or occupants of the Site were not available for interview.

7.3 INTERVIEWS WITH STATE AND LOCAL GOVERNMENT OFFICIALS

Interviews with State and local government officials are described in Section 4.5.

8 EVALUATION

8.1 FINDINGS

Blackstone has completed a Phase I ESA for the property located at 413 10th Avenue South (formerly 1000 South 4th Street) in Clinton, Clinton County, Iowa (Site).

The Phase I ESA was performed for the Client, to assess Site conditions, both past and present, for indications of RECs prior to demolition of the Site. The definition of REC is provided in Section 2.1. This report was prepared in general accordance with the ASTM Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process E1527-13, and All Appropriate Inquiries in general accordance with 40 CFR Part 312.

The Site totals approximately 0.374-acre in area and is developed with two buildings. The building located at 413 10th Avenue South is a 6,660 square foot metal warehouse that was constructed in 1976. This building is occupied by Central Siding Supply, a home improvement building materials distributor. The building formerly addressed as 1000 South 4th Street was constructed prior to 1885 and is approximately 4,400 square feet in area, two-stories, and was formerly used for retail purposes on the first floor and apartments on the second floor. This building is currently used by Central Siding Supply for storage of home improvement products and personal storage. The owner of 413 10th Avenue South purchased the property formerly addressed as 1000 South 4th Street in approximately 2011. At that time, the addresses were combined, and the address for both buildings is currently 413 10th Avenue South. Based on information provided by ECIA, it is Blackstone's understanding that the Site buildings are to be razed and the Site redeveloped.

North of the Site is 10th Avenue South followed by an apartment building. To the west of the building located at 413 10th Avenue South are residences. An alley and Central Siding Supply are to the west of the former 1000 South 4th Street building. To the south of the building located at 413 10th Avenue South is an alley, warehouse for Central Siding Supply, and residences. South of the former 1000 South 4th Street building are attached vacant commercial/residential buildings. East of the building located at 413 10th Avenue South is an alley, the 1000 South 4th Street building and attached vacant commercial/residential buildings. To the east of the 1000 South 4th Street building is South 4th Street followed by vacant, grassed land.

Based on a review of the historical sources, the western portion of the Site (413 South 10th Avenue) was developed by at least 1885 with multiple residences. From 1890 through 1909, residences were demolished, and sheds and an icehouse were added. By 1950, the Site was developed with a residence and a shed. The current building was constructed in 1976 and was occupied by a beer distributor from development through the mid-1980s; insulating materials sales in the mid-1980s; auto sales and repair shop in the early 1990s; trucking company in the mid-1990s; a residence in the early 2000s; and by Central Siding Supply and Illowa Storage from at least 2008 through the present. The former use of this building as an auto repair shop is considered a REC.

© 2022 Blackstone Environmental, Inc.

Historical resources indicate the eastern portion of the Site (1000 South 4th Street) was developed by at least 1885 with the current building that was occupied by a grocery store from the 1920s through the 1950s and in the 1980s, and a laundromat from the 1960s through the 2000s. From approximately 2011 to the present, the Site building has been used for storage for Central Siding Supply and personal storage of the owner.

Historical city directories indicate the surrounding areas were developed with residential properties and retail businesses beginning in at least 1885 through 2020. Businesses have included a beer distributor, bookstore, video store, ministry, restaurants, taverns, employment services, upholstering, custom furniture, used clothes store, barber, warehouse, pharmacies, offices, hardware store, beauty shop, grocery, laundromat, and gasoline stations. Two gasoline stations were adjacent east of the Site from at least 1937 through the 1970s. Based on their regulatory status and the downgradient direction from the Site, the gas stations are not considered RECs.

During the Site reconnaissance, the building located at 413 10th Avenue South was observed to be a metal warehouse used for storage of building materials and an office. The building located at 1000 South 4th Street was observed to be two-story with a basement. Storage of building materials and personal belonging were observed on the first and second floor. A brick lined cistern and evidence of a vent pipe typically associated with USTs were observed. The presence of the suspected UST is considered a REC to the Site.

A Phase I ESA and Phase II ESA, dated 2018, were provided by ECIA for the properties located at 1000 – 1006 South 4th Street in Clinton, Iowa. The reports include the Site building located along South 4th Street that was formerly addressed as 1000 South 4th Street. However, the reports do not include the Site building addressed as 413 10th Avenue South. The suspected UST and cistern were identified as RECs. The report also identified 413 10th Avenue South as a REC as it was identified as a former auto repair/auto sales shop from 1987 through 1992.

The Phase II ESA was conducted to assess the RECs identified in the Phase I ESA. According to the report, due to Site constraints, soil samples were not collected from the area of the UST and cistern. The two closest borings to the suspect UST and cistern were approximately 40 and 65 feet away. Two borings were advanced near 1000 South 4th Street to the east and west of the building. The borings were advanced to 11 feet bgs when refusal was encountered. Groundwater was not encountered in the borings. Soil samples were collected for the analysis of RCRA 8 metals, VOCs, SVOCs, and TEH. VOCs, SVOCs, and TEH were not detected at concentrations above the laboratory detection limit. RCRA 8 metals were detected in the samples at concentrations below the Iowa Statewide Standards. Further action was not recommended. However, based on the distance of the borings from the suspected UST and cistern (40 and 60 feet away) and that soil and groundwater samples were not obtained, the suspected areas of concern that may have impacted soil and groundwater do not appear to have been adequately assessed.

© 2022 Blackstone Environmental, Inc.

Based on the age of the Site buildings (over 44 years and over 100 years), it is possible that ACM and LBP are present. During the Site reconnaissance, suspect ACM observed included floor tiles and linoleum. Suspected LBP was observed in windowsills throughout the building.

The Site building addressed as 1000 South 4th Street was identified on the environmental database report as a Federal Brownfields facility in 2019. The database indicated a vent pipe and fill port were identified in the basement of the building and the adjacent property was used historically for auto repair. The possible presence of an UST at the Site is considered a REC. Other facilities identified on the environmental database are not considered concerns due to their regulatory status, and/or distance and direction from the Site.

Based on the information reviewed for this report, a suspected UST is located in the basement of 1000 South 4th Street. Additionally, the Site building located at 413 10th Avenue South was formerly used for auto repair. Based on the presence of a suspected UST at the Site and the former use of the Site as auto repair, it is possible a vapor encroachment condition exists at the Site.

8.2 CONCLUSIONS

Blackstone has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527 of 413 10th Avenue South (formerly 1000 South 4th Street) in Clinton, Clinton County, Iowa. Any exceptions to, or deletions from, this practice are described in Section 2.4 of this report. This assessment has revealed no evidence of RECs in connection with the Site except for the following:

- The presence of a suspected UST in the former 1000 South 4th Street building.
- The former use of the building located at 413 10th Avenue South as auto repair.
- The possible presence of a vapor encroachment condition at the Site.

8.3 OPINIONS/RECOMMENDATIONS

Additional investigation is recommended to assess the identified RECs.

RE: CITY DIRECTORY RESEARCH
413 10th Avenue South
Clinton,IA 52732

Thank you for contacting ERIS for an City Directory Search for the site described above. Our staff has conducted a reverse listing City Directory search to determine prior occupants of the subject site and adjacent properties. We have provided the nearest addresses(s) when adjacent addresses are not listed. If we have searched a range of addresses, all addresses in that range found in the Directory are included.

Note: Reverse Listing Directories generally are focused on more highly developed areas. Newly developed areas may be covered in the more recent years, but the older directories will tend to cover only the "central" parts of the city. To complete the search, we have either utilized the ACPL, Library of Congress, State Archives, and/or a regional library or history center as well as multiple digitized directories. These do not claim to be a complete collection of all reverse listing city directories produced.

ERIS has made every effort to provide accurate and complete information but shall not be held liable for missing, incomplete or inaccurate information. To complete this search we used the general range(s) below to search for relevant findings. If you believe there are additional addresses or streets that require searching please contact us at 866-517-5204.

Search Criteria:
400-500 of 10th Avenue South
400-500 of 11th Avenue
900-1100 of South 4th Street

Notice: IMPORTANT LIMITATIONS and YOUR LIABILITY

Reliance on information in Report: This report DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as database review of environmental records.

License for use of information in Report: No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

Your Liability for misuse: Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

No warranty of Accuracy or Liability for ERIS: The information contained in this report has been produced by ERIS Information Inc. ("ERIS") using various sources of information, including information provided by Federal and State government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

Trademark and Copyright: You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report (s) are protected by copyright owned by ERIS Information Inc. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

Description History:	The property was built in 1900 and has most recently been used as bar, until the business was shut down in 2008 due to the condition of the building. The building is currently vacant and has been abandoned. Previous uses are unknown at this time. The building is blighted and is part of a larger block of buildings with shared walls. The city had previously looked at demolition of the property in 2008, but funds were not available to proceed at that time. The city is currently pursuing a 657A (nuisance) process to take title to the property. The city plans to demolish the buildings and redevelop the site into commercial use consistent with the character of downtown.
Ready for Reuse Ind:	No

Description History:	The property is owned by Daniel and Margaret Keis. It is located in a primarily residential/commercial area of Clinton, Iowa. The building consists of an approximately 4,140 square foot commercial building (calculated as two-story building). The existing structure was originally constructed circa 1864. One vent pipe and fill port characteristic of an underground storage tank was observed in the basement. A brick-lined well or cistern was observed as well in the basement. Historic documents show that the adjacent property was an auto repair/auto sales shop.

Ready for Reuse Ind: No

Description History:	The property contained both industrial and residential development from approximately 1897 to 1909. The industrial use included a coal shed and a wood storage yard. A railroad constructed a passanger rail depot in 1915. Use of the structure as a depot continuted until approximately 1970. Subsequent owners have used the building for commercial-retail purposes since 1970. Melvin L. Liphardt currently owns the property.

Certificate Information

Type:	LUST	**Coordinator ID:**	10
NFA Letter Date:	2010-04-07 00:00:00	**Staff Name:**	Dawn Santa Maria
Request Date:	2012-03-15 00:00:00	**Staff Phone No:**	515.281.8865
Certificate Date:		**CC Send To:**	
NFA Certificate Sent:		**Coordinator:**	Verne Schrunk

Legal Description:

Technical Controls: GROUNDWATER INGESTION--ORDINANCE: Soil or Groundwater contamination is present (or may be present in the furture due to contaminant migration) at levels which if ingested by humans could present an unreasonable risk to health. The potential for exposure to this groundwater by installation of groundwater wells is being regulated by the following control: A city or county ordinance was in place at the time of issuance of this no further action certificate which regulates the installation of drinking and non-drinking water wells. The permitting authority has provided a non-binding certification that it is not likely to allow permitting of groundwater wells on this property because of the availability of a public water supply. If this ordinance is not maintained or is otherwise estabilised to be ineffective, the 'no action required' classification may be rescinded.

Type:	LUST	**Coordinator ID:**	10

Description History:	The parcel totals approximately 0.42 acres with one commercial structure and a parking lot. The structure is used as office space for New Age Builders, Inc., a general contractor, and Mel Foster Company, a realty agency. The structure was previously a Kentucky Fried Chicken (KFC) restaurant. The property was first identified as a residence from circa 1909 through circa 1956. Circa 1960 a restaurant identified as the Golden Point Drive-In

occupied the site. The KFC restaurant occupied the site from circa 1965 through circa 2005.
